In this case a short description of the Element is included in the summary with the mention of ‘not applicable’.

Dividends will be paid in the currency of the class of Shares in respect of which the dividend was declared.</p> <p>The holders of any class of C Shares will be entitled to receive such dividends as the Directors may resolve to pay to such holders out of the assets attributable to such class of C Shares (as determined by the Directors).</p>

D1	Key information on the key risks specific to the issuer or its industry.	<ul style="list-style-type: none"> ● The Company's Target Yield is based on estimates and assumptions about a variety of factors including, without limitation, asset mix, value, volatility, holding periods, the terms of the investments made by the Company, performance of underlying borrowers, that are inherently subject to significant business and economic uncertainties and contingencies, and the actual rate of return may be materially lower than the Target Yield. The Target Yield is also based on the assumption that the Company will be able to implement its investment policy and strategy successfully as well as market conditions and the economic environment at the time of assessing the proposed Target Yield, and is therefore subject to change. ● The Company may be unable to realise value from its investments and investors could lose all or part of their investment. Investments that the Company makes may not appreciate in value and, in fact, may decline in value. A substantial component of the Investment Managers' analysis of the desirability of making a given investment relates to the estimated residual or recovery value of such investments in the event of the insolvency of the issuer or the borrower. This residual or recovery value will be driven primarily by the value of the underlying assets constituting the collateral for such investment. The value of collateral can, however, be extremely difficult to predict and in certain market circumstances there could be little, if any, market for such assets. ● Capital gains from the Company's investments may require significant time to materialise or may not materialise at all. There may be a significant period between the date that the Company makes an investment and the date that any capital gain or loss on such investment is realised. Capital return on the Company's

		<p>investments, therefore, may not be realised for a substantial time period, if at all.</p> <ul style="list-style-type: none"> ● Global capital markets have been experiencing volatility, disruption and instability. Material changes affecting global debt and equity capital markets may have a negative effect on the Company's business, financial condition and results of operations. ● The success of the Company depends on the Investment Managers' ability to achieve the Company's investment objective. There can be no assurance that the Investment Managers will be able to do so or that the Company will be able to generate any investment returns for Shareholders or indeed avoid investment losses. ● The value of senior loans may be adversely influenced by a number of factors (including, but not limited to, the financial condition of the underlying borrowers, the industry in which a borrower operates, general economic or political conditions, and interest rates). Furthermore, early prepayment or default by a borrower may affect the value of the Portfolio particularly since prepayments of senior loans held by the Company are likely to be made during any period of declining interest rates. Such prepayments may result in the Company replacing such loans with lower-yielding investments, leading to lower returns on the Portfolio and the Shares. ● The Company may acquire different contractual rights depending on the way in which it invests in loans. Prepayments of senior loans held by the Company are likely to be made during any period of declining interest rates. A purchaser by way of transfer or assignment of a loan typically has a direct contractual relationship with the borrower. Acquisition of a sub-participation interest in a loan typically results in a contractual relationship only with the lender which is participating out its interest under the loan, rather than with the borrower. ● In the event of default under a loan, the Company will bear a risk of loss of principal and accrued interest. In the case of secured loans, foreclosure can be an expensive and lengthy process which could have a material negative effect on the Company's anticipated return on the foreclosed loan. ● The Company is dependent on the expertise of the Investment Managers for the successful implementation of its investment policy. The Company does not have employees and its Directors are appointed on a non-executive basis. Although, the Directors have overall responsibility for the Company's activities, they have delegated responsibility for managing the assets comprised in the Portfolio to the Investment Managers who are not required to, and generally will not, submit individual investment decisions for the approval of the Board. All of its investment and asset management decisions will be made by the Investment Managers and not by the Company and accordingly, the Company will be completely reliant upon, and the success of its implementation of the investment policy will depend on the Investment Managers. ● The Investment Managers will source all of the Company's investments and Affiliates of the Investment Managers may participate in some of those investments, which may result in conflicts of interest.

Risk Factors

An investment in the Company and more specifically the Issue Shares carries a number of risks, including the risk that the entire investment may be lost. In addition to all other information set out in this Prospectus, the following specific factors should be considered when deciding whether to make an investment in the Issue Shares. The risks set out below are those which are considered to be the material risks relating to an investment in the Issue Shares and the Company but are not the only risks relating to the Issue Shares or the Company. No assurance can be given that Shareholders will realise profit on, or recover the value of, their investment in the Issue Shares. It should be remembered that the price of Issue Shares and the income from them can go down as well as up.

The Issue Shares are only suitable for investors who understand the risk of capital loss and that there may be limited liquidity in the underlying investments of the Company and in the Issue Shares, for whom an investment in the Issue Shares would be of a long-term nature and constitute part of a diversified investment portfolio and who understand and are willing to assume the risks involved in investing in the Issue Shares. Additional risks and uncertainties of which the Company is presently unaware or that the Company currently believes are immaterial may also adversely affect its business, financial condition, results of operations or the value of the Issue Shares.

Potential investors in the Issue Shares should review this Prospectus carefully and in its entirety and consult with their professional advisers prior to making an application to subscribe for Issue Shares. Defined terms used in the risk factors below have the meanings set out under the section headed "Glossary of Selected Terms" on pages 138 to 143 of this Prospectus.

Risks relating to the Company

The past performance of the Company is not an indication of its future performance

This document contains certain historical financial and other information in relation to the past performance of the Company. The past performance of the Company is not an indication of its future performance.

The Company's future returns and operating cash flows depend on and may be negatively affected by many factors, some of which are not in the Company's control, including the price and performance of its investments, the availability and liquidity of investment opportunities falling within the Company's investment objective and policy, the level and volatility of interest rates, readily accessible short-term borrowings, conditions in the financial markets, real estate market and economy, the financial performance of borrowers, and the Company's ability to successfully operate its business and execute its investment strategy.

Therefore there can be no assurance that the Company's future performance will be successful or reflect past performance.

The Company's Target Yield is based on estimates and assumptions that are inherently subject to significant business and economic uncertainties and contingencies, and the actual rate of return may be materially lower than the Target Yield

The Company's Target Yield set forth in this Prospectus is a target only and is based on estimates and assumptions about a variety of factors including, without limitation, asset mix, value, volatility, holding periods, the terms of the investments made by the Company, performance of underlying borrowers, investment liquidity, changes in current economic and market conditions, fluctuations in currency exchange rates, prevailing interest rates and credit spreads, government regulations or other policies, the worldwide economic environment, changes in law and taxation, natural disasters, terrorism, social unrest and civil disturbances, all of which are beyond the Company's control and which may adversely affect the Company's ability to achieve the Target Yield. The Target Yield is also based on the assumption that the Company will be able to implement its investment policy and strategy successfully as well as market conditions and the economic environment at the time of assessing the proposed Target Yield, and is therefore subject to change. There is no guarantee or assurance that the Target Yield or actual returns can be achieved at or near the levels set forth in this Prospectus. Accordingly, the actual rate of return achieved may be materially

lower than the Target Yield, or may result in a loss, which could have a material adverse effect on the NAV and the price of the Shares.

Potential investors should not place any reliance on the Target Yield set forth in this Prospectus and should make their own determination as to whether the Target Yield is reasonable or achievable in deciding whether to invest in the Company. The Company does not intend to publish target returns regularly or to update or otherwise revise its Target Yield to reflect subsequent events or circumstances. A failure to achieve the Target Yield set forth in this Prospectus may adversely affect the Company's business, financial condition and results of operations.

The Company may be unable to realise value from its investments and investors could lose all or part of their investment

Investments that the Company makes may not appreciate in value and, in fact, may decline in value. A substantial component of the Investment Managers' analysis of the desirability of making a given investment relates to the estimated residual or recovery value of such investments in the event of the insolvency of the issuer or the borrower. This residual or recovery value will be driven primarily by the value of the underlying assets constituting the collateral for such investment. The value of collateral can, however, be extremely difficult to predict and in certain market circumstances there could be little, if any, market for such assets. Moreover, depending upon the status of these assets at the time of an issuer's default, they may be substantially worthless. The types of collateral owned by the issuers in which the Company invests will vary widely, but are expected primarily to be receivables and inventory as well as hard assets. Furthermore, the Investment Managers may have no experience in managing the types of underlying assets that may comprise collateral against which investments are secured. During times of recession and economic contraction, there may be little or no ability to realise value on any of these assets, or the value which can be realised may be substantially below the assessed value of the collateral. A default that results in the Company holding collateral may materially adversely affect the performance of the Portfolio and the value of the Shares.

There can be no assurance that the Company's investments will generate gains or income or that any gains or income that may be generated will be sufficient to offset any losses that may be sustained. As a result, investing in the Company is speculative and involves a high degree of risk. The Company's performance may be volatile and investors could lose all or part of their investment. Past performance is no indication of future results and there can be no assurance that the Company will achieve results comparable to any past performance achieved by the Investment Managers or any employee of the Investment Managers described in this Prospectus.

Capital gains from the Company's investments may require significant time to materialise or may not materialise at all

There may be a significant period between the date that the Company makes an investment and the date that any capital gain or loss on such investment is realised. Capital return on the Company's investments, therefore, may not be realised for a substantial time period, if at all.

Global capital markets have been experiencing volatility, disruption and instability. Material changes affecting global debt and equity capital markets may have a negative effect on the Company's business, financial condition and results of operations

Global capital markets have been experiencing extreme volatility and disruption for more than five years as evidenced by a lack of liquidity in the equity and debt capital markets, significant write-offs in the financial services sector, the repricing of credit risk in the credit market, the failure of major financial institutions and the threat of sovereign default. Despite actions of government authorities, these events have contributed to worsening general economic conditions that have materially and adversely affected the broader financial and credit markets and reduced the availability of debt and equity capital.

Continued or recurring market deterioration may materially adversely affect the ability of a borrower to service its debts or refinance its outstanding debt. Further, such financial market disruptions may have a negative effect on the valuations of the Company's investments, and on the potential for liquidity events involving its investments. In the future, non-performing assets in the Portfolio may cause the value of its investment portfolio to decrease if the Company is required to write down the values of its investments. Adverse economic conditions may also decrease the value of collateral securing some of its loans. In the

event of sustained market improvement, the Company may have access to only a limited number of potential investment opportunities, which also would result in limited returns to Shareholders.

Depending on market conditions, the Company may incur substantial realised losses and may suffer additional unrealised losses in future periods, which may adversely affect its business, financial condition and results of operations.

Risks relating to the Issue Shares

The Issue Shares may trade at a discount to NAV per Share and Shareholders may be unable to realise their investments through the secondary market at NAV per Share

The Issue Shares may trade at a discount to Net Asset Value per Share for a variety of reasons, including market conditions or to the extent investors undervalue the management activities of the Investment Managers or discount their valuation methodology and judgments. While the Directors may seek to mitigate any discount to NAV per Share through discount management mechanisms they consider appropriate, there can be no guarantee that they will do so or that such mechanisms will be successful and the Directors accept no responsibility for any failure of any such strategy to effect a reduction in any discount.

The existence of a liquid market in the Issue Shares cannot be guaranteed

The Company will apply for the Issue Shares to be admitted to trading on the Main Market and expects the Issue Shares to commence trading on this exchange on or about 26 March 2013.

The market price of the Issue Shares may rise or fall rapidly; investors should carefully consider, among other things, the following factors before dealing in Issue Shares:

- the prevailing market price of the Issue Shares;
- the Net Asset Value per C Share, market price volatility and liquidity of the Issue Shares;
- any related transaction costs; and
- the Company's creditworthiness.

In addition, general movement in local and international stock markets, prevailing and anticipated economic conditions and interest rates, investor sentiment and general economic conditions may all affect the market price of the Issue Shares.

The Company has been established as a listed closed-ended collective investment scheme. Accordingly, Shareholders will have no right to have their Issue Shares redeemed or repurchased by the Company at any time. Shareholders wishing to realise their investment in the Company will normally therefore be required to dispose of their Issue Shares through the secondary market. Accordingly, Shareholders' ability to realise their investment at NAV per Share or at all is dependent on the existence of a liquid market for the Issue Shares.

The number of Issue Shares to be issued pursuant to the Issue is not yet known, and, following the Issue, there may be a limited number of holders of Issue Shares. Limited numbers and/or holders of Issue Shares may mean that there is limited liquidity in such Issue Shares which may affect (i) an investor's ability to realise some or all of his investment, and/or (ii) the price at which such investor can effect such realisation, and/or (iii) the price at which such Issue Shares trade in the secondary market.

Holders of Issue Shares have limited voting rights

The Issue Shares do not carry voting rights in relation to the election of the Company's board of directors and generally have no voting rights, except that (i) any alteration to the memorandum of incorporation of the Company or the Articles or the passing of any resolution to wind up the Company requires the consent of the holders of the Issue Shares by ordinary resolution (such that the holders of Issue Shares may veto, but cannot force the Company to take, any such actions); and (ii) as may be required by Guernsey law. Further, holders of Issue Shares cannot direct the Directors to redeem or repurchase any shares or return capital or liquidate the Company. The limited voting rights of the holders of the Issue Shares limit their ability to have an impact on Board decisions or Company policy and may adversely affect the value of such shares.

The C Share class may be exposed to currency risk

The Issue Shares will be denominated in Sterling. Investments made by the Company will be denominated in U.S. Dollars, Sterling and Euros. The financial statements of the Company, however, will be prepared in U.S. Dollars and the operational and accounting currency of the Company will be the U.S. Dollar.

Therefore, the holders of the Issue Shares may be subject to foreign currency fluctuations between the currency in which such Issue Shares are denominated and the currency of the investments made by the Company.

The Investment Managers will normally seek to hedge currency exposure between the U.S. Dollar (being the Company's operational and accounting currency) and any other currency in which the Company's assets may be denominated. In addition, the Investment Managers will normally seek to hedge the exposure of C Shares denominated in Sterling against fluctuations between Sterling and the U.S. Dollar.

However, hedging arrangements will be implemented on behalf of the Company only when suitable hedging contracts, such as currency swap agreements, futures contracts, options and forward currency exchange and other derivative contracts, are available in a timely manner and on terms acceptable to the Investment Managers, in their sole and absolute discretion. To the extent that the Investment Managers are unable to engage, or are unsuccessful, in hedging currency exposure, Shareholders will be subject to fluctuations between Sterling (the currency in which their C Shares are denominated) are denominated and the other currencies in which the assets and investments comprising the Portfolio are denominated.

The Investment Managers reserve the right to terminate any hedging arrangement in their absolute discretion, including, without limitation, if they consider it to be in the interests of Shareholders to do so or such arrangements may adversely affect the performance of the Company.

In connection with any currency hedging transactions, the Company may be required to pledge some of its assets to the relevant counterparty to such transactions as collateral. Moreover, the agreements related to the Company's currency hedging transactions typically will give the counterparty the right to terminate the transactions upon the occurrence of certain termination events. Such events may include, among others, the failure to pay amounts owed when due, the failure to provide required reports or financial statements, a decline in the value of the Company's assets pledged as collateral, the failure to maintain sufficient collateral coverage, the failure to comply with the investment policy and any investment restrictions, key changes in the Company's management or the Investment Managers' personnel, a significant reduction in the Company's assets and material violations of the terms of, or representations, warranties or covenants under, the transaction agreements, as well as other events determined by the counterparty. If a termination event were to occur, the counterparty would be entitled, in its sole discretion and without regard to the Company's investment objective, to realise and liquidate pledged assets as collateral, and as a result, the Company's investment return and performance could be materially adversely affected and the Company could incur significant losses. Furthermore, in selecting pledged assets for liquidation, a counterparty will realise the most liquid investments, which could result in the remaining portfolio of investments being less diverse than would otherwise be the case.

The use of derivatives and other instruments to reduce risk involves costs. Consequently, the use of hedging transactions might result in lower performance for the hedged C Shares than if the Investment Managers had not sought to hedge exposure against foreign currency exchange risk.

There can be no assurance that appropriate hedging transactions will be available to the Company or that any such hedging transactions will be successful in protecting against currency fluctuations or that the performance of the C Shares will not be adversely affected by the currency exchange rate exposure. In addition, the Company may concentrate its hedging activities with one or a few counterparty(ies) and the Company is subject to the risk that a counterparty may fail to fulfil its obligations under a hedging contract. To the extent that a counterparty fails to fulfil its obligations, the relevant C Share class, and potentially the Company as a whole, could suffer loss.

The Standard Listing of the Issue Shares will afford Shareholders a lower level of regulatory protection than a Premium Listing

A Standard Listing affords Shareholders a lower level of regulatory protection than that afforded to investors in securities of a company admitted to Premium Listing, which is subject to additional obligations under the Listing Rules in respect of those securities. A Standard Listing will not permit the Company to gain a FTSE indexation in respect of the Issue Shares, which may have an adverse affect on the valuation of the Issue Shares.

Further details regarding the differences in the protections afforded by a Premium Listing as against a Standard Listing are set out in the section entitled “Consequences of a Standard Listing of the Issue Shares”.

The Company is not, and does not intend to become, registered in the United States as an investment company under the U.S. Investment Company Act and related rules

The Company has not, does not intend to become, and may be unable to be, registered in the United States as an investment company under the U.S. Investment Company Act. The U.S. Investment Company Act provides certain protections to U.S. investors and imposes certain restrictions on companies that are registered as investment companies. As the Company is not so registered, and does not intend to register, none of these protections or restrictions is or will be applicable to the Company.

The Shares will be subject to significant transfer restrictions as well as forced transfer provisions

The Issue Shares have not been registered and will not be registered in the United States under the U.S. Securities Act or with any securities regulatory authority or any state or other jurisdiction of the United States. Moreover, the Issue Shares are being offered and sold outside the United States to persons who are not U.S. Persons (as defined in Regulation S under the U.S. Securities Act).

In order to avoid being required to register under the U.S. Investment Company Act, the Company has imposed significant restrictions on the transfer of the Shares, which may materially affect the ability of Shareholders to transfer Shares in the United States or to U.S. Persons. The Issue Shares may not be resold in the United States or to U.S. Persons. These restrictions may make it more difficult to resell the Shares and may have an adverse effect on the market value of the Shares. The transferability of the Shares is subject to certain restrictions as set out in the sections entitled “Selling restrictions” and “Purchase and transfer restrictions” in Part VIII of this Prospectus.

The conversion of the Issue Shares into new Correspondent Shares at the Conversion Time is, moreover, prohibited in respect of holders who are in the United States or who are U.S. Persons, as set out in the section entitled “Deemed representations at the Conversion Time” in Part VI of this Prospectus. As a result, if you are located within the United States or are a U.S. Person at the Conversion Time, you will be subject to the compulsory transfer provisions as provided in the Articles.

Shareholders in certain jurisdictions may not be eligible to participate in any Redemption Offer and to receive the cash proceeds thereof

The securities laws of certain jurisdictions, including the United States, restrict the Company’s ability to allow Shareholders to participate in any Redemption Offer. There can be no assurance that the Company will be able to conduct any Redemption Offer in a manner that would enable participation therein or receipt of the cash proceeds thereof by Shareholders in such jurisdictions. Shareholders who have a registered address in or who are resident or located in (as applicable) the United States and in certain countries other than the United Kingdom may not be eligible to participate in any Redemption Offer. Shareholders should, moreover, consult their professional advisers as to whether they require any governmental or other consents or need to observe any other formalities to enable them to participate in any Redemption Offer.

In implementing a Redemption Offer, the Company will be required to realise assets when it would not otherwise have done so, which may adversely affect the prices it can obtain for such assets and, therefore, the redemption proceeds receivable by Exiting Shareholders. Furthermore, the Investment Managers will not engage in any currency hedging activity in relation to the assets comprised in the Redemption Pool

If the Company mandatorily implements a Redemption Offer in the circumstances described in “Part I – Discount Control – Redemption Offer”, the Directors will allocate to a Redemption Pool assets of the Company worth in aggregate (as at the NAV Calculation Date immediately preceding the Redemption Date) an amount equal to the Net Asset Value (as at the same date) attributable to the Shares to be redeemed pursuant to such Redemption Offer (less one per cent.). As the Portfolio is expected to consist of

cash as well as loans and bonds, the assets allocated to the Redemption Pool will include both cash and non-cash assets. Any non-cash assets will then be realised by the Investment Managers, and the realisation proceeds distributed to Exiting Shareholders, as soon as reasonably practicable. Such non-cash assets may therefore be realised in circumstances in which the Investment Managers' preference would otherwise have been to retain them, or at times when it is not in the Investment Managers' view possible to achieve an optimal price for such assets. In addition, the Investment Managers will not seek to hedge currency risk between the currencies in which the assets comprised in the Redemption Pool are denominated and the U.S. Dollar or between the U.S. Dollar and the other currencies in which the Shares redeemed pursuant to the Redemption Offer were denominated. Exiting Shareholders will therefore be subject to unhedged currency exposure during the period from the Redemption Date until all of the assets comprised in the Redemption Pool have been realised.

Risks relating to the investment strategy and investment portfolio

The success of the Company depends on the Investment Managers' ability to achieve the Company's investment objective

The success of the Company will depend on the Investment Managers' ability to advise on and manage investments mainly in floating rate senior secured loans issued in U.S. Dollars, Sterling and Euros by primarily North American and European Union corporations, in accordance with the Company's investment objective and policy. There can be no assurance that the Investment Managers will be able to do so or that the Company will be able to generate any investment returns for Shareholders or indeed avoid investment losses.

The value of senior loans may be adversely influenced by a number of factors and early prepayment or default by a borrower may affect the value of the Portfolio

The market value of senior loans may vary because of a number of factors, including, but not limited to, the financial condition of the underlying borrowers, the industry in which a borrower operates, general economic or political conditions, interest rates, the condition of the debt trading markets and certain other financial markets, developments or trends in any particular industry and changes in prevailing interest rates.

Senior loans generally have maturities ranging from five to seven years, but may have a shorter remaining term when purchased in the secondary loan market. Given that many senior loans are repaid early, the actual maturity of senior loans is typically shorter than their stated final maturity calculated solely on the basis of the stated life and repayment schedule. Generally voluntary prepayments are permitted and the timing of prepayments cannot be predicted with any accuracy. The degree to which borrowers prepay senior loans, whether as a contractual requirement or at their election, may be affected by general business conditions, market interest rates, the borrower's financial condition and competitive conditions among lenders. Investments in senior loans are also subject to interest rate risk and reinvestment risk. Prepayments of senior loans held by the Company are likely to be made during any period of declining interest rates. Such prepayments may result in the Company replacing such loans with lower-yielding investments, leading to lower returns on the Portfolio and the Shares.

Senior loans that the Company will invest in are subject to credit, liquidity and interest rate risk. Any senior loan may become a defaulted obligation for a variety of reasons, including non-payment of principal or interest, as well as covenant violations by the borrower in respect of the underlying loan documents. A defaulted loan may become subject to either substantial workout negotiations or restructuring, which may entail, among other things, a substantial reduction in the interest rate, a substantial write-down of principal, and a substantial change in the terms, conditions and covenants with respect to such defaulted loan. In addition, such negotiations or restructuring may be extensive and protracted over time, and therefore may result in substantial uncertainty with respect to the ultimate recovery on such defaulted loan. In addition, substantial costs and resources in such situations may be imposed on the lender, further affecting the value of the loan. The liquidity in defaulted loans may also be limited, and to the extent that defaulted loans are sold, it is highly unlikely that the proceeds from such sale will be equal to the amount of unpaid principal and interest thereon, which would adversely affect the value of the Portfolio and consequently, the Shares.

The Company may acquire different contractual rights depending on the way in which it invests in loans

The contractual rights of the Company, in relation to the loans that it acquires, will depend on the way in which the Company acquires the loans.

It is intended that the Company may acquire interests in loans either (i) directly or (ii) indirectly by way of sub-participation, in relation to both primary and secondary loans.

The contractual rights acquired by the Company may vary considerably. A purchaser by way of transfer or assignment of a loan typically acquires all the rights and obligations of the assigning institution, becomes a lender under the credit agreement with respect to the debt obligation (although its rights can be more restricted than those of the assigning or transferring institution) and has a direct contractual relationship with the borrower. Acquisition of a sub-participation interest in a loan typically results in a contractual relationship only with the lender which is participating out its interest under the loan, rather than with the borrower. On the acquisition of a sub-participation, the Company will generally not have a right to enforce compliance with the terms of the loan agreement against the borrower, and will be reliant on the lender which is participating out its interest under the loan. As a result, the Company will assume credit risk in relation to both the borrower and the entity which is sub-participating its interest under the loan.

The Company may be required to invest in loans using different contractual arrangements and structures, dependent on the laws and regulations of the jurisdiction in which the borrower under the loan is incorporated

The Company may invest in loans in primarily North American jurisdictions and a number of European jurisdictions, and these investments may be subject to different laws and regulation dependent on the jurisdiction in which the borrower under the loan is incorporated. This may mean that, in order to invest in a loan or loans, the Company will be required to adopt particular contractual arrangements and structures in order to satisfy the legal and regulatory requirements of a particular jurisdiction. This may affect the contractual rights acquired by the Company (see the risk factor “The Company may acquire different contractual rights depending on the way in which it invests in loans”).

A credit rating agency’s assessment may not fully reflect the risk of an investment in senior loans

The Investment Managers intend to use credit rating agencies’ assessment of senior loans as part of the due diligence process prior to any investment. Credit ratings of senior loans represent the rating agencies’ opinions regarding the credit quality of a loan and such assessments are not a guarantee of quality. Rating agencies attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value; accordingly, a credit rating of a loan may not fully reflect the true risks of an investment in a loan. Furthermore, rating agencies may fail to make timely changes in credit ratings in response to events that affect an issuer, with the result that an issuer’s current financial condition may be better or worse than a rating indicates. Consequently, credit ratings of bank loans will be used by the Investment Managers only as preliminary indicators of investment quality.

In the event of default under a loan, the Company will bear a risk of loss of principal and accrued interest

In the event of any default on the Company’s investment in a loan by the borrower, the Company will bear a risk of loss of principal and accrued interest on the loan, which could have a material adverse effect on the Company’s investment. In the case of secured loans, foreclosure can be an expensive and lengthy process which could have a material negative effect on the Company’s anticipated return on the foreclosed loan. By way of example, it would not be unusual for any costs of enforcement to be paid out in full before the repayment of interest and principal. This could substantially reduce the Company’s anticipated return on the foreclosed loan.

The level of defaults in the Portfolio and the losses suffered on such defaults may increase in the event of adverse financial or credit market conditions.

Investments made by the Company in bank loans and sub-participations are subject to particular risks

Investments made by the Company in bank loans and sub-participations are subject to a number of unique risks. These include (a) the possible invalidation of an investment transaction as a fraudulent conveyance under relevant creditors' rights laws, (b) so-called lender-liability claims by the borrower (i.e. claims against a lender arising as a result of the exercise or non-exercise of a lender's rights or obligations under a loan agreement, claims arising by virtue of the control exercised by a lender over a borrower's business or other claims), (c) environmental liabilities that may arise with respect to collateral securing the obligations, and (d) limitations on the ability of the Company to enforce its rights directly with respect to sub-participations. There is no guarantee that the Company will be able to successfully defend itself against any claims by third parties in relations to these risks. Successful claims by third parties may adversely affect the Net Asset Value of the Company and the price of the Shares. In addition, in certain European syndicated loan facilities, provisions are sometimes included which grant the borrower the right to replace a participant lender at par. The circumstances in which this right typically arises include non-performance by the participant lender of its obligations or the failure of a lender to provide its consent where a specified proportion of the other lenders have so consented. If such a provision were to be exercised in relation to the Company's rights under a loan in which the Company has invested, the Company's interests in that loan could be brought to an end, which could affect the value of the investments held by the Company by reducing the income that would otherwise have been payable to the Company on that loan.

The value of the investments made by the Company in loans may be affected by fraud or misrepresentation or omission

The value of the investments made by the Company in loans may be affected by fraud, misrepresentation or omission on the part of the borrower to which the loan relates, by parties related to the borrower or by other parties to the loan (or related collateral and security arrangements). Such fraud, misrepresentation or omission may adversely affect the value of the collateral underlying the loan in question or may adversely affect the Company's ability to enforce its contractual rights under the loan or for the borrower of the loan to repay the loan or interest on it or its other debts.

The value of the Company's investments may be subject to jurisdiction-specific insolvency regimes

The value of the investments held by the Company may be impacted by various laws enacted for the protection of creditors in the jurisdictions of incorporation of the obligors thereunder and, if different, the jurisdictions from which the obligors conduct their business and in which they hold their assets, which may adversely affect such obligors' abilities to make payment on a full or timely basis.

In particular, it should be noted that a number of continental European and emerging market jurisdictions operate "debtor-friendly" insolvency regimes which could result in delays in payments where obligations, debtors or assets thereunder are subject to such regimes. The different insolvency regimes applicable in the different European and emerging market jurisdictions result in a corresponding variability of recovery rates for senior loans, high yield bonds and other debt obligations entered into or issued in such jurisdictions.

With regards to the U.S., bankruptcy judges have a broad discretion as to how they deal with the claims of different creditors, and the claims of secured creditors may not, despite their legal entitlement, always be respected as a matter of policy – for example political or social factors may be taken into account in larger or high profile bankruptcies which may adversely affect the ability of the Company to effectively enforce its rights as a secured creditor.

Jurisdiction-specific insolvency regimes may negatively impact borrowers' or issuers' ability to make payments to the Company, or the Company's recovery in a restructuring or insolvency, which may adversely affect the Company's business, financial condition and results of operations.

The Company may be subject to lender liability and equitable subordination

The Company may invest directly in borrowers by making direct loans to issuers. In recent years, a number of judicial decisions have upheld the right of borrowers to sue lending institutions on the basis of various evolving legal theories, collectively referred to as "lender liability". Generally, lender liability is founded on the premise that a lender has either violated a duty, whether implied or contractual, of good faith and fair

dealing owed to the borrower or has assumed a degree of control over the borrower resulting in the creation of a fiduciary duty owed to the borrower or its other creditors or shareholders. The Company may become subject to allegations of lender liability. The Company cannot provide assurance that these claims will not arise or that it will not be subject to significant liability if a claim of this type arises.

In addition, under common law principles, in certain jurisdictions, that in some cases form the basis for lender liability claims, if a lender, (i) intentionally takes an action that results in the undercapitalisation of a borrower to the detriment of other creditors of such borrower; (ii) engages in other inequitable conduct to the detriment of such other creditors; (iii) engages in fraud with respect to, or makes misrepresentations to, such other creditors; or (iv) uses its influence as a shareholder to dominate or control a borrower to the detriment of other creditors of such borrower, a court may elect to subordinate the claim of the offending lender to the claims of the disadvantaged creditor or creditors, a remedy called “equitable subordination”.

As a lender, the Company may be subject to additional liability such as liability resulting from the breach of fiduciary duty or duty of good faith and fair dealing, or its claims may be subject to equitable subordination, which may materially affect the Company’s business, financial condition and results of operations.

The Company may be subject to losses on investments as a result of fraudulent conveyance findings by courts

Various laws enacted for the protection of creditors may apply to certain investments that are debt obligations, although the existence and applicability of such laws will vary from jurisdiction to jurisdiction. For example, if a court were to find that the borrower did not receive fair consideration or reasonably equivalent value for incurring indebtedness evidenced by an investment and the grant of any security interest or other lien securing such investment, and, after giving effect to such indebtedness, the borrower (i) was insolvent, (ii) was engaged in a business for which the assets remaining in such borrower constituted unreasonably small capital, or (iii) intended to incur, or believed that it would incur, debts beyond its ability to pay such debts as they mature, such court may invalidate such indebtedness and such security interest or other lien as a fraudulent conveyance, subordinate such indebtedness to existing or future creditors of the borrower or recover amounts previously paid by the borrower (including to the Company) in satisfaction of such indebtedness or proceeds of such security interest or other lien previously applied in satisfaction of such indebtedness. In addition, if an issuer in which the Company has an investment becomes insolvent, any payment made on such investment may be subject to cancellation as a “preference” if made within a certain period of time (which may be as long as one year) before insolvency.

In general, if payments on an investment are voidable, whether as fraudulent conveyances or preferences, such payments can be recaptured either from the initial recipient or from subsequent transferees of such payments. To the extent that any such payments are recaptured from the Company, the resulting loss will be borne by the investors in the Company.

The Company’s hedging arrangements may not be successful

The Company’s economic risks cannot be effectively hedged. However, in connection with the financing of certain investments, the Company may employ hedging techniques designed to reduce the risks of adverse movements in interest rates, securities prices and/or currency exchange rates. While such transactions may reduce certain risks, they create others.

The Company may utilise certain derivative instruments (such as using single-name credit default swaps, credit default swap and loan credit default swap indexes, equity futures and equity indexes) for hedging purposes. However, even if used primarily for hedging purposes, the price of derivative instruments is highly volatile, and acquiring or selling such instruments involves certain leveraged and unusual risks. The low initial margin deposits normally required to establish a position in such instruments permits an unusually high degree of leverage. As a result, a relatively small movement in the price of a contract may result in substantial losses to the Company (which may not be offset by increases in the value of the instrument being hedged). There may be an imperfect correlation between the instrument acquired for hedging purposes and the investments or market sectors being hedged, in which case, a speculative element is added to the highly leveraged position acquired through a derivative instrument primarily for hedging purposes.

The Company may benefit from the use of these hedging strategies; however, such strategies may also result in losses and overall poorer performance than if the Company had not entered into such hedging transactions.

Risks relating to the Company's collateral

The collateral and security arrangements under a loan in which the Company has invested may not have been properly created or perfected, or may be subject to other legal or regulatory restrictions

Whilst the Company will invest in senior secured loans, the collateral and security arrangements in relation to such loans will be subject to such security or collateral having been correctly created and perfected and any applicable legal or regulatory requirements which may restrict the giving of collateral or security by a borrower under a loan, such as, for example, thin capitalisation, over-indebtedness, financial assistance and corporate benefit requirements. If the loans in which the Company invests do not benefit from the expected collateral or security arrangements this may affect the value of the investments made by the Company.

The Company's investments will be based in part on valuations of collateral which are subject to assumptions and factors that may be incomplete, inherently uncertain or subject to change

A component of the Investment Managers' analysis of the desirability of making a given investment relates to the estimated residual or recovery value of such investments in the event of the insolvency of the borrower or issuer. This residual or recovery value will be driven primarily by the value of the underlying assets constituting the collateral for such investment. The value of collateral can, however, be extremely difficult to predict as in certain circumstances market quotations and third party pricing information may not be available.

Risks relating to the Investment Managers

The Company is dependent on the expertise of the Investment Managers and their key personnel properly to evaluate attractive investment opportunities and to implement its investment strategy

In accordance with the Investment Management Agreement and the Sub-Investment Management Agreement, the Investment Managers are responsible for the management of the Company's investments. The Company does not have employees and its Directors are appointed on a non-executive basis. All of its investment and asset management decisions will be made by the Investment Managers and not by the Company and accordingly, the Company will be completely reliant upon, and its success will depend exclusively on, the Investment Managers and their personnel, services and resources. The Investment Managers are not required to and generally will not submit individual investment decisions for approval to the Board.

Consequently, the future ability of the Company to successfully pursue its investment policy may depend on the ability of the Investment Managers to retain their existing staff and / or to recruit individuals of similar experience and calibre. Whilst the Investment Managers have endeavoured to ensure that the principal members of their management teams are suitably incentivised, the retention of key members of the teams cannot be guaranteed. Furthermore, in the event of a departure of a key employee of the Investment Managers, there is no guarantee that the Investment Managers would be able to recruit a suitable replacement or that any delay in doing so would not adversely affect the performance of the Company. Events impacting but not entirely within the Company's and the Investment Managers' control, such as its financial performance, its being acquired or making acquisitions or changes to its internal policies and structures could in turn affect their ability to retain key personnel.

The Investment Managers' strategy is resource and time-intensive. If the Investment Managers are unable to allocate the appropriate time or resources to the Company's investments, the Company may be unable to achieve its investment objective. In addition, the Investment Management Agreement and Sub-Investment Management Agreement do not require the Investment Managers to dedicate specific personnel to the Company or to require personnel servicing the Company's business to allocate a specific amount of time to the Company.

The Company is also subject to the risk that the Investment Management Agreement may be terminated and that no suitable replacement will be found to manage the Company. If the Investment Management Agreement is terminated and a suitable replacement is not secured in a timely manner or key personnel of

the Investment Managers are not available to the Company with an appropriate time commitment, the ability of the Company to execute its investment strategy or achieve its investment objective may be adversely affected.

The obligations of the Investment Managers are not guaranteed by any other person.

The due diligence process that the Investment Manager plans to undertake in evaluating specific investment opportunities for the Company may not reveal all facts that may be relevant in connection with such investment opportunities and any corporate mismanagement, fraud or accounting irregularities may materially affect the integrity of the Investment Managers' due diligence on investment opportunities

When conducting due diligence and making an assessment regarding an investment, the Investment Managers will be required to rely on resources available to them, including internal sources of information as well as information provided by existing and potential borrowers, any equity sponsor(s), lenders and other independent sources. The due diligence process may at times be required to rely on limited or incomplete information particularly with respect to newly established companies for which only limited information may be available.

In addition, the Investment Managers will select investments for the Company in part on the basis of information and data relating to potential investments filed with various government regulators and publicly available or made directly available to the Investment Managers by such issuers or third parties. Although the Investment Managers will evaluate all such information and data and seek independent corroboration when it considers it appropriate and reasonably available, the Investment Managers will not be in a position to confirm the completeness, genuineness or accuracy of such information and data. The Investment Managers are dependent upon the integrity of the management of the entities filing such information and of such third parties as well as the financial reporting process in general. Recent events have demonstrated the material losses that investors such as the Company can incur as a result of corporate mismanagement, fraud and accounting irregularities.

In addition, investment analyses and decisions by the Investment Managers may be undertaken on an expedited basis in order to make it possible for the Company to take advantage of short-lived investment opportunities. In such cases, the available information at the time of an investment decision may be limited, inaccurate and/or incomplete. Furthermore, the Investment Managers are unlikely to have sufficient time to evaluate fully such information even if it is available.

Accordingly, due to a number of factors, the Company cannot guarantee that the due diligence investigation it carries out with respect to any investment opportunity will reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Any failure by the Company to identify relevant facts through the due diligence process may cause it to make inappropriate investment decisions, which may have a material adverse effect on the Company's business, financial condition, results of operations or the value of the Shares.

Due diligence may also be costly, which will decrease the Company's overall profits from an investment.

The Investment Managers will source all of the Company's investments and Affiliates of the Investment Managers may participate in some of those investments, which may result in conflicts of interest

The Company is subject to a number of actual or potential conflicts of interest involving the Investment Managers and their respective affiliates, which are summarised below.

The Investment Managers and/or companies with which they are associated may from time to time act as manager, sponsor, investment manager, trustee, custodian, sub-custodian, registrar, broker, administrator, investment advisor or dealer in relation to, or be otherwise involved with, other clients, including other investment funds and client accounts, including those which follow an investment programme substantially similar to that of the Company (such other clients, funds and accounts, collectively the "**Other Accounts**"). The Company will not have an interest in these Other Accounts. Conflicts of interest among the Company and these Other Accounts may exist, which include, but are not limited to, those described herein. These Other Accounts may have investment objectives that are similar to, or overlap to a greater or lesser extent, with those of the Company as well as investment guidelines that differ from those applicable to the Company's investments. The Investment Managers may determine that an investment opportunity in the

Company is appropriate for an Other Account but not for the Company or that the allocation to the Company should be of a different proportion than that of an Other Account.

It is the policy of the Investment Managers to allocate investment opportunities fairly and equitably among the Company and Other Accounts, where applicable, to the extent possible over a period of time. The Investment Managers, however, will have no obligation to purchase, sell or exchange any investment for the Company which the Investment Managers may purchase, sell or exchange for one or more Other Accounts if the Investment Managers believe in good faith at the time the investment decision is made that such transaction or investment would be unsuitable, impractical or undesirable for the Company. As a general policy, investment opportunities will be allocated among those accounts for which participation in the respective opportunity is considered appropriate *pro rata* based on the relative capital size of the accounts. In addition, the Investment Managers may also take into consideration other factors such as the investment programmes of the accounts, tax consequences, legal or regulatory restrictions, including those that may arise in various different international jurisdictions, the relative historical participation of an account in the investment, the difficulty of liquidating an investment for more than one account, new accounts with a substantial amount of investable cash and such other factors considered relevant. Such considerations may result in allocations among the Company and one or more Other Accounts on other than a *pari passu* basis (which may result in different performances among them).

The Investment Managers and their officers and employees will devote as much of their time to the activities of the Company as they deem necessary and appropriate. The Investment Managers and their affiliates are not restricted from forming additional investment funds, from entering into other investment advisory relationships or from engaging in other business activities, even though such activities may be in competition with the Company and/or may involve substantial time and resources. These activities may be viewed as creating a conflict of interest in that the time and effort of the Investment Managers and their officers and employees will not be devoted exclusively to the business of the Company but will be allocated between the business of the Company and such other activities. Future activities by the Investment Managers and their affiliates, including the establishment of other investment funds, may give rise to additional conflicts of interest.

NB Affiliates are actively engaged in transactions in the same securities, currencies and instruments in which the assets of the Company may be invested. Subject to applicable law, NB Affiliates may purchase or sell securities of, or otherwise invest in or finance, issuers in which the Company has an interest. NB Affiliates also may manage or advise other accounts or investment funds that have investment objectives similar or dissimilar to those of the Company and which engage in transactions in the same type of securities, currencies and instruments as the Company. Trading activities of NB Affiliates are carried out without reference to positions held directly or indirectly by the Company and may have an effect on the value of the positions so held or may result in NB Affiliates having an interest adverse to that of the Company. NB Affiliates are not under any obligation to share any investment opportunity, idea or strategy or other relevant information about an investment with the Company or a portfolio manager and/or may not be able to share such information with the Investment Managers because of informational walls, confidentiality obligations or other disclosure constraints. As a result, NB Affiliates may compete with the Company for appropriate investment opportunities.

The Investment Managers may be prevented from taking control positions in certain issuers, or positions adverse to their management, due to other business commitments and relationships of Neuberger Berman Group or decisions of its management. In such cases, the Investment Managers will be compelled to act other than in the best interests of the Company due to conflicts of interest with the Neuberger Berman Group organisation, which may adversely affect the Company's ability to achieve its investment objective.

The Directors are also required by the Registered Collective Investment Scheme Rules 2008 to take all reasonable steps to ensure that there is no breach of any of the conflict of interest requirements in those Rules.

The Investment Managers (or other NB Affiliates) may manage the assets of Other Accounts that provide the Investment Managers (or other NB Affiliates) with discretion to allocate such assets among various investment strategies through separate accounts or other pooled investment vehicles managed by the Investment Managers, including the Company. In these instances, the Investment Managers (or other NB Affiliates) will, from time to time, exercise their full discretion to determine investment strategies to which such assets should be allocated and the amount of each such allocation, subject to any applicable investment guidelines. In addition to making an initial allocation among strategies, the Investment Managers (or other NB Affiliates) are typically vested with discretion to rebalance, adjust or make different allocations for such assets, from time to time, solely in their discretion, as market conditions or the requirements of the

Other Accounts dictate. Therefore, the investments of such Other Accounts that invest in the Company, if applicable, generally will be directed by the Investment Managers (or other NB Affiliates), and the Investment Managers (or other NB Affiliates) could either buy or sell Shares in the secondary market or, subject to applicable law, participate in any redemption or buyback of Shares implemented by the Company. The Investment Managers have no duty or responsibility to inform or advise any other Shareholder in the Company to undertake the same or similar action with respect to their own investments. Each investor in the Company is responsible for making its own decision as to selling or buying Shares or, subject to applicable law, participating in any redemption or buyback of Shares implemented by the Company.

Access to material non-public information may restrict the ability of the Investment Managers to take action with respect to some investments

The Investment Managers have established policies and procedures reasonably designed to prevent the misuse by the Investment Managers and their personnel of material information regarding particular issuers that has not been publicly disseminated (“material non-public information”) in accordance with applicable legal and regulatory requirements. In general, under such policies and procedures and applicable law, when the Investment Managers are in possession of material non-public information related to a publicly-traded security or the issuer of such security, whether acquired unintentionally or otherwise, neither the Investment Managers nor their personnel are permitted to render investment advice as to, or otherwise trade or recommend a trade in, the securities of such issuer until such time as the information that the Investment Manager has is no longer deemed to be material non-public information.

The Investment Managers have procedures that outline the process by which it will determine whether to elect to receive material non-public information, or whether it will determine not to receive material non-public information, in any given case. This determination will be made on an issuer-by-issuer basis using objective criteria established by the Investment Managers. It should be noted that the Investment Managers’ determination regarding whether or not to receive material non-public information regarding a specific issuer may have implications for the services the Investment Managers are able to provide to certain clients in certain situations, including the Company.

For example, where the Investment Managers have determined to receive material non-public information regarding an issuer or a borrower in connection with its clients’ potential investments in loan assets of such issuer, it will be prohibited from rendering investment advice to clients, including the Company, regarding the public securities of such issuer, thereby potentially limiting the universe of public securities that the Investment Managers may purchase or potentially limiting the ability of the Investment Managers to sell particular securities. Similarly, where the Investment Managers decline access to (or otherwise do not receive) material non-public information regarding an issuer, they may base their investment decisions for their clients, including the Company, with respect to the loan assets of such issuer solely on public information, thereby limiting the amount of information available to them in connection with such investment decisions.

U.S. restrictions on the use of material non-public information are often materially more stringent than those in other jurisdictions. The Investment Managers will be subject to these U.S. restrictions even if the investments in the Company are made by non-U.S. persons. The Investment Managers may determine not to elect to receive any material non-public information.

In deciding whether to accept material non-public information in distressed debt situations, the Investment Managers will need to weigh (i) the risks of being “frozen” in a position due to the receipt of material non-public information against (ii) the profit potential of the investment. In making its determinations whether or not to elect to receive material non-public information, the Investment Managers will endeavour to act fairly to their clients as a whole. A miscalculation of the risk by the Investment Managers may lead to major losses which the Investment Managers are unable to control and which may adversely affect the Company’s business, financial condition, results of operations and the price of the Shares.

Risks relating to regulation and taxation

Greater regulation of the financial services industry, which imposes additional restrictions on the Company may materially affect the Company's business and its ability to carry out its investment objective

Legislation proposing greater regulation of the financial services industry, is being actively pursued by the U.S. Congress (including the recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act 2010), as well as the governing bodies of non-U.S. jurisdictions, in the wake of the ongoing financial crisis and the dramatic losses incurred both by private funds and their counterparties from trading in substantially unregulated markets. The U.S. government "bailout" of financial institutions that began in 2008 is the largest governmental intervention in the history of the U.S. financial markets. In connection with this "bailout," U.S. Congress has applied new restrictions to the U.S. financial markets. Similar government "bailouts" of financial institutions by both individual member states and the European Union has also increased the scrutiny on the financial services industry in Europe and may lead to further regulation of the financial markets.

There can be no assurance that future regulatory action will not result in additional market dislocation. It is impossible to predict the nature, timing and scope of future changes in laws and regulations applicable to the Company, the Investment Managers, the markets in which they trade and invest or the counterparties with which they do business. Any such changes in laws and regulations may have a material adverse effect on the ability of the Company to carry out its business, to successfully pursue its investment policy and to realise its profit potential, and may include a requirement of increased transparency as to the identity of investors in the Company. Any such event may materially adversely affect the investment returns of the Company.

Changes in the Company's tax status or tax treatment may adversely affect the Company and if the Company becomes subject to the UK offshore fund rules there may be adverse tax consequences for certain UK resident Shareholders

Any change in the Company's tax status, or in taxation legislation or practice in either Guernsey, the United States or the United Kingdom or any other jurisdiction in which borrowers are held to be resident, or in the Company's tax treatment (for example, due to the disposition of equity accepted in settlement for debt) may affect the value of the investments held by the Company or the Company's ability to successfully pursue and achieve its investment objectives, or alter the after-tax returns to Shareholders. Statements in this Prospectus concerning the taxation of Shareholders are based upon current United Kingdom, United States and Guernsey tax law and published practice, any aspect of which law and practice is, in principle, subject to change (potentially with retrospective effect) that may adversely affect the ability of the Company to successfully pursue its investment policy or meet its investment objective, and which may adversely affect the taxation of Shareholders.

Statements in this Prospectus in particular take into account legislation introduced by the Finance Act 2009, which provides for a new definition of "offshore fund" for the purposes of the United Kingdom offshore fund rules and which took effect from 1 December 2009. Should the Company or any class of Shares be regarded as being subject to the offshore fund rules this may have adverse tax consequences for certain UK resident shareholders.

Potential investors are urged to consult their tax advisers with respect to their particular tax situations and the tax effect of an investment in the Company.

Failure by the Company to maintain its non-UK tax resident status may subject the Company to additional taxes which may materially adversely affect the Company's business, results of operations and the value of the Shares

In order to maintain its non-UK tax resident status, the Company is required to be controlled and managed outside the United Kingdom. The composition of the board of Directors of the Company, the place of residence of the individual Directors and the location(s) in which the board of Directors of the Company makes decisions will be important in determining and maintaining the non-UK tax resident status of the Company. Although the Company is established outside the United Kingdom and a majority of the Directors live outside the United Kingdom, continued attention must be given to ensure that major

decisions are not made in the United Kingdom or the Company may lose its non-UK tax resident status. As such, management errors may potentially lead to the Company being considered UK tax resident which may adversely affect the Company's financial condition, results of operations, the value of the Shares and/or the after-tax return to the Shareholders.

Individual Shareholders may have conflicting investment, tax and other interests with respect to their investments in the Company

Shareholders are expected to include taxable and tax-exempt entities and persons or entities organised and residing in various jurisdictions who may have conflicting investment, tax and other interests with respect to their investments in the Company. The conflicting interests of individual Shareholders may relate to or arise from, among other things, the nature of investments made by the Company, the structuring of the acquisition of investments, the timing of disposition of investments and the manner in which income and capital generated by the Company is distributed to Shareholders. The structuring of investments and distributions may result in different returns being realised by different Shareholders. As a consequence, conflicts of interest may arise in connection with decisions made by the Investment Managers, including the selection of borrowers, which may be more beneficial for one investor than for another investor, especially with respect to investors' individual situations. In selecting and structuring investments appropriate for the Company and in determining the manner in which distributions shall be made to Shareholders, the Investment Managers and the Directors, respectively, will consider the investment and tax objectives of the Company and Shareholders as a whole, not the investment, tax or other objectives of any Shareholder individually, which may adversely affect the investment returns of individual Shareholders.

Certain payments of (or attributable to) U.S.-source income and the proceeds of sales of property that give rise to U.S.-source interest and dividends paid to the Company, will in future be subject to 30 per cent. withholding tax unless the Company agrees to certain reporting and withholding requirements and certain Shareholders may themselves be subject to such withholding tax if they do not provide the Company with required information

The Foreign Account Tax Compliance Act ("FATCA") was enacted by the United States Congress in March 2010 and will come into effect in 2013 (although implementation will be staggered). Pursuant to FATCA, the Company will be classified as a "foreign financial institution". If, however, shares in the Company are considered "regularly traded on an established securities market", as defined under the final FATCA regulations, Shareholders would not be regarded as holding "financial accounts" in the Company. Although the London Stock Exchange is an established securities market, it is unclear whether the C Shares will be considered regularly traded as this is a factual determination made annually.

The Company will be required, in order to be compliant for FATCA purposes, to file a FATCA agreement with the IRS, under which the Company may be required to obtain information about its Shareholders and to disclose information about its Shareholders to the IRS (if Shareholders are treated under FATCA as holders of "financial accounts" in the Company). Alternatively, the United States proposes to enter into Intergovernmental Agreements by which foreign financial institutions can comply with FATCA by reporting relevant information to their domestic tax authority. The Channel Islands announced on 9 October 2012 that they were each entering into discussions with the United States with a view to signing such Intergovernmental Agreements.

The Company would also be deemed to be compliant with the FATCA legislation if the Investment Managers or other sponsor performed the Company's obligations under FATCA on its behalf and certain other requirements were met.

Failure by the Company to file such an agreement with the IRS, or fall within such 'deemed' compliant categories, could mean that the Company would become subject to a 30 per cent. withholding tax on certain US source payments to the Company.

Additionally, if the Company were to enter into such an agreement with the IRS, the Company may be compelled under FATCA to withhold tax on payments it makes to Shareholders that do not provide information as to their FATCA status or which are themselves non-compliant "foreign financial institutions".

Further, even if the Company is not characterised under FATCA as a “foreign financial institution”, it nevertheless may become subject to such 30 per cent. withholding tax on certain US source payments to it unless it either provides information to withholding agents with respect to its “substantial US owners” or certifies that it has no such “substantial US owners”. As a result, Shareholders may be required to provide any information that the Company determines necessary to avoid the imposition of such withholding tax or in order to allow the Company to satisfy such obligations.

The AIFM Directive may impair the ability of the Investment Managers to manage the investments of the Company, which may materially adversely affect the Company’s ability to implement its investment strategy and achieve its investment objective

The AIFM Directive, which is due to be transposed by EU Member States into national law in 2013, seeks to regulate alternative investment fund managers (in this paragraph, “**AIFM**”) based in the EU and prohibits such managers from managing any alternative investment fund (in this paragraph, “**AIF**”) or marketing shares in such funds to EU investors unless authorisation is granted to the AIFM. In order to obtain such authorisation, and be able to manage the AIF, an AIFM will need to comply with various obligations in relation to the AIF, which may create significant additional compliance costs that may be passed to investors in the AIF.

The AIFM Directive may require the Investment Managers to seek authorisation to manage the Company and/or for the country of domicile of the Investment Managers to meet certain requirements. If the Investment Managers were to fail to, or be unable to, obtain such authorisation or if their country of domicile were not to meet such requirements, they may be unable to continue to manage the Company or their ability to manage the Company may be impaired.

Following national transposition of the AIFM Directive in a given EU Member State, the marketing of shares in AIFs that are established outside the EU to investors in that EU Member State shall be prohibited unless certain conditions are met. Certain of these conditions are outside the Company’s control as they are dependent on the regulators of the relevant third country and Member State entering into agreements with one another and so the Company cannot guarantee that such conditions will be satisfied. In cases where the conditions are not satisfied, the ability of the Company to market shares or raise further equity capital in the EU may be limited or removed.

Any regulatory changes arising from implementation of the AIFM Directive (or otherwise) that impair the ability of the Investment Managers to manage the investments of the Company, or limit the Company’s ability to market future issuances of its Shares, may materially adversely affect the Company’s ability to carry out its investment strategy and achieve its investment objective.

Further information regarding the Sub-Investment Manager is contained in Part II of its Form ADV, which will be provided to prospective investors, upon written request to the Sub-Investment Manager, prior to their investment in the Company. Restrictions on Distribution and Sale

The distribution of this Prospectus and the offering and sale of securities offered hereby in certain jurisdictions may be restricted by law. Persons in possession of this Prospectus are required to inform themselves about and observe any such restrictions. This Prospectus may not be used for, or in connection with, and does not constitute, any offer to sell, or solicitation to purchase, any such securities in any jurisdiction in which solicitation would be unlawful. Moreover, this Prospectus should not be distributed or forwarded into or within the United States or to U.S. Persons.

For a description of restrictions on offers, sales and transfers of Shares, see “Selling restrictions” on page 35 and “Purchase and transfer restrictions” on page 100.

In addition, prospective investors should note that, except with the express written consent of the Company given in respect of an investment in the Company, the Issue Shares may not be acquired by (i) investors using assets of (A) an “employee benefit plan” as defined in Section 3(3) of ERISA that is subject to Title I of ERISA; (B) a “plan” as defined in Section 4975 of the U.S. Tax Code, including an individual retirement account or other arrangement that is subject to Section 4975 of the U.S. Tax Code; or (C) an entity whose underlying assets are considered to include “plan assets” by reason of investment by an “employee benefit plan” or “plan” described in preceding clause (A) or (B) in such entity pursuant to the U.S. Plan Asset Regulations or (ii) a governmental, church, non-U.S. or other employee benefit plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Title I of ERISA or Section 4975 of the U.S. Tax Code and its purchase, holding, and disposition of the Issue Shares will not constitute or result in a non-exempt violation of any such substantially similar law.

If 25 per cent. or more of any class of equity in the Company is owned, directly or indirectly, by U.S. Plan Investors that are subject to Title I of ERISA or Section 4975 of the U.S. Tax Code, the assets of the Company will be deemed to be “plan assets”, subject to the constraints of ERISA and Section 4975 of the U.S. Tax Code. This would result, among other things, in: (i) the application of the prudence and fiduciary responsibilities standards of ERISA to investments made by the Company, and (ii) the possibility that certain transactions that the Company and its subsidiaries might enter into, or may have entered into in the ordinary course of business, might constitute or result in non-exempt prohibited transactions under Section 406 of ERISA and/or Section 4975 of the U.S. Tax Code and might have to be rescinded. A non-exempt prohibited transaction may also result in the imposition of an excise tax under the U.S. Tax Code upon a “party in interest” (as defined in ERISA) or “disqualified person” (as defined in the U.S. Tax Code), with whom a plan engages in the transaction. The Company will use commercially reasonable efforts to limit ownership by U.S. Plan Investors of equity in the Company. However, no assurance can be given that investment by U.S. Plan Investors will not exceed 25 per cent. or more of any class of equity in the Company.

No Incorporation of Website

The contents of the Company’s website at www.nbgfrif.com do not form part of this Prospectus. Investors should base their decision to invest on the contents of this Prospectus alone and should consult their professional advisers prior to making an application to subscribe for Issue Shares.

Forward-looking Statements

This Prospectus includes statements that are, or may be deemed to be, “forward-looking statements”. These forward-looking statements can be identified by the use of forward-looking terminology, including the terms “believes”, “estimates”, “anticipates”, “expects”, “intends”, “may”, “will” or “should” or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this Prospectus and include statements regarding the intentions, beliefs or current expectations of the Company concerning, amongst other things, the investment objectives and investment policy, financing strategies, investment performance, results of operations, financial condition, prospects, and dividend policy of the Company and the markets in which it, and its portfolio of investments, invest and/or operate. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance. The Company’s actual investment performance, results of operations, financial condition, dividend policy and the development of its financing strategies may differ materially from the impression created by the forward-looking statements contained in this Prospectus. In addition, even if the investment performance, results of operations, financial condition of the Company, and the development of its financing

strategies, are consistent with the forward-looking statements contained in this Prospectus, those results or developments may not be indicative of results or developments in subsequent periods. Important factors that could cause these differences include, but are not limited to:

- changes in economic conditions generally and the Company's ability to achieve its investment objective and returns on equity for investors;
- the Company's ability to invest the cash on its balance sheet and the proceeds of the Issue in suitable investments on a timely basis;
- foreign exchange mismatches with respect to exposed assets;
- changes in interest rates and/or credit spreads, as well as the success of the Company's investment strategy in relation to such changes and the management of the uninvested proceeds of the Issue;
- impairments in the value of the Company's investments;
- the availability and cost of capital for future investments;
- the departure of key personnel employed by the Investment Managers;
- the failure of the Investment Managers to perform their obligations under the Investment Management Agreement with the Company or the termination of the Investment Manager;
- the failure of the Sub-Investment Manager to perform its obligations under the Sub-Investment Management Agreement with the Investment Managers or the termination of the Sub-Investment Manager;
- changes in laws or regulations, including tax laws, or new interpretations or applications of laws and regulations, that are applicable to the Company or borrowers; and
- general economic trends and other external factors, including those resulting from war, incidents of terrorism or responses to such events.

Given these uncertainties, prospective investors are cautioned not to place any undue reliance on such forward-looking statements. Prospective investors should carefully review the "Risk Factors" section of this Prospectus for a discussion of additional factors that could cause the Company's actual results to differ materially before making an investment decision. Forward-looking statements speak only as at the date of this Prospectus. Although the Company and the Investment Managers undertake no obligation to revise or update any forward looking statements contained herein (save where required by the Listing Rules, Prospectus Rules or Disclosure Rules and Transparency Rules), whether as a result of new information, future events, conditions or circumstances, any change in the Company's or the Investment Managers' expectations with regard thereto or otherwise, Shareholders are advised to consult any communications made directly to them by the Company and/or any additional disclosures through announcements that the Company may make through an RIS.

Credit Rating Agencies

The credit rating agencies referred to in this Prospectus are registered under the Credit Rating Agencies Regulation (EC Regulation 1060/2009).

The distribution of this Prospectus and the offering of Issue Shares in certain jurisdictions may be restricted. Accordingly, persons into whose possession this Prospectus comes are required to inform themselves about and observe any restrictions as to the offer or sale of Issue Shares and the distribution of this Prospectus under the laws and regulations of any jurisdiction in connection with any applications for Issue Shares, including obtaining any requisite governmental or other consent and observing any other formality prescribed in such jurisdiction. Save for the UK, no action has been taken or will be taken in any jurisdiction by the Company that would permit a public offering of Issue Shares in any jurisdiction where action for that purpose is required, nor has any such action been taken with respect to the possession or distribution of this Prospectus other than in any jurisdiction where action for that purpose is required.

In relation to each member state of the European Economic Area which has implemented the Prospectus Directive (each, a “**Relevant Member State**”), no Shares have been offered or will be offered pursuant to the Offer to the public in that Relevant Member State prior to the publication of a Prospectus in relation to the Issue Shares which has been approved by the competent authority in that Relevant Member State, or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, all in accordance with the Prospectus Directive, except that offers of Issue Shares to the public may be made at any time under the following exemptions under the Prospectus Directive, if they are implemented in that Relevant Member State:

- to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- to fewer than 100, or, if the Relevant Member State has implemented the relevant provision of the 2010 PD Amending Directive, 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive) in such Relevant Member State; or
- in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Issue Shares shall result in a requirement for the publication of a Prospectus pursuant to Article 3 of the Prospectus Directive or any measure implementing the Prospectus Directive in a Relevant Member State and each person who initially acquires any Issue Shares or to whom any offer is made under the Offer will be deemed to have represented, acknowledged and agreed that it is a “qualified investor” within the meaning of Article 2(1)(e) of the Prospectus Directive.

For the purposes of this provision, the expression an “offer to the public” in relation to any offer of Shares in any Relevant Member State means a communication in any form and by any means presenting sufficient information on the terms of the offer and any Issue Shares to be offered so as to enable an investor to decide to purchase or subscribe for the Issue Shares, as the same may be varied in that Relevant Member State by any measure implementing the Prospectus Directive in that Relevant Member State and the expression “Prospectus Directive” means Directive 2003/71/EC (and the amendments thereto, including Directive 2010/ 73/EU (the “2010 PD Amending Directive”), to the extent implemented in the Relevant Member State and includes any relevant implementing measure in each Relevant Member State.

This Prospectus may not be used for, or in connection with, and does not constitute, any offer of Issue Shares or an invitation to purchase or subscribe for Issue Shares in any Relevant Member State or jurisdiction in which such an offer or invitation would be unlawful.

Part I: Information on the Company

Introduction

The Company is a non-cellular company limited by shares registered and incorporated in Guernsey under the Companies Law on 10 March 2011, with registration number 53155. It was admitted to the Official List with a Premium Listing and to trading on the Main Market of the London Stock Exchange on 20 April 2011. The Company is managed by Neuberger Berman Europe Limited, an indirect wholly-owned subsidiary of NB Group. The Investment Manager has delegated certain of its responsibilities and functions to the sub-investment manager, Neuberger Berman Fixed Income LLC, also an indirect wholly-owned subsidiary of NB Group.

Further information in relation to the Investment Manager, Sub-Investment Manager and NB Group is set out in Part IV of this Prospectus.

The Company's share capital consists of Ordinary Shares denominated in U.S. Dollars and Sterling and classified as U.S. Dollar Shares and Sterling Shares. In September 2011, the Company issued C Shares denominated in U.S. Dollars and Sterling pursuant to the Secondary Issue, which were subsequently converted into Ordinary Shares in January 2012. The Company is now looking to issue further Sterling C Shares.

In addition to the Ordinary Shares, following the Issue, the Company's share capital will also consist of C Shares denominated in Sterling and classified as Sterling C Shares, subject to a minimum amount being raised pursuant to the Issue at the discretion of the Directors and compliance with the requirements of the Listing Rules. The Company may issue further classes of Shares from time to time denominated in such other currencies as the Board considers appropriate.

At any general meeting of the Company, each U.S. Dollar Share carries 1 vote and each Sterling Share carries 1.6 votes (see paragraph 6 in Part IX of this Prospectus for more information). The Ordinary Shares also carry rights to receive all income and capital attributable to the Ordinary Shares which may be distributed by the Company. The rights of the Ordinary Shares of each class with respect to any such distribution and on a winding-up or other return of capital attributable to the Ordinary Shares (other than a redemption or repurchase of Ordinary Shares by the Company) shall be in proportion to the relative Net Asset Values of each class. The C Shares will carry no rights to vote at general meetings of the Company (save in certain limited circumstances). See Part VI of this Prospectus for more information on the C Shares.

Investment in the Company is only suitable for institutional, professional and high net worth investors, private client fund managers and brokers and other investors who understand the risks involved in investing in the Company and/or who have received advice from their fund manager or broker regarding investment in the Company.

Applications will be made to each of the UK Listing Authority and the London Stock Exchange, respectively, for all of the Issue Shares to be admitted to listing on the standard segment of the Official List and to trading on the Main Market. It is expected that Admission will become effective and that dealings in such Issue Shares will commence at 0800 hours on 26 March 2013.

General Meeting

The Directors intend to convene an EGM in advance of Admission to approve certain matters in connection with the Issue, including:

- (a) disapplication of pre-emption rights in respect of the issue of C Shares pursuant to the Issue; and
- (b) approval of the issue of C Shares to certain existing and former Shareholders (the "**Related Parties**").

Neuberger Berman High Yield Bond Fund has held over 10 per cent. of the Ordinary Shares in the period of 12 months immediately preceding the date of this Prospectus. Blackrock, Inc. holds over 10 per cent of the Ordinary Shares. The issue of any C Shares to the Related Parties therefore requires shareholder approval as related party transactions pursuant to the Listing Rules prior to completion of the Issue.

The Issue is conditional upon the Shareholders approving resolution (a) above at the EGM.

Background to and rationale for the Issue

The Secondary Issue Net Proceeds were fully invested in accordance with the anticipated time for full investment set out in the Secondary Issue Prospectus and the C Shares issued pursuant to the Secondary Issue were fully converted into Ordinary Shares in January 2012. The Company was subsequently admitted to the FTSE 250 in March 2012. As at 12 February 2013, the portfolio was invested in 167 investments across 130 issuers. The portfolio is diversified across 31 industries including: health care, business equipment and services, financial intermediaries, electronics/electrical, retailers (except food and drug), lodging and casinos, chemicals and plastics, radio and television and industrial equipment.

The Board, as advised by the Investment Managers, continues to be positive about the prospects for the bank loan market. In the Investment Managers' view, fundamentals remain strong as corporate earnings are sufficiently strong for most issuers to generate free cash flow and reduce debt. In their opinion, the accommodating monetary policy of global central banks seems likely to continue to drive investors to invest in high yield income-generating assets in an attempt to increase their returns in a low interest rate environment. The Investment Managers believe that the bank loan asset class is likely to benefit in this environment, particularly given it combines the benefits of attractive current yields and relatively shorter maturity terms.

There has been considerable interest in the Company both from existing Shareholders and other investors. The Directors consider there to be a number of potential benefits to Shareholders by issuing C Shares and increasing the Company's capital available to make further investments. The Company is therefore targeting an issue in excess of £100,000,000 worth of C Shares pursuant to the Issue.

The Net Issue Proceeds will not be known until after the Issue and will be dependent on investor demand. On the basis that the Company issues £100,000,000 of C Shares, the Net Issue Proceeds would be £98,000,000 (assuming that the expenses of the Issue will be equal to 2 per cent of the Gross Issue Proceeds).

On the basis that the Company issues £500,000,000 of C Shares (the maximum amount that the Company may raise pursuant to the Issue), the Net Issue Proceeds would be £490,000,000 (assuming that the expenses of the Issue will be equal to 2 per cent of the Gross Issue Proceeds).

On the basis that the Company issues £1,000,000 of C Shares (the minimum amount that the Company will raise pursuant to the Issue), the Net Issue Proceeds would be £980,000 (assuming that the expenses of the Issue will be equal to 2 per cent of the Gross Issue Proceeds).

It is expected that the Net Issue Proceeds will be invested in accordance with the Company's investment policy, within three months of Admission.

Benefits of the Issue

The Directors believe that the Issue will have the following benefits to Shareholders:

- Provide additional capital which will enable the Company to benefit from the continued investment opportunities in the market.
- Having a greater number of Shares in issue is likely to provide the Shares with additional liquidity.
- Increasing the size of the Company will help make the Company more attractive to a wider shareholder base.
- The Company's fixed running costs will be spread across a wider shareholder base, thereby reducing the total expense ratio.

Investment Objective

The Company's investment objective is to provide its shareholders with regular dividends, at levels that are sustainable, whilst preserving the capital value of its investment portfolio, utilising the investment skills of the Investment Managers.

Target Yield

On the basis of current market conditions as at the date of this Prospectus, the Board and Investment Managers are targeting a net yield in the region of 5 per cent. per Share per annum.¹

The actual yield generated by the Company in pursuing its investment objective will, however, depend on a wide range of factors including, but not limited to, general economic and market conditions, fluctuations in currency exchange rates, prevailing interest rates and credit spreads, the terms of the investments made by the Company and the risks highlighted in the sections headed “Risk Factors” in this Prospectus. Furthermore, the yield generated by the Company with respect to each class of Ordinary Shares will be impacted by the extent to which the Investment Managers are able to, and are successful in, hedging currency exchange risk between the currency in which the relevant class of Ordinary Shares is denominated and the currencies in which the assets comprised in the Portfolio are denominated and the costs, profits and losses resulting from any such currency hedging activity.

The Target Yield should not be taken as an indication of the Company’s expected future performance or results over such period. The Target Yield is a target only and there is no guarantee that it can or will be achieved and it should not be seen as an indication of the Company’s expected or actual return. Accordingly, investors should not place any reliance on the Target Yield in deciding whether to invest in the Issue Shares.

Furthermore, the future performance of the Company may be materially adversely affected by the risks discussed in the section of this Prospectus entitled “Risk Factors”.

Investment Policy

To pursue its investment objective, the Company will invest mainly in floating rate senior secured loans issued in U.S. Dollars, Sterling and Euros by primarily North American and European Union corporations, partnerships and other business issuers. These loans will at the time of investment often be non-investment grade. The Company considers debt instruments to be non-investment grade if, at the time of investment, they are rated below the four highest categories by at least two independent credit rating agencies or, if unrated, are deemed by the Investment Managers to be of comparable quality.

The coupon received when investing in floating rate loans varies with, and is periodically adjusted to reflect changes in, a generally recognised base interest rates such as LIBOR. The Company will generally seek to focus on loans of issuers that the Investment Managers believe have the ability to generate cash flow through a full business cycle, maintain adequate liquidity, possess an enterprise value in excess of senior debt and have access to both debt and equity capital.

The Company may also make investments in senior bonds on an opportunistic basis if the Investment Managers believe that such investments are attractively valued up to a maximum in aggregate of 20 per

¹ The target is annualised, based on dividends and NAV over the relevant period. This is a target only. There is no guarantee that the Target Return can or will be achieved and it should not be seen as an indication of the Company’s expected or actual return. Accordingly, investors should not place any reliance on the Target Return in deciding whether to invest in the Issue Shares.

² There has been no material change to the Portfolio as the date of this Prospectus.

cent. of the Net Asset Value at the time of investment, provided that no more than 10 per cent. of Net Asset Value may be invested in unsecured senior bonds at the time of investment.

Diversification

The Investment Managers seek to manage risk through in-depth credit research utilising proprietary analytic processes, diversifying across industries, companies and investment size and adjusting sector weightings based on economic and market analysis.

The Company's portfolio of investments is intended to represent at least 100 investments across a minimum of 20 industries, with a focus on those industries regarded as defensive. Defensive industries are those the Investment Managers believe are less affected by changes in economic conditions and likely to demonstrate the strongest capital preservation.

Typically, no industry will represent more than 15 per cent. of Net Asset Value at the time of investment. No single investment will, at the time such investment is made, represent more than 5 per cent. of Net Asset Value.

Gearing and derivatives

The Company will not employ gearing or derivatives of any kind for investment purposes. The Company may, from time to time, use borrowings for share buy backs and short-term liquidity purposes. The Directors will restrict borrowing to an amount not exceeding 20 per cent. of the NAV at the time of drawdown. Derivatives may be used for hedging purposes.

Changes to the Company's investment policy

Any material change to the Company's investment policy will be made only with the approval of the Shareholders.

Cash Uses and Cash Management Activities

In accordance with the Company's investment policy, the Company's principal use of cash (including the Net Issue Proceeds) will be to fund investments sourced by the Investment Managers, as well as expenses related to the Issue, ongoing operational expenses and payment of dividends and other distributions to Shareholders in accordance with the Company's dividend policy as discussed in the section entitled "Dividend policy" in this Part I.

While the Investment Managers intend to fully invest the Net Issue Proceeds within three months of Admission, the Company may from time to time have surplus cash (for example, following the disposal of an investment). It is expected that any surplus cash will be temporarily invested in cash, cash equivalents, money market instruments, government securities and other investment grade securities pending its investment in accordance with the Company's investment policy. Subject to this, the Company's investment policy does not impose any fixed requirements relating to the allocation of the Company's excess capital among various types of temporary investments. The temporary investments that the Company will make will almost certainly have yields that are significantly lower than the Target Yield.

Borrowing Powers

Whilst the Company will not employ gearing for investment purposes, the Company may, from time to time, use borrowings for share buy backs and short-term liquidity purposes. The Directors will restrict borrowing to an amount not exceeding 20 per cent. of the NAV at the time of drawdown.

As at the date of this Prospectus, the Company has no borrowings.

Hedging Transactions and Currency Risk Management

The Ordinary Shares in the Company are denominated in U.S. Dollars and Sterling and the C Shares in the Company to be issued pursuant to the Issue will be denominated in Sterling. The investments to be made by the Company may be denominated in U.S. Dollar, Sterling or Euro. Consequently, the holders of any

class of Shares may be subject to foreign currency fluctuations between the currency in which such Shares are denominated and the currency of the investments made by the Company.

The Investment Managers normally seek to hedge currency exposure between the U.S. Dollar (being the Company's operational and accounting currency) and any other currency in which the Company's assets may be denominated. In addition, the Investment Managers normally seek to hedge the exposure of Shares denominated in currencies other than U.S. Dollar against fluctuations between such currencies and the U.S. Dollar.

However, hedging arrangements will be implemented on behalf of the Company only when suitable hedging contracts, such as currency swap agreements, futures contracts, options and forward currency exchange and other derivative contracts, are available in a timely manner and on terms acceptable to the Investment Managers, in their sole and absolute discretion. To the extent that the Investment Managers are unable to engage, or are unsuccessful, in hedging currency exposure, Shareholders will be subject to fluctuations between the currency in which their Shares are denominated and the other currencies in which the assets and investments comprising the Portfolio are denominated.

The Investment Managers reserve the right to terminate any hedging arrangement in their absolute discretion, including, without limitation, if they consider it to be in the interests of Shareholders to do so or such arrangements may adversely affect the performance of the Company.

To the extent that a currency hedging transaction relates to a specific class of Shares, the profits, losses and expenses of such transaction will be allocated solely to the relevant class of Shares.

The Company may also utilise derivative instruments for the purposes of efficient portfolio management and to hedge risk within the Portfolio using single-name credit default swaps, credit default swaps and loan credit default swap indices, equity futures and equity indices. The Company will not invest in derivatives for investment purposes. As part of their overall portfolio management obligations and, in any event, prior to entering into a derivative transaction on behalf of the Company, the Investment Managers will consider whether and to what extent it is appropriate to diversify the counterparty risk that results from the use of such derivatives and will monitor overall counterparty exposure within the Portfolio on an ongoing basis.

Discount Control

Continuation Resolution

In accordance with the Articles, the Directors are required to convene an EGM on or before 20 April 2014, being the third anniversary of the IPO Admission in order to propose an ordinary resolution that the Company continue its business as a closed-ended investment company (the “**Continuation Resolution**”). If the Continuation Resolution is passed, the Directors are required to convene an EGM to propose a further Continuation Resolution on or before 20 April 2017, being the sixth anniversary of the IPO Admission. Thereafter, the Directors are required to convene an EGM to propose a further Continuation Resolution annually on or before the anniversary of the date on which the previous Continuation Resolution was passed.

If any Continuation Resolution is not passed, the Directors are required to put proposals for the reconstruction or reorganisation of the Company to the Shareholders for their approval. These proposals may or may not involve winding up the Company, and therefore, failure to pass the Continuation Resolution will not necessarily result in the winding up of the Company.

Redemption Offer

The Articles incorporate a discount management provision which operates on an annual basis such that if, as at 31 December in any calendar year, the Ordinary Shares of a particular class have, on average over the last three calendar months of the relevant calendar year (the “**Discount Calculation Period**”), traded at a discount in excess of 5 per cent. of the Net Asset Value per Ordinary Share of that class (calculated by reference to the middle market quotation of the Ordinary Shares of that class on the Daily Official List of the London Stock Exchange on each trading day in the relevant Discount Calculation Period and the most recently published Net Asset Value per Ordinary Share of the relevant class as at the close of trading on such trading day), the Directors will, subject to any legal or regulatory requirements, implement a redemption offer (the “**Redemption Offer**”) pursuant to which each holder of Ordinary Shares of the relevant class not resident in the United States shall be offered the opportunity to redeem up to 50 per cent. of their Ordinary Shares of such class (the “**Basic Entitlement**”).

The Directors may structure a Redemption Offer to permit Shareholders to request the redemption of Ordinary Shares of the relevant class in excess of their Basic Entitlement, in which event such excess redemption requests will be satisfied, to the extent that other Shareholders request redemption of Ordinary Shares of the relevant class in respect of less than the whole of their Basic Entitlement, *pro rata* to the amount in excess of the Basic Entitlement which each relevant Shareholder has requested to redeem (rounded down to the nearest whole number of Ordinary Shares).

Any Redemption Offer will be announced via an RIS announcement together with details of the terms of the Redemption Offer and the procedure for redeeming Ordinary Shares.

In implementing a Redemption Offer, the Directors will allocate to a redemption pool (the “**Redemption Pool**”) assets of the Company worth in aggregate (as at the NAV Calculation Date immediately preceding the Redemption Date) an amount equal to the Net Asset Value (as at the same date) attributable to the Ordinary Shares to be redeemed less one per cent of such amount (which shall be retained for the benefit of the Company). As the Portfolio is expected to consist of cash as well as loans and bonds, the assets allocated to the Redemption Pool will include a cash element as well as a share of the non-cash assets held in the Portfolio. Shareholders resident in the United States will not be eligible to participate in the Redemption Offer.

The proportion allocated to the Redemption Pool in cash would be *pro rata* to the cash held in the Portfolio, save to the extent that the Directors may choose to increase the proportion of cash if they consider that it would be equitable to both the Shareholders participating in the Redemption Offer (the “**Exiting Shareholders**”) and those not participating in the Redemption Offer (the “**Continuing Shareholders**”) to do so. In the event that the Directors, in their absolute discretion, determine it is necessary or desirable to retain cash for the Company’s working capital purposes, they may also decrease the proportion of cash allocated to the Redemption Pool.

The Directors would select the non-cash assets for allocation to the Redemption Pool with a view to ensuring that, in so far as is practicable, there is *pro rata* allocation of such assets between the Redemption Pool and the assets to be retained in the Portfolio. However, the Directors may choose an alternative allocation, or subsequently rebalance the Redemption Pool, if they consider a *pro rata* allocation to be impracticable or that to do so would be equitable to both Exiting Shareholders and Continuing Shareholders.

An initial cash payment (where available) in the relevant currency will be made to Exiting Shareholders following the closing of the Redemption Offer with further cash payments to be made, at the discretion of the Directors, as assets in the Redemption Pool are realised. The time it will take to realise the non-cash assets contained in the Redemption Pool and therefore to distribute redemption proceeds to Exiting Shareholders will depend on market conditions and how quickly the Investment Managers are able to sell such assets at prices they consider to be reasonable in the circumstances. However, the Directors expect that in normal circumstances it should be possible to realise the assets comprised in a Redemption Pool and distribute the proceeds to Exiting Shareholders within three months of the Redemption Date.

The costs and expenses of implementing the Redemption Offer will be payable out of the Redemption Pool together with the Redemption Pool’s *pro rata* share of the ongoing costs and expenses of the Company and any costs and expenses of the Company attributable solely to such Redemption Pool until such time as the Redemption Pool has been fully realised and all redemption proceeds have been distributed. The Investment Managers will not seek to hedge currency risk between the currencies in which the assets comprised in the Redemption Pool are denominated and the U.S. Dollar, or between the U.S. Dollar and other currencies in which the Shares redeemed pursuant to the Redemption Offer were denominated. Exiting Shareholders will therefore be subject to unhedged currency exposure during the period from the Redemption Date until all of the assets comprised in the Redemption Pool have been realised.

The Redemption Offer will not apply to the classes of C Shares in issue at any time.

Share Purchases and Buy Backs

At the Annual General Meeting of the Company held in June 2012, the Directors were granted the general authority to purchase in the market up to 14.99 per cent. of the Ordinary Shares of each class in issue (as at 19 June 2012). The Directors intend to seek annual renewal of this authority from the Shareholders at each subsequent annual general meeting of the Company.

Pursuant to this authority, and subject to the Companies Law and the discretion of the Directors, the Company may purchase Ordinary Shares of a particular class in the market on an ongoing basis with a

view to addressing any imbalance between the supply of and demand for Ordinary Shares of such class, thereby increasing the Net Asset Value per Ordinary Share of that class and assisting in controlling the discount to Net Asset Value per Ordinary Share of that class in relation to the price at which the Ordinary Shares of such class may be trading.

In the event that the Board decides to repurchase Ordinary Shares, purchases will only be made through the market for cash at prices not exceeding the estimated prevailing Net Asset Value per Ordinary Share of the relevant class where the Directors believe such purchases will result in an increase in the Net Asset Value per Ordinary Share of the relevant class. Such purchases will only be made in accordance with (a) the Listing Rules, which currently provide that the maximum price to be paid per Ordinary Share must not be more than the higher of (i) five per cent. above the average of the mid market values of Ordinary Shares of the relevant class for the five Business Days before the purchase is made; or (ii) the higher of the last independent trade or the highest current independent bid for Ordinary Shares of the relevant class; and (b) the Companies Law, which provides *inter alia*, that any buyback is subject to the Company passing the solvency test contained in the Companies Law at the relevant time.

Ordinary Shares purchased by the Company may be cancelled or held in treasury up to a maximum of 10 per cent. of the total number of Ordinary Shares in issue of that class at any particular time.

The Company may borrow and/or realise investments in order to finance such Ordinary Share purchases.

There will be no buy backs by the Company of its C Shares.

Shareholders and prospective Shareholders should note that the purchase of Ordinary Shares by the Company is entirely discretionary and no expectation or reliance should be placed on the Directors exercising such discretion on any one or more occasions.

Conversions between classes

The Company offers a monthly conversion facility pursuant to which holders of Ordinary Shares of one class may convert such Ordinary Shares into Ordinary Shares of the other class. Shareholders wishing to convert Ordinary Shares may do so by giving the Company not less than 10 Business Days' notice in advance of the first Business Day of each calendar month (each a "**Currency Conversion Calculation Date**"), either through submission of the relevant instruction mechanism (for Shareholders holding Shares in uncertificated form) or through submission of a conversion notice and the return of the relevant share certificate to the Registrars (for Shareholders holding Ordinary Shares in certificated form). Such conversion will be effected on the basis of the ratio of the Net Asset Value per Share of the class of Ordinary Shares to be converted (calculated in U.S. Dollars less the costs of effecting such conversion and adjusting any currency hedging arrangements), to the Net Asset Value per Share of the class of Ordinary Shares into which they will be converted (also calculated in U.S. Dollars), in each case on the relevant Currency Conversion Calculation Date.

Shareholders should note that fractions of Shares arising on conversion will be rounded down and hence the aggregate Net Asset Value of those Shares held after conversion may be less than before such conversion. Shareholders who elect to convert Shares will be unable to deal in those Shares in the period between giving notice of conversion and the actual date of conversion.

The Directors may amend the process for conversion (including the timing and frequency of currency class conversions and the procedure for giving notice of conversion) in such manner as they see fit including, without limitation, for the purposes of facilitating conversions of Shares in uncertificated or certificated form or to facilitate electronic communications. Any conversion notice once given shall be irrevocable without the consent of the Directors. The date on which conversion shall take place shall be a date determined by the Board being not more than 30 days after the relevant Currency Conversion Calculation Date.

Conversion shall be effected by way of redesignation of Ordinary Shares of one currency class into Ordinary Shares of the other currency class or in any such other manner as the Board may determine.

The ability to convert Ordinary Shares of one class into Ordinary Shares of any other class may be suspended at any time that the calculation and publication of the Net Asset Value per Share is suspended.

Should either: (i) the aggregate Net Asset Value of the Shares of the other class fall below the Class Minimum Amount as at any NAV Calculation Date (or the equivalent in the relevant currency); or (ii) the number of Shares of any class held in public hands (as such phrase is used in current Listing Rule 6.1.19(4)R) fall below 25 per cent. of the total number of issued Shares of that class, the Directors, in accordance with the Articles of Incorporation, have the right, at their discretion, to compulsorily convert the

Shares of such class into Shares of the class then in issue with the greatest aggregate Net Asset Value in U.S. Dollar terms as at the corresponding NAV Calculation Date.

The Directors have the discretion not to operate the conversion facility with respect to any class of Shares or across all classes of Shares from time to time.

Your attention is drawn to the subscribers' warranties set out in the "purchase and transfer restrictions" section of this Prospectus. In particular, at the Currency Conversion Calculation Date, each holder of one class of Ordinary Shares converting such Ordinary Shares into Ordinary Shares of the other class will be deemed to have represented, acknowledged and agreed that (i) it and the person, if any, for whose account or benefit it is holding the Ordinary Shares of one class and receiving Ordinary Shares of the other class is not a U.S. Person and is not located within the United States; (ii) it acknowledges that the Company reserves the right to make inquiries of any holder of the Ordinary Shares or interests therein at any time as to such person's status under U.S. federal securities laws, and to require any such person that has not satisfied the Company that the holding by such person will not violate or require registration under U.S. federal securities laws to transfer such Ordinary Shares or interests immediately under the direction of the Company (which may include, but is not limited to, the execution of a power of attorney allowing the Company to effect a transfer on its behalf); and (iii) it agrees to comply with the transfer restrictions set out in the "purchase and transfer restrictions" section of this Prospectus and will notify the Company if it is holding in contravention of such restrictions.

Further issues of Shares

The Directors will have authority to allot and issue further Shares in the share capital of the Company following Admission. Further issues of Shares would only be made if the Directors determine such issues to be in the best interests of Shareholders and the Company as a whole. Relevant factors in making such determination include net asset performance, share price rating and perceived investor demand. In the case of further issues of Shares of an existing class, such Shares will only be issued at prices which are not less than the then prevailing Net Asset Value per Share of the relevant class (as estimated by the Directors).

There are no provisions of Guernsey law which confer rights of pre-emption in respect of the allotment and issue of shares in a Guernsey company. The Articles, however, contain pre-emption rights in relation to allotments of Shares for cash. At the Annual General Meeting of the Company held in June 2012, the Shareholders resolved to disapply such pre-emption rights in relation to a number of Ordinary Shares of each class equal to 10 per cent of the Ordinary Shares of each class in issue (as at 19 June 2012) for a period expiring upon the date of the Annual General Meeting of the Company to be held in 2013. The Directors are seeking to renew such disapplication authority at the EGM to be held on 15 March 2013, and intend to request that the authority to allot Shares for cash on a non-pre-emptive basis is renewed at each subsequent Annual General Meeting of the Company.

The authority described above is in addition to the authority to disapply pre-emption rights for the Issue for which Shareholder approval will be sought at the EGM. At that EGM, the authority referred to above may be replaced on similar terms and expiry of the authority will be on the date of the Annual General Meeting of the Company to be held in 2013.

Dividend Policy

In any financial year, the Company intends to pay dividends to Shareholders equal to the cash income it receives less its running costs paid in that year, subject to the solvency test prescribed by the Companies Law. Cash income will comprise cash received by the Company attributable to the running yield of the Portfolio and the income, if any, arising from cash held by the Company pending investment or distribution. In addition, it will also include all fees generated by the Portfolio, including, for example, arrangement fees from primary loans. It is anticipated that a distribution will be made by way of an interim dividend with respect to each calendar quarter. It is expected that once a dividend has been declared, it will be distributed to Shareholders within two months of the quarter in respect of which the dividend was declared. Dividends will be paid in the currency of the class of Shares in respect of which the dividend was declared.

The Articles of Incorporation also permit the Directors, in their absolute discretion, to offer a scrip dividend alternative to Shareholders when a cash dividend is declared from time to time. In the event a scrip dividend is offered in future, an electing Shareholder would be issued new, fully paid up Shares (or Shares reissued from treasury) pursuant to the scrip dividend alternative, calculated by reference to the

higher of (i) the prevailing average mid-market quotation of the Shares of that class on the Daily Official List of the London Stock Exchange over five trading days; or (ii) the Net Asset Value per Share of that class, at the relevant time. The scrip dividend alternative would be available only to those Shareholders to whom Shares might lawfully be marketed by the Company. The Directors' intention is not to offer a scrip dividend at any time that the Shares trade at a material discount to the Net Asset Value per Share.

In respect of the calendar quarter ending 31 December 2012, the Director declared and paid a dividend of \$0.0116 per US Dollar Ordinary share and £0.0116 per Sterling Ordinary Share. The Directors expect to declare and pay a dividend in respect of the C Shares in July 2013, subject to the level of cash income attributed to the C Shares and compliance with the solvency test prescribed by the Companies Law.

Reports and Accounts

The first accounting period of the Company ran from the date of the Company's incorporation to 31 December 2011 and, thereafter, accounting periods end on 31 December in each year. The audited annual accounts are provided to Shareholders within four months of the year end to which they relate. Unaudited half yearly reports, made up to 30 June in each year, are announced within two months of that date. The Company also produces interim management statements in accordance with the Disclosure Rules and Transparency Rules. The Company reports its results of operations and financial position in U.S. Dollars.

The audited annual accounts and half yearly reports are also available at the registered office of the Administrator and the Company and from the Company's website, www.nbgfrif.com.

The financial statements of the Company are prepared in accordance with U.S. GAAP, and the annual accounts have been audited by PricewaterhouseCoopers CI LLP using auditing standards in accordance with International Standards on Auditing. The Company's financial statements, which are the responsibility of its Board, consists of a balance sheet, profit and loss statement and cash flow statement, related notes and any additional information that the Board deems appropriate or that is required by applicable law.

The preparation of financial statements in conformity with U.S. GAAP requires that the Directors make estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Such estimates and associated assumptions are generally based on historical experience and various other factors that are believed to be reasonable under the circumstances, and form the basis of making the judgements about attributing values of assets and liabilities that are not readily apparent from other sources. Actual results may vary from such accounting estimates in amounts that may have a material impact on the financial statements of the Company.

Net Asset Value

Publication of Net Asset Value

The Company publishes its estimate of the Net Asset Value per Share of each class of Ordinary Shares, and intends to publish the Net Asset Value per Share of the C Shares, on a daily basis (as calculated by the process described below). The Net Asset Value per Share of each class will be published in the currency in which such Shares are denominated and will be published by RIS announcement and be available on the website of the Company.

In order to calculate the Net Asset Value of each class of Ordinary Shares and C Shares, a separate class account will be established in the books of the Company in respect of each class of Shares. Each such class account will be maintained in U.S. Dollars (being the Company's operational and accounting currency) and, consequently, when publishing the Net Asset Value per Share of any class of Shares denominated otherwise than in U.S. Dollars, the Directors shall convert the U.S. Dollar amount standing to the credit of the relevant class account into the relevant currency using such exchange rate as they may consider appropriate. An amount equal to the proceeds of issue of Shares of each class will be credited to the relevant class account. Any decrease in the Net Asset Value of the Company arising from the redemption or repurchase of Shares of a particular class or any dividend or other distribution paid by the Company in respect of Shares of a particular class will be debited to the relevant class account. Each class account will be adjusted as appropriate to reflect conversions of Shares from one class into Shares of any other class. Any increase or decrease in the Net Asset Value of the Portfolio which is attributable to the Shares (disregarding for these purposes any increases or decreases in Net Asset Value arising from issues, repurchases or redemptions of Shares or any dividends or other distribution paid by the Company or any class specific adjustments (as

defined below)) will be allocated among the relevant class accounts based on the previous relative Net Asset Values of each such class account (measured in U.S. Dollar terms). There will then be allocated to each class account the “class specific adjustments”, being those foreign exchange items, placing and distributor fees or commissions, other fees, costs, liabilities, expenses, losses, assets, profits, gains and income which the Directors determine relate to a single separate class (for example those items relating to foreign exchange transactions in respect of each class including the cost of converting subscription proceeds from Sterling or Euro into U.S. Dollars and of hedging the resulting foreign currency exposure).

Valuation of the assets held in the Portfolio

It is intended that the Company will invest primarily in loans, which are expected to be valued according to their bid price as at the close of the relevant trading day or the bid price as determined by Markit Partners on the relevant NAV Calculation Date. If a price cannot be obtained from Markit Partners for any loan, the Investment Managers will source bid prices as at the close of the relevant trading day from third party broker/dealer quotes for any such loan.

In cases where no third party price is available, or where the Investment Manager determines that the provided price is not an accurate representation of the fair value of the investment, the Sub-Investment Manager will determine the valuation based on the Sub-Investment Manager’s fair valuation policy.

The overall criterion for fair value is a price at which a round lot, being the minimum amount that may be sold of a particular loan, of the securities involved would change hands in a transaction between a willing buyer and a willing seller, neither being under compulsion to buy or sell and both having the same knowledge of the relevant facts.

Consistent with the above criterion, the following criteria will be considered when applicable:

- valuation of other securities by the same issuer for which market quotations are available;
- reasons for absence of market quotations;
- the soundness of the security, its interest yield, the date of maturity, the credit standing of the issuer and current general interest rates;
- recent sales prices and/or bid and ask quotations for the security;
- value of similar securities of issuers in the same or similar industries for which market quotations are available;
- economic outlook of the relevant industry;
- an issuer’s position in the relevant industry;
- the financial statements of the issuer; and
- the nature and duration of any restriction on disposition of the security.

Suspension of the calculation of Net Asset Value

The Directors may at any time, but cannot be obliged to, temporarily suspend the calculation of the NAV and NAV per Share during:

- (a) any period when any of the principal markets or stock exchanges on which a substantial part of the Company’s investments are traded are closed, otherwise than for ordinary holidays, or during which dealings thereon are restricted or suspended;
- (b) any period when, as a result of political, economic, military or monetary events or any circumstances outside the control, responsibility and power of the Directors, disposal or valuation of a substantial part of the investments of the Company is not reasonably practicable without this being seriously detrimental to the interests of the Shareholders or if in the opinion of the Directors the NAV and/or NAV per Share cannot be fairly calculated; or
- (c) any breakdown in the means of communication normally employed in determining the value of the Company’s investments or when for any reason the current prices on any market of a substantial part of the Company’s investments cannot be promptly and accurately ascertained.

In the event that the calculation of the NAV of the Shares is suspended as described above, trading in the Shares on the Main Market and the listing of the Shares on the Official List may also be suspended.

Part III: Overview and Outlook on the Floating Rate Loan Market

Market Opportunity

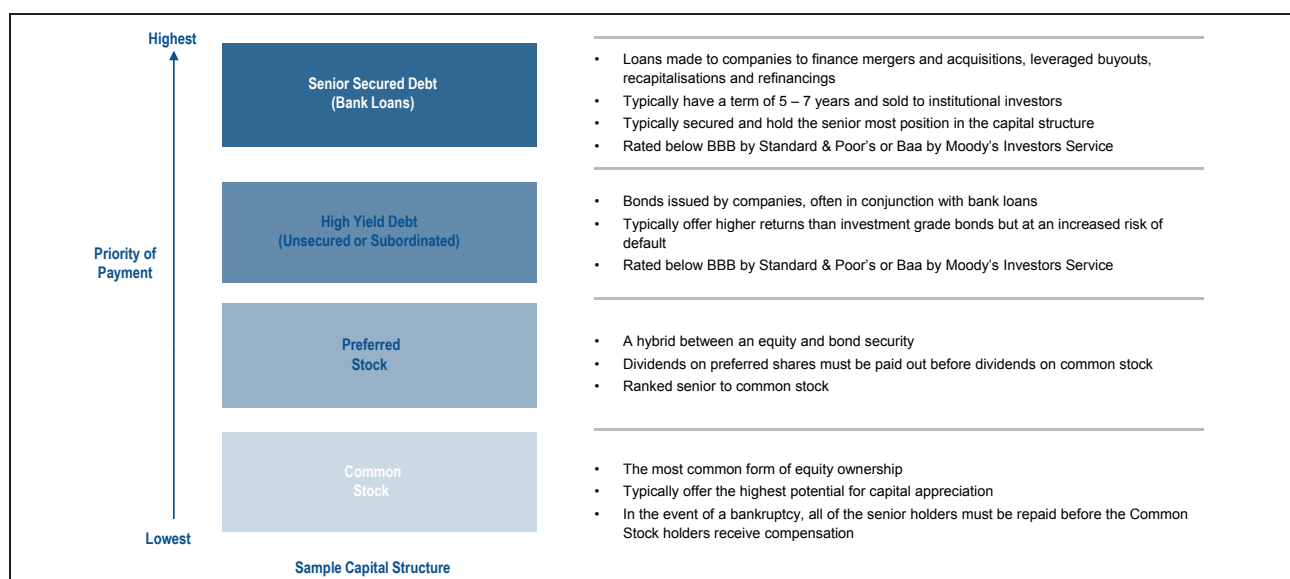

Bank loans are debt obligations arranged by banks and other financial entities on behalf of corporations, partnerships and other business issuers. Such loans are typically used to finance mergers and acquisitions, leveraged buyouts, recapitalisations, refinancings, capital expenditure and for other general corporate purposes.

Bank loans are originated by a bank or other financial institution (also known as an arranger) and will typically be syndicated to a pool of lenders that collaborate to provide financing for the borrower. Once the bank loan is issued, lenders have the option to hold their portion for the life of the loan or to sell it to other investors in the secondary market.

The bank loans that the Company invests in are generally non-investment grade, that is rated at or below Ba1 by Moody's Investors Service or at or below BB+ by Standard & Poor's or an equivalent rating by a third party rating agency.

The bank loans that comprise the Portfolio typically hold the most senior position in the capital structure of the borrower and are secured with specific collateral, giving lenders a claim on the assets that is senior to the claims of unsecured creditors, subordinated debt holders and stockholders of the borrower. The security package typically incorporates a first priority over all of the borrower's assets including receivables, inventory, bank accounts, property and plant and equipment. In the event of a default or bankruptcy, the holders of the loans should be in a better position to maximise recovery of their debt than other creditors due to their position in the capital structure. Figure 1 shows a typical capital structure of a borrower.

Figure 1 – Illustrative Capital Structure

Bank loans earn a variable rate of interest that includes a stated 'spread' (also known as the margin), which reflects issuer risk, over a widely accepted base rate such as LIBOR. The floating rate on bank loans typically resets every 30 to 90 days in line with the prevailing rate of LIBOR and, because such loans reset on a regular basis, the yield is described as "floating".

The Investment Managers' experience is that LIBOR floors are a common feature of almost all new loan issues in the US; LIBOR floors guarantee a minimum level of LIBOR to investors irrespective of the prevailing interest rate.

Figure 2 – S&P/LSTA Leveraged Loan Index Outstanding Loans with LIBOR Floor and Average Floor

Source: S&P LCD. As at 31 December 2012.

The floors are typically between 1.0 per cent. and 1.5 per cent. If LIBOR exceeds the floor then such loans pay the prevailing LIBOR as well as the credit spread. Figure 3 details the potential sources of return from bank loans. The return is generated by the LIBOR floor, the spread over LIBOR paid by the borrower due to the terms of the underlying loan and the discount. The discount occurs because new issues are commonly priced, in the Investment Managers' experience, at a discount to the par value of the loan.

Figure 3 – Indicative Breakdown of Bank Loans Returns

For illustrative purposes only.

- **LIBOR Floor** – The minimum base rate of LIBOR, even if LIBOR falls below that level
- **Credit Spread** – The amount of interest paid over LIBOR to compensate an investor for the associated credit risk
- **Discount** – The amount a loan is priced below par in the primary or secondary market e.g. if a loan is priced at 97 this equals a 3 per cent. Discount

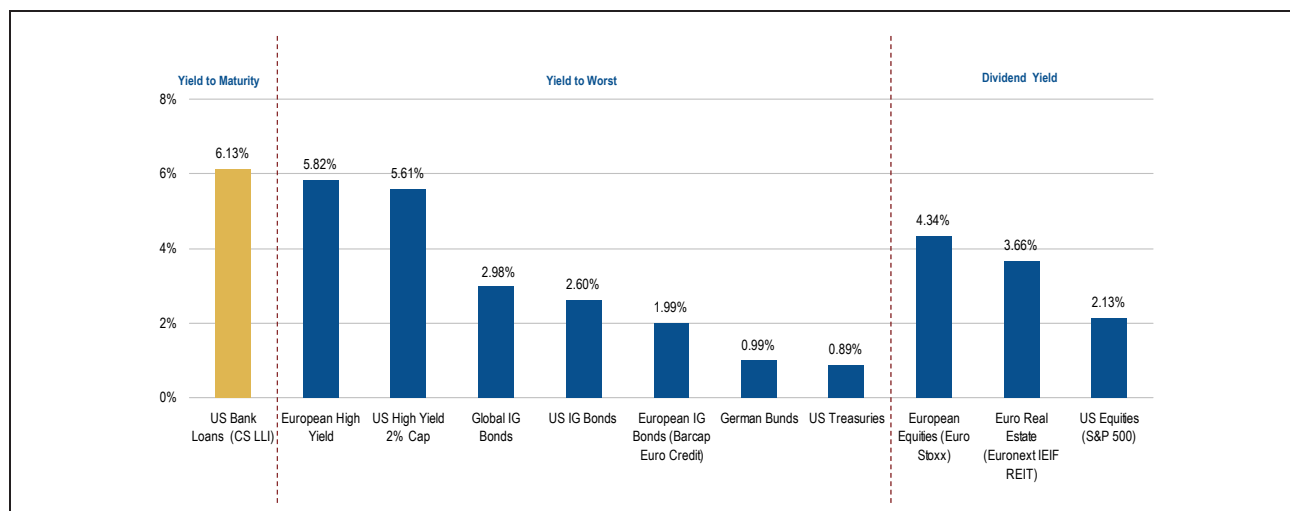

Why Bank Loans are an Attractive Investment

The Investment Managers believe that there are a number of reasons why bank loans are an attractive investment:

1. Bank loan offer potential for attractive current income relative to other asset classes

Recent new issues in the bank loan market have typically offered yields between 4-6 per cent. This is on an annualised basis depending on credit rating, with some potential for capital appreciation. The Investment Managers believe that this is an attractive level of income for the risk undertaken, relative to other fixed income investments. Capital appreciation may occur if bank loans are purchased at a discount to par value, either on the primary or secondary market. Figure 4 compares yields on bank loans as at 24 January 2013 to other investments typically purchased by investors seeking income generation. The Investment Managers believe that the levels of income that loans are able to generate are particularly compelling given the prevailing low interest rate environment.

Figure 5 – Lower Duration and Higher Yields

Bank loans can offer investors the potential for stable income which can be a valuable addition to a diversified portfolio.

Few fixed income investments offer a yield of over 5% with duration of less than one year.

Sources: Barclays, S&P LSTA. As of December 31, 2012. Bank loans are represented by the S&P/LSTA Leveraged Loan Index. Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer.

New bank loans continue to offer reasonable yields compared to historic issuance in the Investment Managers' view. While spreads tightened slightly in 2012, the Investment Managers believe that spreads will remain at attractive levels in the short to mid term for two reasons: (i) the increased presence of unlevered investors compared with 2006 to 2007; and (ii) significant supply (comprising refinancings and new issues) coming to the market over the next few years.

2. Protection from rising interest rates

With US, European and UK interest rates at the lower end of the historical range for the period from 2008 to the date of this Prospectus, the Investment Managers' view is that interest rates will rise over the coming years. The floating rate of interest paid by bank loans should provide some protection against rising interest rates as the coupon on a bank loan is directly linked to LIBOR and will rise in line with interest rate increases. With traditional fixed income assets such as fixed rate bonds, a rise in interest rates tends to lead to a fall in price.

Figure 7 – Historical and Projected Interest Rates

Source: Neuberger Berman Europe Limited, Factset, Bloomberg as at 17 January 2013.

The projections set out above may not materialise and may be significantly different from the interest rates that may actually be prevalent in the future. These projections are not historical facts and only represent Neuberger Berman Europe Limited's current expectation concerning, amongst other things, changes in interest rates, markets conditions and general economic trends. By their very nature, such projections are uncertain because they relate to events and depend on circumstances that may or may not occur in the future. These projections speak only as at the date indicated above.

In the Investment Managers' opinion, bank loans have tended to perform consistently well in rising rate environments.

3. Capital preservation

The Company expects to predominantly invest in bank loans that are non-investment grade. The senior secured nature of these loans means they have historically demonstrated a high level of capital preservation. In the U.S. bank loans market, the annual loss ratio has never exceeded 6 per cent. in any calendar year in the period 1990 to 2011 and the market has preserved an average of 98.4 per cent. of capital for the same period. Figure 8 shows the preservation of capital in the U.S. bank loan market between 1990 and 2011.

Figure 8 – Preservation of Capital in U.S. Bank Loan Market

Source: NBEL (based on data from the Moody's Investors Service report as at February 2012). Preservation of capital shown above is 100% less the loss ratio. Loss ratio is the issuer weighted corporate default rate for speculative grade U.S. Dollar loans taken from that report multiplied by 100% minus the average recovery rates for U.S. Dollar first lien loans taken from the same report. These are broadly representative of the assets the Company has invested in.

4. Diversification

Bank loans have historically demonstrated a low correlation to other asset classes, making them potentially an attractive investment for investors wanting to diversify their portfolio. Figure 9 shows the correlation between bank loans and various other asset classes.

Figure 9 – 1997-2012 Correlation Matrix

5. Positive Fundamentals

The Investment Managers have a positive outlook for the bank loan market, and believe fundamentals remain supportive and corporate earnings sufficiently strong for most issuers to generate free cash flow.

Figure 10 shows that U.S. default rates have remained well below the long term average of 3.31 per cent. and the Investment Managers expect them to remain below this level for the remainder of 2013, and project default levels of 2.0 per cent. for the U.S. Such default levels, the Investment Managers believe, will be driven by the overall health of the investable universe, including strong free cash flow generation, strong liquidity positions and minimal pending maturities.

The Investment Managers' view in respect of the European bank loan market is not as positive and they believe that a number of European borrowers will continue to have fundamental operational and liquidity issues given the more difficult macroeconomic environment in Europe. The Investment Managers expect a default rate in the range of 5 – 7 per cent. for the forthcoming 12 month period with the current trailing rate being 6.6 per cent.

Figure 10 – Lagging Twelve-Month Loan Default Rate Based on Principal Amount

Source: S&P LCD. S&P LCD default rates as at 31 December 2012.

The Investment Managers believe that the limited U.S. bank loan maturities further support their expectation of low default rates.

Figure 11 – U.S. Bank Loan Maturity Schedule

Source: Standard & Poor's LCD. Data as at January 18, 2013. Note: Excludes Defaulted Facilities for observation period only.

Furthermore, the technical backdrop remains supportive for the bank loan market. In the Investment Managers' view, global central banks' accommodating monetary policy seems likely to continue to drive investors to invest in assets in an attempt to boost their returns in an ultra-low interest rate environment. The Investment Managers believe that the bank loan asset class should benefit in this environment given the combination of attractive current yields and low duration. However, there could be periods of volatility given on-going global macro issues, including fiscal cliff-related government spending cuts, the raising of the US debt ceiling and the European sovereign debt crisis.

Benefits of a Global Approach

The Investment Managers invest in a global portfolio incorporating both the U.S. and European markets, which provides diversity and access to a greater number of investment opportunities. As a global fund, the Investment Managers are able to exploit relative value opportunities between the U.S. and Europe. The U.S. is a much larger and liquid market but the European holdings help to diversify the Portfolio. A global fund also has the ability to react to interest rate changes in different geographies.

Since IPO, the Investment Managers have generally favoured the U.S. market, as they believe the European market has had fewer deals to choose from. In addition, the U.S. offers larger transaction sizes, implying bigger syndicates and better liquidity. It also displays evidence of a more stable macro environment, with lower default rates and better economic growth prospects.

Part IV: Investment Managers, Process and Strategy

Investment Managers

The investment manager of the Company is Neuberger Berman Europe Limited, a company incorporated in England and Wales with registered number 05463227 and authorised and regulated by the Financial Services Authority. The Investment Manager has been appointed pursuant to the Investment Management Agreement (further details of which are set out in paragraph 6.3 of Part IX of this Prospectus) and has, pursuant to the Sub-Investment Management Agreement, delegated certain of its responsibilities and functions to the sub-investment manager, Neuberger Berman Fixed Income LLC, a limited liability company incorporated in Delaware. The Sub-Investment Manager is a U.S. registered investment adviser.

The Investment Managers are wholly-owned indirect subsidiaries of the NB Group. Established in 1939, the NB Group is one of the world's largest private, independent employee-controlled asset management companies, managing approximately US\$205 billion in assets as of 31 December 2012, including approximately US\$96 billion in fixed income investments.

The Investment Managers are responsible for the discretionary management of, and will conduct day-to-day management of, the assets held in the Portfolio (including uninvested cash). The Investment Managers are not required to and generally will not submit individual decisions for approval by the Board. The Investment Managers may delegate certain support functions to third parties.

Details of the fees and expenses payable to the Investment Manager pursuant to the Investment Management Agreement are set out in the section headed "Fees and expenses" in Part V of this Prospectus.

Investment strategy

The Investment Managers believe that superior bank loan investment results can be achieved throughout all market cycles using a proactive investment process that reflects the experience of the Investment Managers' team, in the bank loan sector supported by robust risk management techniques. The Investment Managers will seek to avoid credit deterioration, select securities in which the yield is attractive on a relative value basis and rotate across credit tiers and industry sectors.

The Investment Managers intend to employ a disciplined research process that includes fundamental credit analysis, combined with a thorough understanding of the industry and market position of each of the issuers in which the Company will invest. Risk management is central to decision making and is embedded throughout the investment strategy. Risk will be managed through portfolio diversification, in-depth credit research and ongoing sector reviews.

In evaluating specific investment ideas for the Company, the Investment Managers intend to draw upon their substantial investing experience to analyse and assess each prospective borrower's value, capital structure, corporate structure, liquidity position, financial performance and competitive environment in an attempt to identify attractive investment opportunities.

The Investment Managers intend to acquire senior secured floating rate loans that are considered to be non-investment grade on behalf of the Company in both the primary and secondary markets; this is explained in more detail in the section entitled "Primary and secondary loan markets" in this Part IV. Senior bonds may also be acquired on an opportunistic basis in accordance with the Company's investment policy. The manner in which investments in loans may be made by the Investment Managers will either be directly, with the Company becoming a member of a syndicate of lenders, or indirectly, by way of sub-participation arrangements between the Company and a loan market participant such as a bank. The Investment Managers expect that the majority of the Company's investments in senior loans will be effected directly. See the section entitled "Sub-participation arrangements" in this Part IV for more information.

Non-investment grade loans

The Company will invest the Net Issue Proceeds in senior loans that are often non-investment grade. Third party rating agencies, such as Moody's Investors Service and Standard & Poor's, aim to rank the credit worthiness of borrowers using a standardised ratings scale to provide investors with an independent view on how likely a borrower is to default on its debt repayments. Investment grade issuers are rated Aaa to Baa3 by Moody's Investor Services and AAA to BBB by Standard & Poor's. Non-investment grade borrowers are

rated from between Ba1 to C by Moody's Investor Services and BB+ to D by Standard & Poor's. A non-investment grade rating reflects, in the opinion of the ratings agencies, the riskier credit profile of a borrower compared to an investment grade issuer. The Company intends to invest in non-investment grade issues with an average credit quality of between BB and B. See Part II of this Prospectus for the credit rating qualities of the Portfolio.

The Company will generally not invest in distressed loans. In contrast to the secured senior debt which the Company primarily invests in, distressed debt relates to issuers that are already in default of their debt obligations, in bankruptcy proceedings or are likely to enter into such proceedings or default on their obligations, and the Investment Managers' screening process is designed to eliminate such issuers from the Portfolio. See the section entitled "Investment Process" in this Part IV below for more information on the Investment Managers' investment process with respect to screening.

Primary and secondary loan markets

The Investment Managers intend to use the Net Issue Proceeds to acquire loans on behalf of the Company in both the primary and secondary loan markets.

The primary loan market relates to new issues of loans by companies and other entities. This is commonly undertaken by syndicates of securities dealers and other financial institutions that underwrite new loan issues. Syndicate members conduct due diligence on the borrower and a lead underwriter, often a loan originating desk of an investment bank, will then allocate a share of the loan to each participant in the syndicate. This allocation may depend on many factors including demand for the particular loan issue and the amount a syndicate member wishes to acquire. The Company will therefore act as a syndicate member in the primary market.

The secondary market refers to the market in which financial institutions and asset managers, such as the Investment Managers, buy and sell loans that have been syndicated and allocated in the primary market. Loans can be bought or sold on the secondary loan market at any time between initial allocation and the loan reaching maturity by a negotiated agreement between market participants. Dealers, such as the trading desks of investment banks, typically bid and offer (buy and sell) loans in US\$1 million to US\$5 million lots with a bid/offer spread of 25 to 50 basis points depending on a range of factors such as the market's perceived creditworthiness of the borrower and the trading liquidity of an issuer. It is the Investment Managers' experience that larger loan issues of in excess of US\$500 million tend to trade in larger lots and often have tighter bid/offer spreads. Dealers communicate the loan pricing to the Investment Managers by email on a daily basis. If the Investment Managers are interested in a particular loan, prices will be sought from a number of dealers to ensure that a suitable price is chosen.

Sub-participation arrangements

The Investment Managers expect that the Company will generally gain exposure to loans by way of assignment and become a 'lender of record'. The Company may also from time to time, however, enter into sub-participation agreements in which a party, such as a loan trading desk at a financial institution, holds the loan as the lender of record and retains the voting rights in respect of the loan; in such circumstances, the Company will only have the economic benefit of the loan and will have no rights to enforce the terms of the credit agreement or vote at any meeting of creditors. As at the date of this Prospectus, the Investment Managers anticipate that such sub-participations will comprise a minority of the Company's investments and in any event will be capped at a maximum of 5 per cent. of NAV at the time of investment. It is expected that any sub-participation agreements will be entered into with various counterparties to diversify risk.

The Investment Team

The Investment Managers' team comprises 3 portfolio managers with extensive experience in the bank loans sector supported by a research team of over 20 credit analysts. The research team is organised into speciality sectors that analyse both bank loans and high yield bonds. The investment team also includes 4 traders that specifically trade non-investment grade debt. As this investment team already manages over US\$5 billion in bank loan assets, the Investment Managers believe that they have a large enough presence in the bank loan market to gain access to new bank loan issues but without being so large they have to 'buy the market' and participate in all new issues. This positioning in the loans market means that the Investment Managers are well placed to be selective and opportunistic in their investment approach while

retaining access to those deals they wish to acquire for the strategy. The credit research analysts have an average of 10 years' industry experience each.

He is also responsible for loan capital market relationships and sits on the Credit Committee. Mr. Casey was a founding partner of LightPoint, which was acquired by the NB Group in 2007. Prior to joining LightPoint, he was employed at ABN AMRO where he was responsible for structuring highly leveraged transactions. Mr. Rotheram is an associate of the Chartered Institute of Bankers and holds the Investment Management Certificate.

Investment Process

The Investment Managers will employ both a bottom-up and top-down approach in their investment process by combining detailed security and industry analysis with a global economic outlook. The Investment Managers expect individual security selection, sector allocation and quality rotation to generate the most value for the Portfolio, with the majority deriving from security selection. Sector/quality allocation will be most important at times when the economy is in periods of change.

The key components of the investment process are as follows: (i) idea generation; (ii) screening; (iii) due diligence; (iv) portfolio construction; and (v) ongoing monitoring. Any investment for the Company that is contemplated by the Investment Managers will have to pass each of these stages.

(i) Idea Generation

Ideas will be generated through one of two sources. Firstly, the Investment Managers' senior investment professionals have extensive relationships with U.S. and European originating and trading desks at banks and other financial institutions. These relationships will provide access to the primary market. Secondly, the analyst team in conjunction with the traders will identify investments through their proprietary research and industry relationships, as well as the analysts' existing coverage of issuers in the loans market.

(ii) Screening

The screening component of the investment process is designed to favour larger companies in asset-heavy industries that have historically stable cash flows, strong liquidity, access to capital and proven management teams.

Issuers with less than US\$500 million (or Sterling or Euro equivalent) in institutional debt outstanding, defaulted securities and issuers with less than US\$100 million (or Sterling or Euro equivalent) in EBITDA will automatically be excluded from the investment process. The screening process is largely focused on the liquidity of an issuer as the ability to sell a loan in the secondary market is a primary concern of the Investment Managers. Market capitalisation is not specifically screened for but it is expected that the issuers in which the Company will invest will typically have a market capitalisation in excess of US\$500 million (or Sterling or Euro equivalent).

When establishing the universe of eligible investments, the Investment Managers will also aim to eliminate asset-light companies, issuers in highly cyclical industries and companies with limited earnings visibility. Other factors may also result in an issuer being excluded at this stage, including, but not limited to, severely distressed and one-time issuers.

Following the initial screening process, the Investment Managers will sort the issuers that are still eligible by reference to their credit standing derived from third party credit ratings and credit statistics, for example leverage, interest cover and free cash flow as a percentage of debt and relative yield.

(iii) Due Diligence

The research analysts will perform detailed fundamental analysis on each potential investment following the Investment Team's proprietary 'Credit Best Practices' principles. The checklist covers all credit aspects of the investment decision, including: (i) financials, with specific attention to revenue and cost drivers, predictability of cash flows, internal cash flow generation and the implications for interest and principal payments and capital expenditures; (ii) collateral valuation; (iii) deal structure and covenants; (iv) assessment of management; (v) sources of liquidity such as bank lines, cash in hand, access to capital markets, and asset sales; (vi) in-depth inspection of all filings to monitor any outstanding or proposed litigation and other commentary relevant to the investment decision; and (vii) thorough review of the credit documentation (including the credit agreement).

Once the analyst team has completed the due diligence steps, the investment's relative value will be assessed, with a focus on seeking opportunities that offer adequate compensation for risk. The Investment Managers' internal rating system is an integral component of the due diligence process and will be used to determine a rating for each security based on proprietary financial analysis. Investment decisions will also be influenced by the issue's yield compared to its industry sector and the relevant quality rating category assigned by third party credit rating agencies. The Investment Managers' rating is central to the yield comparisons conducted across quality and industry levels.

Investment ideas will then be reviewed by the senior professionals who constitute the Credit Committee. The Credit Committee is comprised of the portfolio managers for the Investment Managers' senior loans strategy, Joe Lynch, Stephen Casey, Martin Rotheram, the Chief Investment Officer of NB Non-Investment Grade team, Ann Benjamin, one of the High Yield strategy's portfolio managers, Tom O'Reilly, and the Director of Research, Vivek Bommi. All investment ideas must be presented for approval to the Credit Committee and must receive unanimous approval before being considered for inclusion in the portfolio. The Credit Committee will meet as required to consider and review any investment proposals.

(iv) Portfolio Construction

Once an investment idea is approved by the Credit Committee, implementation becomes the responsibility of the portfolio construction team. The portfolio construction team, comprising the portfolio managers and dedicated traders, evaluates the various investment proposals that are available for implementation within the context of the Company's investment objective and investment guidelines. Relative value analysis will be used to determine ultimate portfolio construction, with individual issuer and industry weightings determined by the portfolio managers. Weightings given to investments will be decided only following a detailed assessment of the proposed issuer within a wider economic and market context.

It is intended that a highly diversified portfolio will be assembled, primarily comprising senior secured loans with selective use of other investments within the parameters of the Company's investment policy and by having regard to the following non-binding investment guidelines:

By Issuer:

Average exposure to any one issuer (at the time of investment): 1 per cent. of NAV

Maximum exposure per issuer (at the time of investment): 5 per cent. of NAV

By Industry:

Typically, no industry, at the time of investment, will represent more than 15 per cent. of NAV

Focus on defensive industries with opportunistic use of cyclical industries

By Quality

Average credit quality BB to B

Opportunistic use of CCC and BBB assets

Other Characteristics

Primarily North American / European Union corporate debt

No emerging market or sovereign debt

All buy and sell instructions are passed to the Investment Managers' bank loans team of four dedicated traders for prompt execution.

See also Part II of this Prospectus.

(v) *Ongoing Monitoring*

The key risk when investing in bank loans is that the borrower will default on its debt obligations. The extensive upfront credit analysis that will be undertaken prior to any investment decision will be supported by ongoing monitoring of the Portfolio by the Investment Managers. The Investment Managers will review a range of relevant data on an ongoing basis for each investment, including, but not limited to, key financial drivers, commodity prices, stock prices, regulatory developments, financial results, press releases and management commentary to identify any indicators of credit deterioration.

Based on the frequent monitoring of the Portfolio, the Investment Managers expect to sell investments for a number of reasons, including, but not limited to: (i) credit deterioration; (ii) a loan reaches full value and better opportunities are identified; or (iii) rotation into another industry/sector opportunity is considered appropriate for relative value reasons. The Investment Managers' view is that the most important consideration in a sell decision will be the determination by the Investment Managers that an issuer will not deliver on its promised debt service obligations. The analyst team's financial models for each issuer will be used as the yardstick for assessing changes in financial condition and any deterioration will be acted upon promptly and the investment sold by the dedicated team of traders.

The Sub-Investment Manager believes that the Credit Suisse Index is a suitable benchmark for its U.S. bank loans strategy as it reflects the investable universe of the U.S. dollar-denominated leveraged loan market, although it is not possible to invest in the Credit Suisse Index itself.

These expenses will include the following:

(i) Administration and Custody

Under the terms of the Administration and Custody Agreement, the Administrator is entitled to various fees, including an accounting fee, annual company secretarial fee loan administration fee and settlement and custody fees. Conflicts of interest

Directors

In relation to transactions in which a Director is interested, the Articles provide that as long as the Board authorises the transaction in good faith after the nature and monetary value or, if such value is not quantifiable, the extent of the Director's interest has been disclosed or the transaction is fair to the Company at the time it is approved, a Director shall not be disqualified by his office from entering into a contract or arrangement with the Company, and no such contract or arrangement or any contract or arrangement entered into by or on behalf of the Company with any person, firm or company of or in which any Director shall be in any way interested, shall be avoided. A Director may not, however, vote in respect of any such contract or arrangement, although the Director shall be counted in the quorum. For further details see paragraph 5.14 of Part IX of this Prospectus.

The Directors are also required by the Registered Collective Investment Scheme Rules 2008 to take all reasonable steps to ensure that there is no breach of any of the conflict of interest requirements in those Rules.

Investment Managers

The Company, and an investment in the Company and the Issue Shares, are subject to a number of actual and potential conflicts of interest involving NB Affiliates and, in particular, the Investment Managers. The Investment Managers' policy relating to conflicts of interest, as set out below, describes the arrangements in place within the Investment Managers to ensure the fair management of conflicts of interest. In addition, potential investors should read carefully the Risk Factors set out on pages 17 to 32 of this Prospectus and, in particular, the risks set out under the section headed "Risks relating to the Investment Managers" on page 26 of this Prospectus.

The Investment Managers manage Other Accounts (and may in the future manage further Other Accounts) whose investment objectives and/or philosophies are the same as, overlap with, or are complementary to, the investment strategies and/or philosophies pursued by the Company, and both the Company and such Other Accounts will be eligible to participate in the same investment opportunities. It is anticipated that the aggregate amount of capital invested in the Company and such Other Accounts with the same or substantially similar investment strategies will not exceed US\$15 billion. Additionally, investment opportunities may become closed or limited with respect to new investments due to size constraints or other considerations. Moreover, the Company and/or such Other Accounts may not be eligible or appropriate investors in all potential investment opportunities. As a result of these and other factors, the Company may be precluded from making a specific investment.

It is the policy of the Investment Managers to allocate investment opportunities fairly and equitably among the Company and Other Accounts, where applicable, to the extent possible over a period of time. The Investment Managers, however, will have no obligation to purchase, sell or exchange any investment for the Company which the Investment Managers may purchase, sell or exchange for one or more Other Accounts if the Investment Managers believe in good faith at the time the investment decision is made that such transaction or investment would be unsuitable, impractical or undesirable for the Company.

As a general policy, investment opportunities will be allocated among those accounts for which participation in the respective opportunity is considered appropriate pro-rata based on the relative capital size of the accounts. In addition, the Investment Managers may also take into consideration other factors such as the investment programme of the accounts, tax consequences, legal or regulatory restrictions, including those that may arise in various different international jurisdictions, the relative historical participation of an account in the investment, the difficulty of liquidating an investment for more than one account, new accounts with a substantial amount of investable cash and such other factors considered relevant by the Investment Managers. Such considerations may result in allocations among the Company and one or more Other Accounts on other than a *pari passu* basis (which may result in different performances among them).

Investment allocation decisions will be made by the Investment Managers, taking into consideration the respective investment guidelines, investment objectives, existing investments, liquidity, contractual commitments or regulatory obligations and other considerations applicable to the Company and Other Accounts. However, there are likely to be circumstances where the Company is unable to participate, in whole or in part, in certain investments to the extent it would participate absent allocation of an investment opportunity among the Company and Other Accounts and the Investment Managers will notify the Board in such circumstances. In addition, it is likely that the Company's Portfolio and those of Other Accounts

will have differences in the specific investments held in their portfolios even when their investment objectives are the same or similar. These distinctions will result in differences in portfolio performance between the Company and Other Accounts.

The Investment Managers (or other NB Affiliates) may manage the assets of Other Accounts that provide the Investment Managers (or other NB Affiliates) with discretion to allocate such assets among various investment strategies through separate accounts or other pooled investment vehicles managed by the Investment Managers, including the Company. In these instances, the Investment Managers (or other NB Affiliates) will, from time to time, exercise their full discretion to determine investment strategies to which such assets should be allocated and the amount of each such allocation, subject to any applicable investment guidelines. In addition to making an initial allocation among strategies, the Investment Managers (or other NB Affiliates) are typically vested with discretion to rebalance, adjust or make different allocations for such assets, from time to time, solely in their discretion, as market conditions or the requirements of the Other Accounts dictate. Therefore, the investments of such Other Accounts that invest in the Company, if applicable, generally will be directed by the Investment Managers (or other NB Affiliates), and the Investment Managers (or other NB Affiliates) could either buy or sell Shares in the secondary market or, subject to applicable law, participate in any redemption or buyback of Shares implemented by the Company. The Investment Managers have no duty or responsibility to inform or advise any other Shareholder in the Company to undertake the same or similar action with respect to their own investments. Each investor in the Company is responsible for making its own decision as to selling or buying Shares or, subject to applicable law, participating in any redemption or buyback of Shares implemented by the Company.

In addition, the DTRs require the Company to (i) make a corporate governance statement in its annual report and accounts based on the code to which it is subject, or with which it voluntarily complies; and (ii) describe its internal control and risk management arrangements.

The Company reports against the UK Corporate Governance Code and the Board has taken appropriate measures to ensure that the Company complies with the UK Corporate Governance Code, given the Company’s size and nature of business.

AIC Code

The Company has voluntarily agreed to comply with the AIC Code of Corporate Governance (the “**AIC Code**”) produced by the Association of Investment Companies (“**AIC**”). The Company is a member of the AIC and is classified as a Specialist Debt Company by the AIC. Subject to “*Statement of compliance*” below, the Company currently complies with the AIC Code.

The GFSC has stated in the Code that companies which report against the UK Corporate Governance Code or the AIC Code are deemed to meet the requirements of Code.

Statement of compliance

The Company has complied with the recommendations of the AIC Code and the relevant provisions of the UK Corporate Governance Code, except as set out below.

The UK Corporate Governance Code includes provisions relating to: (i) the role of the chief executive; (ii) executive directors' remuneration; and (iii) internal audit function.

The Board considers these provisions are not relevant to the position of the Company, being an externally managed investment company with no employees.

Directors' Share dealings

The Directors have adopted a code of directors' dealings in Shares, which is based on the Model Code for directors' dealings contained in the Listing Rules (the "**Model Code**"). The Board is responsible for taking all proper and reasonable steps to ensure compliance with the Model Code by the Directors.

Audit committee

The Company's Audit Committee meets formally at least twice a year for the purpose, amongst other things, of considering the appointment, independence and remuneration of the auditor and to review the annual accounts, interim reports and interim management statements. Where non-audit services are provided by the auditor, full consideration of the financial and other implications on the independence of the auditor arising from any such engagement are considered before proceeding. Mr Battey acts as chairman of the Audit Committee. The principal duties of the Audit Committee are to consider the appointment of external auditors, to discuss and agree with the external auditors the nature and scope of the audit, to keep under review the scope, results and cost effectiveness of the audit and the independence and objectivity of the auditor, to review the external auditors' letter of engagement and management letter and to analyse the key procedures adopted by the Company's service providers.

Remuneration and Nomination Committee

The Company has a Remuneration and Nomination Committee, which comprises all the Directors. Ms Platts acts as chairman of the Remuneration and Nomination Committee. The Remuneration and Nomination Committee meets not less than once a year and has responsibility for considering the remuneration of the Directors. It also: (i) identifies individuals qualified to become Board members and selects the director nominees for election at general meetings of the Shareholders or for appointment to fill vacancies; (ii) determines director nominees for each committee of the Board; and (iii) considers the appropriate composition of the Board and its committees. In addition, the chairmanship of the Audit Committee, Remuneration and Nominations Committee and Management Engagement Committee and each Director's performance are reviewed annually by the Chairman and the performance of the Chairman is assessed by the remaining Directors.

Management Engagement Committee

The Company has a Management Engagement Committee which comprises all the Directors, with Ms Platts as the chairman of the committee. The Management Engagement Committee meets not less than once a year. The Management Engagement Committee's main function is to review and make recommendations on any proposed amendment to the Investment Management Agreement and keep under review the performance of the Investment Managers in their role as investment managers to the Company.

Part VI: C Shares

The Company first issued C Shares pursuant to the Secondary Issue in September 2011, which were fully converted into Ordinary Shares in January 2012.

The Directors now wish to issue further C Shares pursuant to the Issue (see Part I of this Prospectus for further information on the Background and Rationale for the Issue).

The issue of C Shares is designed to overcome the potential disadvantages for both existing and new investors, which could arise out of a conventional fixed price issue of further Ordinary Shares of an existing issued class for cash. In particular:

- the assets representing the Net Issue Proceeds will be accounted for as a separate pool of assets until the Calculation Time. By accounting for the Net Issue Proceeds arising from the issue of the C Shares separately, holders of existing Ordinary Shares will not be exposed to a portfolio containing a substantial amount of uninvested cash before the Calculation Time;
- the Net Asset Value of the existing Ordinary Shares will not be diluted by the expenses associated with the Issue which will be borne by the subscribers for C Shares and not by existing holders of Ordinary Shares; and
- the basis upon which the C Shares will convert into Ordinary Shares is such that the number of Ordinary Shares to which holders of C Shares will become entitled will reflect the relative investment performance and value of the pool of new capital attributable to the C Shares raised pursuant to the Issue up to the Calculation Time as compared to the assets attributable to the existing Ordinary Shares at that time and, as a result, neither the Net Asset Value attributable to the Ordinary Shares nor the Net Asset Value attributable to the C Shares will be adversely affected by Conversion.

Pending full investment, the assets attributable to the C Shares arising from the issue of the C Shares will be held in either (i) cash or cash equivalents, money market instruments or funds, bonds, commercial paper or other debt obligations with banks or other counterparties having an AA or higher credit rating as determined by any reputable rating agency selected by the Investment Managers, or (ii) any UK government and public securities as defined for the purposes of the FSA rules.

Sterling C Shares will be issued pursuant to the Issue.

The Ordinary Shares arising on conversion of the C Shares will rank *pari passu* with the Ordinary Shares then in issue for dividends and other distributions declared, made or paid by reference to a record date falling after the relevant Calculation Time. Fractions of Ordinary Shares arising on Conversion will not be allocated to holders of C Shares but, as the Directors shall determine, shall be cancelled or aggregated and sold for the benefit of the Company. Further details concerning Conversion together with a worked example are set out below. Holders of C Shares will be entitled to participate in a winding-up of the Company or on a return of capital as specified in paragraph 5 of this Part VI.

The Directors intend to convene an extraordinary general meeting in advance of Admission to approve certain matters in connection with the Issue (see Part I of this Prospectus for further information on the extraordinary general meeting).

It should be noted that the Issue is not being made on a pre-emptive basis and existing Shareholders may participate in the Issue on the same terms as any other third party investor. Therefore, Shareholders who choose not to participate in the Issue for an amount at least pro-rata to their holding will have their percentage holding diluted following conversion of C Shares to Ordinary Shares.

Specified Conversion Criteria

Pursuant to the Articles, the Directors have determined that the following conversion criteria shall apply to the Issue:

“Back Stop Date”	the date falling 6 months after the date of Admission of the C Shares
“Early Investment Condition”	the Investment Managers giving notice to the Directors, and the Directors agreeing, that at least 90 per cent. of the assets attributable to the C Shares has been invested or committed to be invested in accordance with the Company’s investment policy

At the Calculation Time, the net assets attributable to the Ordinary Shares then in issue, the net assets attributable to the C Shares, and hence the Conversion Ratio, will be calculated. It is currently expected that:

- (i) the Calculation Time will take place shortly after the next quarterly dividend payment date falling after the Early Investment Condition has been satisfied; and
- (ii) the Conversion Time will occur shortly after such quarterly dividend payment date and in any event within 20 Business Days of the Calculation Time.

It is expected that holders of Issue Shares will receive such number of Sterling Shares as results from applying the Conversion Ratio to their holding of the Issue Shares at the Conversion Time (save in circumstances where there is a C Share Compulsory Conversion).

The conversion process is more fully described, and the definitions of the terms “Calculation Time”, “Conversion Ratio” and “Conversion Time” are set out, in paragraph 1 of this Part VI.

Example of Conversion

The following example is provided for the purpose of illustrating the basis on which the number of new Ordinary Shares arising on Conversion will be calculated. The example is not, and is not intended to be, a profit forecast nor a forecast of the number of Ordinary Shares which will arise on Conversion.

The example below illustrates the number of Sterling Shares which would arise in respect of the conversion of 1,000 Sterling C Shares at the Conversion Time, using assumed Net Asset Values attributable to the Sterling C Shares and existing Sterling Shares at the Calculation Time. The assumed Net Asset Value attributable to an existing Sterling Share is the unaudited estimated Net Asset Value per Sterling Share at the close of business on 13 February 2013, being £0.9921 per Sterling Share. The assumed Net Asset Value attributable to each Sterling C Share is based on the following assumptions: (i) there are no returns on the Net Issue Proceeds in the period to the Calculation Time; (ii) 1,000 Sterling C Shares are issued; and (iii) the expenses of such issue are £0.02.

	Example
Number of Sterling C Shares	1,000
Amount subscribed	£1,000
NAV attributable to a Sterling C Share at the Calculation Time	£0.98
NAV attributable to an existing Sterling Share at the Calculation Time	£0.9921
Conversion Ratio	0.9878
Number of Sterling Shares arising on Conversion for a holder of 1,000 Sterling C Shares	987

Other than the criteria set out in the section “Specified Conversion Criteria” above, the rights and restrictions attaching to the C Shares are set out in the Articles. The relevant provisions are set out below:

2. Issue of C Shares

Subject to the Articles and the Companies Law, the Directors have power to issue an unlimited number of shares of C shares of no par value each. The Directors are authorised to issue C Shares of such classes (and denominated in such currencies) as they may determine in accordance with the provisions of the Articles and with C Shares of each such class being convertible into Ordinary Shares of such class as the Directors may determine at the time of issue of such C Shares (such class of Ordinary Shares being the **“Correspondent Shares”**).

The Directors shall, on the issue of each class of C Shares, determine the latest Calculation Time and Conversion Time for such class, and the amendments, if any, to the definition of Conversion Ratio attributable to such class. The Directors may, in their absolute discretion change the Correspondent Shares for any class of C Shares to reflect any change in the currency classes of the Ordinary Shares by notice to the holders of such class of C Shares.

3. Dividends

Notwithstanding any other provision of the Articles, the holders of any class of C Shares will be entitled to receive such dividends as the Directors may resolve to pay to such holders out of the assets attributable to such class of C Shares (as determined by the Directors).

No dividend or other distribution shall be made or paid by the Company on any of its shares between the Calculation Time and the Conversion Time (both dates inclusive) and no dividend shall be declared with a record date falling between the Calculation Time and the Conversion Time (both dates inclusive).

The Directors intend as at the date of the Prospectus to declare and pay a dividend on the C Shares in July 2013.

4. Ranking of the C Shares upon Conversion

The new Correspondent Shares arising upon Conversion shall rank *pari passu* with all other Correspondent Shares of the same class for dividends and other distributions declared, made or paid by reference to a record date falling after the relevant Calculation Time.

5. Rights as to capital

The capital and assets of the Company shall on a winding up or on a return of capital (other than by way of the repurchase or redemption of Shares by the Company) prior, in each case, to Conversion shall be applied as follows:

- (a) the Correspondent Share Surplus shall be divided amongst the holders of relevant Correspondent Shares *pro rata* to their holdings of Correspondent Shares as if the Correspondent Share Surplus comprised the assets of the Company available for distribution; and

- (b) the C Share Surplus attributable to each class of C Shares shall be divided amongst the Shareholders of such class *pro rata* according to their holdings of C Shares of that class.

6. Voting and transfer

Except as otherwise provided in the Articles (see paragraph 8 of this Part VI of the Prospectus below), the C Shares shall not carry any right to attend or vote at any general meeting of the Company.

The C Shares shall be transferable in the same manner as the Correspondent Shares and are subject to restrictions on transfer. A summary of the transfer provisions may be found at paragraph 5 in Part IX of this Prospectus.

7. Redemption

The C Shares are issued on the terms that each class of C Shares shall be redeemable by the Company in accordance with the terms in this paragraph 7 of this Part VI of this Prospectus.

At any time prior to Conversion, the Company may, at its discretion, redeem all or any of the C Shares of a particular class then in issue by agreement with any holder(s) thereof in accordance with such procedures as the Directors may determine (subject to the facility and procedures of CREST) and in consideration of the payment of such redemption price as may be agreed between the Company and the relevant holder(s) of the relevant class of C Shares.

8. Class consents and variation rights

Without prejudice to the generality of the Articles, until Conversion the consent of the holders of C Shares as a class (irrespective of whichever class of C Shares they may hold) shall be required in accordance with the Articles for, and accordingly the special rights attached to any class of C Shares shall be deemed to be varied, *inter alia*, by:

- (a) any alteration to the memorandum of incorporation of the Company or the Articles; or
- (b) the passing of any resolution to wind up the Company.

9. Class accounts

Until Conversion and without prejudice to its obligations under the Companies Law, the Company shall in relation to each class of C Shares establish a separate Class Account for that class in accordance with the Articles and, subject thereto:

- (a) procure that the Company's records and bank accounts shall be operated so that the assets attributable to the relevant class of C Shares can, at all times, be separately identified and, in particular but without prejudice to the generality of the foregoing, the Company shall procure that separate cash accounts, broker settlement accounts and investment ledger accounts shall be created and maintained in the books of the Company for the assets attributable to each class of C Shares;
- (b) allocate to the assets attributable to each class of C Shares such proportion of the income, expenses or liabilities of the Company incurred or accrued between the Issue Date and the Calculation Time (both dates inclusive) as the Directors fairly consider to be attributable to such class of C Shares; and
- (c) give appropriate instructions to the Administrator and/or the Investment Managers to manage the Company's assets so that such undertakings can be complied with by the Company.

10. Conversion

Each class of C Shares shall be converted into new Correspondent Shares at the Conversion Time in accordance with the provisions of this paragraph 10 of this Part VI of this Prospectus.

The Directors shall procure that within twenty Business Days after the Calculation Time:

- (a) the Administrator or, failing which, an independent accountant selected for the purpose by the Board, shall be requested to calculate the Conversion Ratio as at the Calculation Time and the number of new Correspondent Shares to which each holder of C Shares of the relevant class shall be entitled on Conversion; and
- (b) the Company's auditor may, if the Directors consider it appropriate, be requested to certify whether such calculations have been performed in accordance with these Articles and are arithmetically accurate;
- (c) whereupon, subject to the proviso in the definition of "**Conversion Ratio**", such calculations shall become final and binding on the Company and all Shareholders. If the auditor is unable to confirm the calculations of the Administrator or independent accountant, as described above, the Conversion shall not proceed.

The Directors shall procure that, as soon as practicable, and following such certification (if any), an announcement is made advising holders of C Shares of that class of the Conversion Time, the Conversion Ratio and the aggregate numbers of new Correspondent Shares to which holders of C Shares of that class are entitled on Conversion.

Conversion of each class of C Shares shall take place at the Conversion Time designated by the Directors for that class of C Shares. On Conversion the issued C Shares of the relevant class shall automatically convert (by redesignation or otherwise as appropriate) into such number of new Correspondent Shares as equals the aggregate number of C Shares of the relevant class in issue at the Calculation Time multiplied by the Conversion Ratio (rounded down to the nearest whole Correspondent Share).

The new Correspondent Shares of the relevant class arising upon Conversion shall be divided amongst the former holders of the relevant class of C Shares *pro rata* according to their respective former holdings of the relevant class of C Shares (provided always that the Directors may deal in such manner as they think fit with fractional entitlements to the new Correspondent Shares, including, without prejudice to the generality of the foregoing, selling or redeeming any such shares representing such fractional entitlements and retaining the proceeds for the benefit of the Company) and for such purposes any Director is hereby authorised as agent on behalf of the former holders of C Shares of the relevant class to do any other act or thing as may be required to give effect to the same including, in the case of a share in certificated form, to execute any stock transfer form and, in the case of a share in uncertificated form, to give directions to or on behalf of the former holder of C Shares of the relevant class who shall be bound by them.

Forthwith upon Conversion, any certificates relating to C Shares of the relevant class shall be cancelled and the Company shall issue to each such former holder of C Shares of the relevant class new certificates in respect of the shares of the relevant class which have arisen upon Conversion unless such former holder of C Shares of the relevant class elects to hold such shares in uncertificated form.

The Company will use its reasonable endeavours to procure that, upon Conversion the resulting Correspondent Shares are admitted to trading on the London Stock Exchange's main market for listed securities.

In connection with the issue of C Shares of any class, the Directors shall state the Specified Conversion Criteria with respect to such class in any relevant disclosure document or prospectus and in an RIS release at the time that C Shares of such class are first offered.

References to the auditors certifying any matter shall be construed to mean certification of their opinion as to such matter, whether qualified or not.

The conversion of C Shares into new Correspondent Shares at the Conversion Time is prohibited by holders who are in the United States or who are U.S. Persons. As a result, if you are located within the United States or are a U.S. Person at the Conversion Time, you will be subject to the compulsory transfer provisions as provided in the Articles.

Deemed representations at the Conversion Time

Your attention is drawn to the subscribers' warranties set out in the "purchase and transfer restrictions" in Part VIII of this Prospectus. In particular, at the Conversion Time, each holder of C Shares will be deemed to have represented, acknowledged and agreed that (i) it and the person, if any, for whose account or benefit it is holding the C Shares and receiving the new Correspondent Shares is not a U.S. Person and is not located within the United States; (ii) it acknowledges that the Company reserves the right to make inquiries of any holder of the C Shares, the new Correspondent Shares or interests therein at any time as to such person's status under U.S. federal securities laws, and to require any such person that has not satisfied

the Company that the holding by such person will not violate or require registration under U.S. federal securities laws to transfer such C Shares, new Correspondent Shares or interests immediately under the direction of the Company (which may include, but is not limited to, the execution of a power of attorney allowing the Company to effect a transfer on its behalf); and (iii) it agrees to comply with the transfer restrictions set out in the “purchase and transfer restrictions” in Part VIII of this Prospectus and will notify the Company if it is holding in contravention of such restrictions.

If the Issue had taken place as at 30 June 2012 (assuming that the Company raised net proceeds of £500,000,000), the Issue would have increased the Net Asset Value by £490,000,000. If the Issue had taken place as at 30 June 2012, the additional funds would have been held in cash and liquid securities over the period reported. The net impact on earnings would have been broadly neutral with the additional interest earned being offset by the additional variable expenses. The actual net impact would have been dependent on the interest rate the Investment Managers were able to obtain on cash and liquid securities.

The Terms and Conditions of Application relating to the Offer are set out in Part XI of this Prospectus and an Application Form and notes on how to complete such Application Form are set out in Appendix A to this Prospectus. The Terms and Conditions of Application should be read carefully before an application is made. Application Forms must be posted or delivered by hand (during normal business hours) to Capita Registrars, Corporate Actions, The Registry, 34 Beckenham Road, Beckenham, Kent BR3 4TU, so as to arrive by no later than 1100 hours on 19 March 2013. The Main Market

The Main Market is an EU regulated market. Consequently, the Company is subject to the Prospectus Rules, the Disclosure Rules and Transparency Rules and the Market Abuse Directive (as implemented in the United Kingdom). The Company is also subject to the ongoing requirements of the Listing Rules.

Scaling back and allocation

In the event that aggregate applications for Issue Shares under the Placing and the Offer were to exceed a level that the Directors determine, in their absolute discretion at the time of closing the Issue, to be the appropriate maximum size of the Issue, it would be necessary to scale back applications under the Issue. The Joint Bookrunners reserve the right, at their sole discretion, but after consultation with the Company, to scale back applications in such amounts as they consider appropriate. The parameters for any scaling back of applications for Issue Shares will be determined at the relevant time. The Company reserves the right to decline in whole or in part any application for Issue Shares pursuant to the Issue. The Offer will not be subject to scaling back in favour of the Placing. Accordingly, applicants for Issue Shares may, in certain circumstances, not be allotted the number of Issue Shares for which they have applied.

The Company will notify investors of the number of Issue Shares in respect of which their application has been successful and the results of the Issue will be announced by the Company on or around 21 March 2013 via an RIS announcement.

Subscription monies received in respect of unsuccessful applications (or to the extent scaled back) will be returned without interest at the risk of the applicant by cheque made out to the first named applicant.

General

Pursuant to anti-money laundering laws and regulations with which the Company must comply in the UK and/or Guernsey, the Company and its agents (and their agents) or the Investment Manager may require evidence in connection with any application for Issue Shares, including further identification of the applicants), before any Issue Shares are issued.

In the event that there are any significant changes affecting any of the matters described in this Prospectus or where any significant new matters have arisen after the publication of this Prospectus and prior to Admission, the Company will publish a supplementary Prospectus. The supplementary Prospectus will give details of the significant change(s) or the significant new matter(s).

The Directors (in consultation with the Joint Bookrunners) may in their absolute discretion waive the minimum application amounts in respect of any particular application for Issue Shares under the Issue.

Should the Issue be aborted or fail to complete for any reason, monies received will be returned without interest at the risk of the applicant.

Definitive certificates in respect of Issue Shares in certificated form will be dispatched by post in the week commencing 9 April 2013. Temporary documents of title will not be issued.

Clearing and settlement

Payment for the Issue Shares, in the case of the Placing, should be made in accordance with settlement instructions to be provided to placees by (or on behalf of) the Company or the Joint Bookrunners. Payment for the Issue Shares, in the case of the Offer, should be made in accordance with the Terms and Conditions of Application under the Offer in Part XI of this Prospectus and in the Application Form. To the extent that any application for Issue Shares is rejected in whole or in part (whether by scaling back or otherwise), monies received will be returned without interest at the risk of the applicant.

Issue Shares will be issued in registered form and may be held in either certificated or uncertificated form and settled through CREST from Admission. In the case of Issue Shares to be issued in uncertificated form pursuant to the Issue, these will be transferred to successful applicants through the CREST system. Accordingly, settlement of transactions in the Issue Shares following Admission may take place within the CREST system if any Shareholder so wishes.

Issue Shares issued under the Offer will be issued to successful applicants in accordance with the Terms and Conditions of Application under the Offer.

CREST is a paperless book-entry settlement system operated by Euroclear which enables securities to be evidenced otherwise than by certificates and transferred otherwise than by written instrument. CREST is a voluntary system and Shareholders who wish to receive and retain share certificates will be able to do so.

It is expected that the Company will arrange for Euroclear to be instructed on 26 March 2013 to credit the appropriate CREST accounts of the subscribers concerned or their nominees with their respective entitlements to Issue Shares. The names of subscribers or their nominees investing through their CREST accounts will be entered directly on to the share register of the Company.

The transfer of Issue Shares outside of the CREST system following the Issue should be arranged directly through CREST. However, an investor's beneficial holding held through the CREST system may be exchanged, in whole or in part, only upon the specific request of the registered holder to CREST for share certificates or an uncertificated holding in definitive registered form. If a Shareholder or transferee requests Issue Shares to be issued in certificated form and is holding such Issue Shares outside CREST, a share certificate will be despatched either to him or his nominated agent (at his risk) within 21 days of completion of the registration process or transfer, as the case may be, of the Issue Shares. Shareholders (other than U.S. Persons) holding definitive certificates may elect at a later date to hold such Issue Shares through CREST or in uncertificated form provided they surrender their definitive certificates.

Dealings

Applications will be made to the London Stock Exchange for the Issue Shares to be admitted to listing and trading on the Official List and the Main Market respectively.

It is expected that Admission will become effective and that unconditional dealings in the Issue Shares will commence at 0800 hours on 26 March 2013. Dealings in Issue Shares in advance of the crediting of the relevant stock account shall be at the risk of the person concerned.

Accordingly, the dealing price of the Issue Shares may not necessarily reflect changes in the Net Asset Value per Share.

Purchase and transfer restrictions

This Prospectus does not constitute an offer to sell, or the solicitation of an offer to acquire or subscribe for, Issue Shares in any jurisdiction where such an offer or solicitation is unlawful or would impose any unfulfilled registration, qualification, publication or approval requirements on the Company or the Investment Managers.

The Company has elected to impose the restrictions described below on the Issue and on the future trading of the Shares so that the Company will not be required to register the Issue Shares under the U.S. Securities Act and will not have an obligation to register as an investment company under the U.S. Investment Company Act and related rules, and to address certain ERISA, U.S. Tax Code and other considerations. These transfer restrictions, which will remain in effect until the Company determines in its sole discretion to remove them, may adversely affect the ability of holders of the Shares to trade such securities. Due to the restrictions described below, potential investors in the United States and U.S. Persons are advised to consult legal counsel prior to making any offer, resale, exercise, pledge or other transfer of the Shares. The Company and its agents will not be obligated to recognise any resale or other transfer of the Shares made other than in compliance with the restrictions described below.

The Issue Shares have not been and will not be registered under the U.S. Securities Act or with any securities regulatory authority of any state or other jurisdiction of the United States and the Issue Shares may not be offered, sold, resold, transferred or delivered, directly or indirectly, into or within the United States or to, or for the account or benefit of, U.S. Persons. There will be no public offer of the Issue Shares in the United States, and this document should not be distributed or forwarded into the United States or to U.S. Persons. Moreover, the Company has not been and will not be registered under the U.S. Investment Company Act and investors will not be entitled to the benefits of the U.S. Investment Company Act.

The Issue Shares are being offered and sold outside the United States to persons who are not U.S. Persons in reliance on the exemption from registration provided by Regulation S under the U.S. Securities Act.

The conversion of the C Shares into new Correspondent Shares at the Conversion Time is prohibited by holders who are in the United States or who are U.S. Persons, as set out in the section entitled “Deemed representations at the Conversion Time” in Part VI of this Prospectus.

The Shares and any beneficial interests therein may only be transferred in an offshore transaction in accordance with Regulation S: (i) to a person outside the United States who is not a U.S. Person, by prearrangement or otherwise; or (ii) to the Company or a subsidiary thereof.

Subscribers warranties

Each subscriber of Issue Shares in the Issue, each subsequent investor in the Shares, each recipient of Ordinary Shares of one class upon the conversion from any other class and each recipient of the new Correspondent Shares (as applicable) will be deemed to have represented, warranted, acknowledged and agreed as follows:

- (a) it is not a U.S. Person, is not located within the United States and is not acquiring the Issue Shares for the account or benefit of a U.S. Person;
- (b) it is acquiring the Shares in an offshore transaction meeting the requirements of Regulation S;
- (c) it acknowledges that the Shares have not been and will not be registered under the U.S. Securities Act or with any securities regulatory authority of any state or other jurisdiction of the United States and may only be transferred in an offshore transaction in accordance with Regulation S: (i) to a person outside the United States who is not a U.S. Person, by prearrangement or otherwise; or (ii) to the Company or a subsidiary thereof;
- (d) it acknowledges that the Company has not registered under the U.S. Investment Company Act and that the Company has put in place restrictions for transactions not involving any public offering in the United States, and to ensure that the Company is not and will not be required to register under the U.S. Investment Company Act;
- (e) no portion of the assets used to purchase, and no portion of the assets used to hold, the Shares or any beneficial interest therein constitutes or will constitute the assets of (i) an “employee benefit plan” as defined in Section 3(3) of ERISA that is subject to Title I of ERISA; (ii) a “plan” as defined in Section 4975 of the U.S. Tax Code, including an individual retirement account or other arrangement that is subject to Section 4975 of the U.S. Tax Code; or (iii) an entity which is deemed to hold the

assets of any of the foregoing types of plans, accounts or arrangements that is subject to Title I of ERISA or Section 4975 of the U.S. Tax Code. In addition, if an investor is a governmental, church, non-U.S. or other employee benefit plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Title I of ERISA or Section 4975 of the U.S. Tax Code, its purchase, holding, and disposition of the Shares must not constitute or result in a non-exempt violation of any such substantially similar law;

- (f) that if any Issue Shares offered and sold pursuant to Regulation S are issued in certificated form, then such certificates evidencing ownership will contain a legend substantially to the following effect unless otherwise determined by the Company in accordance with applicable law:

NB GLOBAL FLOATING RATE INCOME FUND LIMITED (THE “COMPANY”) HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. INVESTMENT COMPANY ACT OF 1940, AS AMENDED (THE “U.S. INVESTMENT COMPANY ACT”). ACCORDINGLY, THIS SECURITY MAY NOT BE OFFERED, SOLD, PLEDGED, EXERCISED OR OTHERWISE TRANSFERRED WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS.

- (g) if in the future the investor decides to offer, sell, transfer, assign or otherwise dispose of the Shares, it will do so only in compliance with an exemption from the registration requirements of the U.S. Securities Act and under circumstances which will not require the Company to register under the U.S. Investment Company Act. It acknowledges that any sale, transfer, assignment, pledge or other disposal made other than in compliance with such laws and the above stated restrictions will be subject to the compulsory transfer provisions as provided in the Articles;
- (h) it is purchasing the Shares for its own account or for one or more investment accounts for which it is acting as a fiduciary or agent, in each case for investment only, and not with a view to or for sale or other transfer in connection with any distribution of the Shares in any manner that would violate the U.S. Securities Act, the U.S. Investment Company Act or any other applicable U.S. securities laws;
- (i) it acknowledges that the Company reserves the right to make inquiries of any holder of the Shares or interests therein at any time as to such person’s status under U.S. securities laws and to require any such person that has not satisfied the Company that holding by such person will not violate or require registration under U.S. securities laws to transfer such Issue Shares or interests in accordance with the Articles;
- (j) it acknowledges that the Company may receive a list of participants holding positions in its securities from one or more book-entry depositories;
- (k) it is entitled to acquire the Shares under the laws of all relevant jurisdictions which apply to it, it has fully observed all such laws and obtained all governmental and other consents which may be required thereunder and complied with all necessary formalities and it has paid all issue, transfer or other taxes due in connection with its acceptance in any jurisdiction of the Shares and that it has not taken any action, or omitted to take any action, which may result in the Company, the Investment Managers, Neuberger Berman LLC, the Joint Bookrunners or PSL, or their respective directors, officers, agents, employees and advisers being in breach of the laws of any jurisdiction in connection with the Issue or its acceptance of participation in the Issue;
- (l) it has received, carefully read and understands this Prospectus, and has not, directly or indirectly, distributed, forwarded, transferred or otherwise transmitted this Prospectus or any other presentation or offering materials concerning the Shares into or within the United States or to any U.S. Persons, nor will it do any of the foregoing;
- (m) if it is acquiring any Shares as a fiduciary or agent for one or more accounts, the investor has sole investment discretion with respect to each such account and full power and authority to make such foregoing representations, warranties, acknowledgements and agreements on behalf of each such account; and

- (n) the Company, the Investment Managers, Neuberger Berman LLC, the Joint Bookrunners, PSL and their respective directors, officers, agents, employees, advisers and others will rely upon the truth and accuracy of the foregoing representations, warranties, acknowledgments, and agreements. This paragraph provides general guidance for individual Shareholders who are resident and ordinarily resident for United Kingdom tax purposes and who hold Shares as investments and not as trading stock.

UK Offshore Fund Rules

The Directors have been advised that, under current law, the Company should not, and each separate class of Shares in the Company should not, be an "offshore fund" for the purposes of United Kingdom taxation and that the legislation introduced with effect from 1 December 2009 which is contained in Part 8 of the Taxation (International and Other Provisions) Act 2010, should not apply.

Accordingly, Shareholders (other than those holding Shares as dealing stock, who are subject to separate rules) who are resident or ordinarily resident in the United Kingdom, or who carry on business in the United Kingdom through a branch, agency or permanent establishment with which their investment in the Company is connected, may, depending on their circumstances and subject as mentioned below, be liable to United Kingdom tax on chargeable gains realised on the disposal of their Shares (which will include a redemption and on final liquidation of the Company).

Tax on Chargeable Gains

A disposal of Shares (which will include a redemption) by a Shareholder who is resident or, in the case of an individual, ordinarily resident in the United Kingdom for United Kingdom tax purposes or who is not so resident but carries on business in the United Kingdom through a branch, agency or

permanent establishment with which their investment in the Company is connected may give rise to a chargeable gain or an allowable loss for the purposes of UK taxation of chargeable gains or capital gains, depending on the Shareholder's circumstances and subject to any available exemption or relief. For such individual Shareholders capital gains tax at the rate of tax at 18 per cent. (for basic rate taxpayers) or 28 per cent. (for higher or additional rate taxpayers) will be payable on any gain and for Shareholders that are bodies corporate any gain will be within the charge to corporation tax. Individuals may benefit from certain reliefs and allowances (including a personal annual exemption allowance, which presently exempts the first £10,600 of gains from tax) depending on their circumstances. Shareholders which are bodies corporate resident in the United Kingdom for taxation purposes will benefit from indexation allowance which, in general terms, increases the chargeable gains tax base cost of an asset in accordance with the rise in the retail prices index.

The conversion of Shares of one class into Shares of another class should not result in a disposal of Shares for the purposes of United Kingdom taxation of chargeable gains, provided the economic interest held by the Shareholder remains the same after the transaction. Instead, the redesignated Shares should be treated as the same asset as the original holding of Shares, acquired at the same time and for the same chargeable gains tax base cost as the original holding.

Dividends

Individual Shareholders resident in the United Kingdom for tax purposes will be liable to UK income tax in respect of dividends or other income distributions of the Company. An individual Shareholder resident in the UK for tax purposes and in receipt of a dividend from the Company will, provided they own less than 10 per cent. of the Shares, be entitled to claim a non-repayable dividend tax credit equal to one-ninth of the dividend received.

The effect of the dividend tax credit would be to extinguish any further tax liability for eligible basic rate taxpayers (who currently pay tax at the dividend ordinary rate of 10 per cent.). The effect for current eligible higher rate taxpayers (who pay tax at the current dividend upper rate of 32.5 per cent.) would be to reduce their effective tax rate to 25 per cent. of the cash dividend received.

From 6 April 2010, United Kingdom resident individuals with income in excess of £150,000 will pay 42.5 per cent. tax on dividends received (reduced to 36.11 per cent. for eligible taxpayers as a result of applying the tax credit).

Under legislative changes announced the rate of taxation for individuals earning taxable income in excess of £150,000 per annum will decrease from 50% to 45% with effect from 6 April 2013. The rate of tax on the gross dividend for an individual UK Shareholder who exceeds the threshold for the new rate will decrease to 37.5%.

The top rate of tax on dividends for individuals not earning taxable income in excess of £150,000 per annum remains at 32.5%.

UK Shareholders within the charge to UK corporation tax may be liable for UK corporation tax (the main rate of UK corporation tax is currently 23%, reducing to 22% by 2014) on the receipt of the dividend. However, Finance Act 2009 introduced an exemption from corporation tax on foreign dividends received by UK resident companies, which may exempt such UK Shareholders from UK taxation on dividends paid by the Company, depending on their circumstances and subject to certain conditions being satisfied.

Scrip Dividends

Shareholders resident in the United Kingdom for tax purposes and who elect to receive a scrip dividend alternative to any cash dividend declared by the Company should not be liable to UK income tax or corporation tax upon receipt of any bonus shares issued pursuant to the scrip dividend alternative ("**Bonus Shares**"). Such Shareholders should also not be treated as making a disposal for the purposes of United Kingdom capital gains tax or corporation tax on chargeable gains at the time that such Bonus Shares are issued. Instead the issue of Bonus Shares should be treated as a reorganisation of the share capital of the Company and accordingly the Bonus Shares and the original holding of Shares held by the Shareholder should be treated as the same asset, acquired at the same time and for the same chargeable gains tax base cost as the original holding of Shares.

There will be no allowable expenditure for chargeable gains tax purposes arising in respect of the Bonus Shares. As a result of the issue of Bonus Shares the United Kingdom resident Shareholder's original base cost in his or her Shares will be apportioned between his or her original holding of Shares and the Bonus Shares by reference to their respective market values on the day on which any of the Shares held by the Shareholder following the scrip issue are disposed of.

Stamp duty and Stamp Duty Reserve Tax ("SDRT")

No UK stamp duty or SDRT will arise on the issue of C Shares. No UK stamp duty will be payable on a transfer of Shares, provided that all instruments effecting or evidencing the transfer (or all matters or things done in relation to the transfer) are not executed in the United Kingdom and no matters or actions relating to the transfer are performed in the United Kingdom.

Provided that the Shares are not registered in any register kept in the United Kingdom by or on behalf of the Company and that the Shares are not paired with shares issued by a Company incorporated in the United Kingdom, any agreement to transfer the Shares will not be subject to UK SDRT.

ISAs and SSAS/SIPPs

Investors resident in the United Kingdom who are considering acquiring C Shares are recommended to consult their own tax and/or investment advisers in relation to the eligibility of the C Shares for ISAs and SSAS/SIPPs.

C Shares acquired pursuant to the Offer (but not the Placing) should be eligible for inclusion in a stocks and shares ISA. On Admission, C Shares acquired in the market should be eligible for inclusion in a stocks and shares ISA, subject to applicable subscription limits.

The annual ISA investment allowance is £11,280 for the tax year 2012-2013. Up to £5,640 of that allowance can be invested as cash with one provider. The remainder of the £11,280 can be invested in a stocks and shares ISA with either the same or another provider.

The C Shares should be eligible for inclusion in a SSAS or SIPP, subject to the discretion of the trustees of the SSAS or SIPP, as the case may be.

Other United Kingdom Tax Considerations: Controlled Foreign Companies (CFCs)

United Kingdom resident companies having an interest in the Company, such that 25 per cent. or more of the Company's profits for an accounting period could be apportioned to them, may be liable to United Kingdom corporation tax in respect of their share of the Company's undistributed profits in accordance with the provisions relating to controlled foreign companies. These provisions only apply if the company is controlled by United Kingdom residents. Investors should be aware that the controlled foreign companies regime has significantly changed and came into force on 1 January 2013 following a long and detailed period of consultation.

Transfer of Assets Abroad

Individuals ordinarily resident in the United Kingdom should note that Chapter II of Part XVIII of the Income Tax Act 2007, which contains provisions for preventing avoidance of income tax by transactions resulting in the transfer of income to persons (including companies) abroad, may render them liable to taxation in respect of any undistributed income and profits of the Company.

Close Company Provisions

The attention of Shareholders resident or ordinarily resident in the United Kingdom is drawn to the provisions of section 13 of the Taxation of Chargeable Gains Act 1992 under which, in certain circumstances, a portion of capital gains made by the Company can be attributed to a Shareholder who holds, alone or together with associated persons, more than 10 per cent. of the Shares.

Transactions in Securities

The attention of Shareholders is drawn to anti-avoidance legislation in Chapter 1, Part 13 of the Income Tax Act 2007 and Part 15 of the Corporation Tax Act 2010 that could apply if Shareholders are seeking to obtain tax advantages in prescribed conditions.

Guernsey

(i) **The Company**

The Company has applied for and has been granted exempt company status for Guernsey tax purposes. Exemption must be applied for annually and will be granted, subject to the payment of an annual fee which is currently fixed at £600, provided that it continues to qualify under the applicable legislation for exemption. It is the intention of the Directors to conduct the affairs of the Company so as to ensure that it continues to qualify for the exemption.

As an exempt company, the Company will be treated as not being resident in Guernsey for Guernsey tax purposes. Under current law and practice in Guernsey, the Company will only be liable to tax in Guernsey in respect of income arising or accruing in Guernsey, other than bank deposit interest. It is not anticipated that any income other than bank interest will arise in Guernsey and therefore the Company is not expected to incur any additional liability to Guernsey tax.

In the absence of exempt status, the Company would be treated as resident in Guernsey for Guernsey tax purposes and would be subject to the standard company rate of tax, currently zero per cent.

Guernsey currently does not levy taxes upon capital inheritances, capital gains gifts, sales or turnover (unless the varying of investments and the turning of such investments to account is a business or part of a business), nor are there any estate duties (save for registration fees and *ad valorem* duty for a Guernsey Grant of Representation where the deceased dies leaving assets in Guernsey which require presentation of such a Grant).

No stamp duty or other taxes are chargeable in Guernsey on the issue, transfer, disposal, conversion or redemption of Shares.

In keeping with its ongoing commitment to meeting international standards, the States of Guernsey has completed a review of its corporate income tax regime. During the course of the review an announcement was made in relation to the removal of certain “deemed distribution” provisions which are not relevant to tax exempt companies. In addition, although the standard rate for corporate income tax will remain at zero per cent, with effect from 1 January 2013 the company intermediate income tax rate of ten per cent will be extended to income arising from the carrying on of business as a licensed fiduciary (in respect of regulated activities), a licensed insurer (in respect of domestic insurance business) and a licensed insurance intermediary and a licensed insurance manager.

No changes that would impact the Company are expected to the exempt company regime.

(ii) **Shareholders**

Shareholders who are resident for tax purposes in Guernsey (which includes Alderney and Herm) will incur Guernsey income tax at the applicable rate on any dividends paid on Shares owned by them but will suffer no deduction of tax by the Company from any such dividends paid by the Company where the Company is granted exempted status. The Company is required to provide the Director of Income Tax in Guernsey such particulars relating to any distribution paid to Guernsey resident Shareholders as the Director of Income Tax may require, including the names and addresses of the Guernsey resident Shareholders, the gross amount of any distribution paid and the date of the payment. Shareholders resident in Guernsey should note that where income is not distributed but is accumulated, then a tax charge will not arise until the holding is disposed of. On disposal the element of the proceeds relating to the accumulated income will have to be determined.

The Director of Income Tax can require the Company to provide the name and address of every Guernsey resident who, on a specified date, has a beneficial interest in Shares in the Company, with details of the interest.

In the case of Shareholders who are not resident in Guernsey for tax purposes, the Company's distributions, whether paid as cash or as scrip dividend, can be paid to such Shareholders without deduction of Guernsey tax nor will the Company be required to withhold Guernsey tax on such distributions.

Shareholders are not subject to tax in Guernsey as a result of purchasing, owning or disposing of Shares or either participating or choosing not to participate in a redemption of Shares. There will be no Guernsey tax on the conversion of Shares of one class into Shares of another class.

(iii) Implementation of EU Savings Directive in Guernsey

Although not a Member State of the European Union, Guernsey, in common with certain other jurisdictions, entered into bilateral agreements with EU Member States on the taxation of savings income. From 1 July 2011 paying agents in Guernsey must automatically report to the Director of Income Tax in Guernsey any interest payment to individuals resident in the contracting EU Member States which falls within the scope of the EU Savings Directive (2003/48/EC) (the “**EU Savings Directive**”) as applied in Guernsey. However, whilst such interest payments may include distributions from the proceeds of shares or units in certain collective investment schemes which are, or are equivalent to, UCITS, in accordance with EC Directive 85/611/EEC (as recast by EC Directive 2009/65/EC (recast)) and guidance notes issued by the States of Guernsey on the implementation of the bilateral agreements, the Company should not be regarded as, or as equivalent to, a UCITS. Accordingly, any payments made by the Company to Shareholders will not be subject to reporting obligations pursuant to the agreements between Guernsey and EU Member States to implement the EU Savings Directive in Guernsey.

The operation of the EU Savings Directive is currently under review by the European Commission and a number of changes have been outlined which, if agreed, will significantly widen its scope. These changes could lead to the Company having to comply with the EU Savings Directive in the future.

(iv) FATCA (Foreign Account Tax Compliance Act)

It is expected that rules will be introduced in Guernsey to implement FATCA or alternatively that Guernsey may enter into an Intergovernmental Agreement with the US under which the Company may comply with FATCA by reporting to Guernsey’s domestic tax authority relevant information in relation to certain Shareholders which will be shared with the IRS.

If any Shareholder is in doubt as to his taxation position, he is strongly recommended to consult an independent professional adviser without delay.

5. Memorandum and Articles

5.1 Objects

The memorandum of incorporation of the Company provides that the objects of the Company are unrestricted.

5.2 Dividends and other distributions

- 5.2.1 Subject to the rights of any Shares which may be issued with special rights or privileges, the Shares of each class carry the right to receive all income of the Company attributable to the Shares, and to participate in any distribution of such income made by the Company, *pro rata* to the relative Net Asset Values of each of the classes of Shares, and within each such class such income shall be divided *pari passu* among the holders of Shares of that class in proportion to the number of Shares of such class held by them.
- 5.2.2 The Directors may from time to time authorise dividends and distributions to be paid to Shareholders in accordance with the procedure set out in the Companies Law and subject to any Shareholder’s rights attaching to their Shares. The amount of such dividends or distributions paid in respect of one class may be different from that of another class.
- 5.2.3 All unclaimed dividends and distributions may be invested or otherwise made use of by the Board for the benefit of the Company until claimed. All dividends unclaimed on the earlier of (i) a period of seven years after the date when it first became due for payment and (ii) the date on which the Company is wound-up, shall be forfeited and shall revert to the Company without the necessity for any declaration or other action on the part of the Company.
- 5.2.4 Notwithstanding any other provision of the Articles, the holders of any class of C Shares will be entitled to receive such dividends as the Directors may resolve to pay to such holders out of the assets attributable to such class of C Shares (as determined by the Directors).

5.3 Voting

- 5.3.1 Subject to any special rights, restrictions or prohibitions as regards voting for the time being attached to any Shares, holders of Shares shall have the right to receive notice of and to attend and vote at general meetings of the Company.
- 5.3.2 Each Shareholder being present in person or by proxy or by a duly authorised representative (if a corporation) at a meeting shall upon a show of hands have one vote and upon a poll each such holder present in person or by proxy or by a duly authorised representative (if a corporation) shall, in the case of a separate class meeting, have one vote in respect of each Share held by him and, in the case of a general meeting of all Shareholders, have
- (A) one vote in respect of each US Dollar Share held by him;
 - (B) 1.6 votes in respect of each Sterling Share held by him; and
 - (C) in respect of a Share of a class denominated in any currency other than U.S. Dollars or Sterling held by him, such number of votes per Share of such class as shall be determined by the Directors in their absolute discretion upon the issue for the first time of Shares of the relevant class.
- 5.3.3 B Shares and, save in certain limited circumstances, C Shares will not carry the right to attend and receive notice of any general meetings of the Company, nor will they carry the right to vote at such meetings.

5.4 Capital

- 5.4.1 As to a winding-up of the Company or other return of capital (other than by way of a repurchase or redemption of Shares in accordance with the provisions of the Articles and the Companies Law, the surplus assets of the Company attributable to the Shares remaining after payment of all creditors shall, subject to the rights of any Shares that may be issued with special rights or privileges, be divided amongst the holders of Shares of each class *pro rata* to the relative Net Asset Values of each of the classes of Shares and within each such class such assets shall be divided *pari passu* among the holders of Shares of that class in proportion to the number of Shares of that class held by them.
- 5.4.2 The manner in which distributions of capital proceeds realised from investments (net of fees and expenses) and attributable to the Shares (“**Capital Proceeds**”) shall be effected shall, subject to compliance with the Companies Law, be determined by the Directors in their absolute discretion and, once determined, shall be notified to Shareholders by way of a RIS announcement.
- 5.4.3 Without restricting the discretion of the Directors described in paragraph 5.4.2, the Directors may effect distributions of Capital Proceeds by:
- (A) issuing B Shares of a particular class to holders of Shares of a particular class *pro rata* to their holdings of Shares of such class (such B Shares to be fully paid-up out of such class of Shares’ *pro rata* share of such Capital Proceeds calculated by reference to the relative Net Asset Values of each of the classes of Shares), which such B Shares shall be compulsorily redeemed, and the redemption proceeds (being equal to the amount paid-up on such shares) paid to the holders of such B Shares, on such terms and in such manner as the Directors may determine; or
 - (B) by compulsorily redeeming a proportion of each Shareholder’s holding of Shares and paying the redemption proceeds to Shareholders on such terms and in such manner as the Directors may determined; or
 - (C) in such other manner as may be lawful.
- 5.4.4 The capital and assets of the Company shall on a winding up or on a return of capital (other than by way of the repurchase or redemption of Shares by the Company) prior, in each case, to Conversion shall be applied as follows:
- (A) the Correspondent Share Surplus shall be divided amongst the holders of relevant Correspondent Shares *pro rata* to their holdings of Correspondent Shares as if the Correspondent Share Surplus comprised the assets of the Company available for distribution; and
 - (B) the C Share Surplus attributable to each class of C Shares shall be divided amongst the Shareholders of such class *pro rata* according to their holdings of C Shares of that class.

5.5 Pre-emption rights

There are no provisions of Guernsey law which confer rights of pre-emption in respect of the allotment and issue of shares in a Guernsey company. However, the Articles of Incorporation provide that the Company is not permitted to allot (for cash) “equity securities” (which include the allotment and issue of Ordinary Shares or C Shares or rights to subscribe for, or convert securities into, Ordinary Shares or C Shares) or sell (for cash) any such equity securities held in treasury, unless it shall first have offered to allot to each existing holder of redeemable ordinary shares in the Company on the same or more favourable terms a proportion of those securities the aggregate value of which (at the proposed issue price) is as nearly as practicable equal to the proportion of the total Net Asset Value of the Company represented by the redeemable ordinary shares held by such shareholder. These pre-emption rights may be excluded and disapplied or modified by special resolution of the Ordinary Shareholders.

5.6 Variation of rights

5.6.1 Whenever the capital of the Company is divided into different classes of shares, the rights attached to any class of shares may (unless otherwise provided by the terms of issue of the shares of that class) be varied or abrogated:

- (A) with the consent in writing of the holders of more than half in number of the issued shares of that class; or
- (B) with the sanction of an Ordinary Resolution passed at a separate meeting of the holders of the shares of that class.

5.6.2 The necessary quorum at any separate class meeting shall be two persons present holding or representing by proxy at least one-third in number of the issued shares of that class (provided that if any such meeting is adjourned for lack of a quorum, the quorum at the reconvened meeting shall be one person present holding shares of that class or his proxy) provided always that where the class has only one member, that member shall constitute the necessary quorum and any holder of shares of the class in question may demand a poll.

5.6.3 The special rights conferred upon the holders of any shares or class of shares issued with preferred, deferred or other rights shall (unless otherwise expressly provided by the conditions of issue of such shares) be deemed not to be varied by (a) the creation or issue of further shares ranking *pari passu* therewith or (b) the purchase or redemption by the Company of any of its shares (or the holding of such shares as treasury shares).

5.7 Disclosure of interests in Shares

5.7.1 The Directors shall have power by notice in writing (a “**Disclosure Notice**”) to a Shareholder to disclose to the Company the identity of any person other than the Shareholder (an “**interested party**”) who has any interest (whether direct or indirect) in the Shares held by the Shareholder and the nature of such interest or has been so interested at any time during the 3 years immediately preceding the date on which the Disclosure Notice is issued. Any such Disclosure Notice shall require any information in response to such Disclosure Notice to be given in writing to the Company within 28 days of the date of service (or 14 days if the Shares concerned represent 0.25 per cent. or more of the number of Shares in issue of the class of Shares concerned).

5.7.2 If any member is in default in supplying to the Company the information required by the Company within the prescribed period (which is 28 days after service of the notice or 14 days if the Shares concerned represent 0.25 per cent. or more in number of the issued Shares of the relevant class), or such other reasonable period as the Directors may determine, the Directors in their absolute discretion may serve a direction notice on the member (a “**Direction Notice**”). The Direction Notice may direct that in respect of the Shares in respect of which the default has occurred (the “**Default Shares**”) and any other Shares held by the member shall not be entitled to vote in general meetings or class meetings. Where the Default Shares represent at least 0.25 per cent. in number of the class of Shares concerned, the Direction Notice may additionally direct that dividends on such Shares will be retained by the Company (without interest) and that no transfer of the Default Shares (other than a transfer authorised under the Articles) shall be registered until the default is rectified.

- 5.7.3 The Directors may be required to exercise their power to require disclosure of interested parties on a requisition of Shareholders holding not less than 1/10th of the total voting rights attaching to the shares in issue at the relevant time.

5.8 Transfer of Shares

- 5.8.1 Subject to the Articles (and the restrictions on transfer contained therein), a Shareholder may transfer all or any of his Shares in any manner which is permitted by the Companies Law or in any other manner which is from time to time approved by the Board.
- 5.8.2 A transfer of a certificated Share shall be in the usual common form or in any other form approved by the Board. An instrument of transfer of a certificated Share shall be signed by or on behalf of the transferor and, unless the Share is fully paid, by or on behalf of the transferee.
- 5.8.3 The Articles of Incorporation provide that the Board has power to implement such arrangements as it may, in its absolute discretion, think fit in order for any class of Shares to be admitted to settlement by means of the CREST UK system. If the Board implements any such arrangements, provision of the Articles will apply or have effect to the extent that it is in any respect inconsistent with:
- (A) the holding of Shares of the relevant class in uncertificated form;
 - (B) the transfer of title to Shares or of the relevant class by means of the CREST UK system; or
 - (C) the CREST Guernsey Requirements.
- 5.8.4 Where any class of Shares is, for the time being, admitted to settlement by means of the CREST UK system such securities may be issued in uncertificated form in accordance with and subject to the CREST UK Guernsey Regulations. Unless the Board otherwise determines, Shares held by the same holder or joint holders in certificated form and uncertificated form will be treated as separate holdings. Shares may be changed from uncertificated to certificated form, and from certificated to uncertificated form, in accordance with and subject to the CREST Guernsey Regulations. Title to such of the Shares as are recorded on the register as being held in uncertificated form may be transferred only by means of the CREST UK system.
- 5.8.5 The Board may, in its absolute discretion and without giving a reason, refuse to register a transfer of any Share in certificated form or uncertificated form subject to the Articles which is not fully paid or on which the Company has a lien provided that, in the case of a Share, this would not prevent dealings in the Shares of that class from taking place on an open and proper basis on the London Stock Exchange.
- 5.8.6 In addition, the Board may decline to transfer, convert or register a transfer of any Share in certificated form or (to the extent permitted by the CREST Guernsey Requirements) uncertificated form: (a) if it is in respect of more than one class of Shares, (b) if it is in favour of more than four joint transferees, (c) if applicable, if it is delivered for registration to the registered office of the Company or such other place as the Board may decide, not accompanied by the certificate for the Shares to which it relates and such other evidence of title as the Board may reasonably require, or (d) the transfer is in favour of any Non-Qualified Holder.
- 5.8.7 If any Shares are owned directly, indirectly or beneficially by a person believed by the Board to be a Non-Qualified Holder, the Board may give notice to such person requiring him either (i) to provide the Board within 30 days of receipt of such notice with sufficient satisfactory documentary evidence to satisfy the Board that such person is not a Non-Qualified Holder or (ii) to sell or transfer his Shares to a person who is not a Non-Qualified Holder within 30 days and within such 30 days to provide the Board with satisfactory evidence of such sale or transfer pending such sale or transfer, the Board may suspend the exercise of any voting or consent rights and rights to receive notice of or attend any meeting of the Company and any rights to receive dividends or other distributions with respect to such Shares. Where condition (i) or (ii) is not satisfied within 30 days after the serving of the notice, the person will be deemed, upon the expiration of such 30 days, to have forfeited his Shares. If the Board in its absolute discretion so determines, the Company may dispose of the Shares at the best price reasonably obtainable and pay the net proceeds of such disposal to the former holder.
- 5.8.8 The Board of Directors may decline to register a transfer of an uncertificated Share which is traded through the CREST UK system in accordance with the CREST rules where, in the case of a transfer to joint holders, the number of joint holders to whom uncertificated Shares is to be transferred exceeds four.

5.9 General meetings

- 5.9.1 The first general meeting (being an annual general meeting) of the Company shall be held within such time as may be required by the Companies Law and thereafter general meetings (which are annual general meetings) shall be held at least once in each calendar year and in any event, no more than 18 months since the last annual general meeting. All general meetings (other than annual general meetings) shall be called extraordinary general meetings. Extraordinary general meetings and annual general meetings shall be held in Guernsey or such other place outside the United Kingdom as may be determined by the Board from time to time.
- 5.9.2 The notice must specify the date, time and place of any general meeting and the text of any proposed special and ordinary resolution. Any general meeting shall be called by at least ten clear days' notice. A general meeting may be deemed to have been duly called by shorter notice if it is so agreed by all the members entitled to attend and vote thereat. The accidental omission to give notice of a meeting to, or the non-receipt of notice of a meeting by, any person entitled to receive such notice shall not invalidate the proceedings at the meeting.
- 5.9.3 The Shareholders may require the Board to call an extraordinary general meeting in accordance with the Companies Law.

5.10 Restrictions on voting

Unless the Board otherwise decides, no member shall be entitled to vote at any general meeting or at any separate meeting of the holders of any class of Shares in the Company, either in person or by proxy, in respect of any Share held by him unless all calls and other sums presently payable by him in respect of that Share have been paid. No member of the Company shall, if the Directors so determine, be entitled in respect of any Share held by him to attend or vote (either personally or by representative or by proxy) at any general meeting or separate class meeting of the Company or to exercise any other right conferred by membership in relation to any such meeting if he or any other person appearing to be interested in such Shares has failed to comply with a Disclosure Notice (see paragraph 5.7.1 above) within 14 days, in a case where the Shares in question represent at least 0.25 per cent. of their class, or within 28 days, in any other case, from the date of such Disclosure Notice. These restrictions will continue until the information required by the notice is supplied to the Company or until the Shares in question are transferred or sold in circumstances specified for this purpose in the Articles.

5.11 Appointment, retirement and disqualification of Directors

- 5.11.1 Unless otherwise determined by the Shareholders by ordinary resolution, the number of Directors shall not be less than two and there shall be no maximum number. At no time shall a majority of the Board be resident in the UK for UK tax purposes.
- 5.11.2 A Director need not be a Shareholder. A Director who is not a Shareholder shall nevertheless be entitled to attend and speak at Shareholders' meetings.
- 5.11.3 Subject to the Articles, Directors may be appointed by the Board (either to fill a vacancy or as an additional Director). No person other than a Director retiring at a general meeting shall, unless recommended by the Directors, be eligible for election by the Company to the office of Director unless not less than seven and not more than 42 clear days before the date appointed for the meeting there shall have been left at the Company's registered office (or, if an electronic address has been specified by the Company for such purposes, sent to the Company's electronic address) notice in writing signed by a Shareholder who is duly qualified to attend and vote at the meeting for which such notice is given of his intention to propose such person for election together with notice in writing signed by that person of his willingness to be elected, specifying his tax residency status and containing a declaration that he is not ineligible to be a Director in accordance with the Companies Law.
- 5.11.4 No person shall be or become incapable of being appointed a Director, and no Director shall be required to vacate that office, by reason only of the fact that he has attained the age of 70 years or any other age.
- 5.11.5 Subject to the Articles, at each annual general meeting of the Company, any Director (i) who has been appointed by the Board since the last annual general meeting, (ii) who held office at the time of the two preceding annual general meetings and who did not retire at either of them, or (iii) who has

held office with the Company, other than employment or executive office, for a continuous period of nine years or more at the date of the meeting, shall retire from office and may offer himself for election or re-election by the Shareholders.

- 5.11.6 A Director who retires at an annual general meeting may, if willing to continue to act, be elected or re-elected at that meeting. If he is elected or re-elected he is treated as continuing in office throughout. If he is not elected or re-elected, he shall remain in office until the end of the meeting or (if earlier) when a resolution is passed to appoint someone in his place or when a resolution to elect or re-elect the Director is put to the meeting and lost.
- 5.11.7 A Director may resign from office as a Director by giving notice in writing to that effect to the Company at its registered office, which notice shall be effective upon such date as may be specified in the notice, failing which, upon delivery to the registered office.

Sponsor and Placing Agreement

6.1 The Sponsor and Placing Agreement dated on or about the date of this Prospectus between Oriel, Dexion, the Company, the Directors and the Investment Manager whereby the Company has agreed, subject to certain conditions that are typical for an agreement of this nature, the last condition being Admission, to issue the Shares to be issued pursuant to the Issue at the Issue Price. Oriel and Dexion have agreed, subject to certain conditions that are typical for an agreement of this nature, the last condition being Admission, to use reasonable endeavours to procure subscribers for the Shares to be issued under the Placing at the Issue Price. The Placing will not be underwritten.

In consideration for the provision of their services under the Sponsor and Placing Agreement, the Company will pay placing commissions to Oriel and Dexion together with any VAT chargeable thereon. Notwithstanding that each of Oriel and Dexion may, for certain purposes, be acting (as agent or otherwise) for the Company in connection with the Placing, they may retain any commissions, fees or other amounts payable to them by the Company and any other benefits whatsoever for their own respective accounts.

The obligations of the Company to issue Shares and the obligations of Oriel and Dexion to use reasonable endeavours to procure subscribers for the Shares to be issued under the Placing, are subject to conditions, including, amongst others, Admission occurring by not later than 0800 hours on 26 March 2013 or such later time and/or date as Oriel and Dexion may agree with the Company and the Sponsor and Placing Agreement not having been terminated. Oriel and Dexion may terminate the Sponsor and Placing Agreement in certain circumstances that are typical for an agreement of this nature prior to Admission. These circumstances include the breach by the Company or the Investment Manager of the warranties given pursuant to the Sponsor and Placing Agreement, the occurrence of certain material adverse changes in the condition (financial or otherwise), prospects or earnings of the Company, and certain adverse changes in financial, political or economic conditions.

The Company has agreed to pay by way of reimbursement to Oriel and Dexion, any stamp duty or stamp duty reserve tax arising on the issue of the Shares by them under the Issue and the Company has agreed to pay or cause to be paid (together with any related value added tax) certain costs, charges, fees and expenses of, or in connection with, or incidental to, amongst others, the Issue, Admission or the other arrangements contemplated by the Sponsor and Placing Agreement.

The Company and the Investment Manager have given certain representations, warranties, undertakings and indemnities to Oriel and Dexion.

The Company has undertaken to Oriel and Dexion in the Sponsor and Placing Agreement that it will not, and each of the Directors has undertaken to procure that the Company will not, during the period beginning at the date of the Sponsor and Placing Agreement and continuing to and including the date 365 days after the date of Admission, without the prior written consent of Oriel and Dexion, offer, issue, lend, sell or contract to sell, grant options in respect of or otherwise dispose of, directly or indirectly any Shares or any securities convertible into, or exchangeable for, or enter into any transaction with the same economic effect as, or agree to do any of the foregoing (other than the Shares issued pursuant to the Issue).

Each of the Company, the Directors and the Investment Manager has undertaken to Oriel and Dexion in the Sponsor and Placing Agreement that he/it will not make or despatch (and will not authorise any person to make or despatch) any public announcement or communication concerning the Group or the Issue or otherwise relating to the assets, liabilities, profits, losses, financial or trading conditions of the

Group which is or may be material in the context of the Group or the Issue or the issue, offer, or sale of the Shares at any time between the date of the Sponsor and Placing Agreement and the date 180 days after the publication of this Prospectus without having first furnished to Oriel and Dexion a copy of each such proposed announcement or communication as far in advance of the announcement as reasonably practicable to enable it to comment thereon and to consult with it and having had Oriel and Dexion's written consent as to its contents and the timing and manner of its release.

Oriel and Dexion have agreed that in relation to any amount recoverable from the Company and the Investment Manager under the indemnities contained in the Sponsor and Placing Agreement Oriel and Dexion will claim first against the Company and will only claim against the Investment Manager to the extent that Oriel and/or Dexion do not recover the relevant loss in full from the Company, provided that this does not restrict or prevent Oriel and/or Dexion from making a claim against the Investment Manager where (a) Oriel and Dexion each in its good faith opinion believes that it will not be able to recover the relevant loss in full from the Company (including as a result of the actual or reasonably anticipated insolvency of the Company) or (b) the relevant loss results from the breach by the Investment Manager of certain warranties, or any of its other obligations under the Sponsor and Placing Agreement.

The Sponsor and Placing Agreement is governed by English law.

Investment Management Agreement

- 6.2 The Company and the Investment Manager have entered into an investment management agreement, dated 18 March 2011 (the “**Investment Management Agreement**”), pursuant to which the Investment Manager has been given overall responsibility for the discretionary management of the Company's assets (including uninvested cash) in accordance with the Company's investment objectives and policy.

Fees and expenses on termination

6.2.4 If notice to terminate the Investment Management Agreement is served by the Company on the Investment Manager at any time during the 18 month period from IPO Admission, the Investment Manager shall be entitled to be paid by the Company an amount equal to any costs and expenses incurred by the Company in connection with the Issue that are borne by the Investment Manager.

- 6.2 Such personal data held is used by those parties in relation to the Placing and to maintain a register of the Shareholders and mailing lists and this may include sharing such data with third parties in one or more of the countries mentioned below when (a) effecting the payment of dividends and redemption proceeds to Shareholders (in each case, where applicable) and, if applicable, the payment of commissions to third parties and (b) filing returns of Shareholders and their respective transactions in shares with statutory bodies and regulatory authorities.
- 6.3 The countries referred to above include, but need not be limited to, those in the European Economic Area or the European Union and any of their respective dependent territories overseas, Argentina, Australia, Brazil, Canada, Hong Kong, Hungary, Japan, New Zealand, Singapore, South Africa, Switzerland and the United States.
- 6.4 By becoming registered as a holder of Issue Shares in the Company a person becomes a data subject (as defined in the DP Law) and is deemed to have consented to the processing by the Company or its Registrar or the Joint Bookrunners or PSL of any personal data relating to them in the manner described above.

7. Miscellaneous

- 7.1 PSL is acting as receiving agent for Dexion in connection with the Placing and for no-one else and it will not treat a Placee or any other person as its customer by virtue of such application being accepted or owe a Placee or any other person any duties or responsibilities concerning the price of Issue Shares or concerning the suitability of Issue Shares for a Placee or for any other person or be responsible to Placee or for any other person for providing the protections afforded to its customers;
- 7.2 The rights and remedies of Oriel, Dexion, PSL, the Registrar and the Company under these terms and conditions are in addition to any rights and remedies which would otherwise be available to each of them and the exercise or partial exercise of one will not prevent the exercise of others.
- 7.3 On application, if a Placee is a discretionary fund manager, that Placee may be asked to disclose in writing or orally the jurisdiction in which its funds are managed or owned. All documents provided in connection with the Placing will be sent at the Placee's risk. They may be returned by post to such Placee at the address notified by such Placee.
- 7.4 Each Placee agrees to be bound by the Articles (as amended from time to time) once the Issue Shares, which the Placee has agreed to subscribe for pursuant to the Placing, have been acquired by the Placee. The contract to subscribe for Issue Shares under the Placing and the appointments and authorities mentioned in this Prospectus will be governed by, and construed in accordance with, the laws of England and Wales. For the exclusive benefit of Oriel, Dexion, PSL, the Company and the Registrar, each Placee irrevocably submits to the jurisdiction of the courts of England and Wales and waives any objection to proceedings in any such court on the ground of venue or on the ground that proceedings have been brought in an inconvenient forum. This does not prevent an action being taken against Placee in any other jurisdiction.

- 7.5 In the case of a joint agreement to subscribe for Issue Shares under the Placing, references to a “Placee” in these terms and conditions are to each of the Placees who are a party to that joint agreement and their liability is joint and several.
- 7.6 Oriel, Dexion, and the Company expressly reserve the right to modify the Placing (including, without limitation, their timetable and settlement) at any time before allocations are determined.
- 7.7 The Placing is subject to the satisfaction of the conditions contained in the Sponsor and Placing Agreement and the Sponsor and Placing Agreement not having been terminated. Further details of the terms of the Sponsor and Placing Agreement are contained in Part IX of this Prospectus.

By completing and delivering an Application Form, you, as the applicant, and, if you sign the Application Form on behalf of another person or a corporation, that person or corporation:
- 2.1.1 offer to subscribe for such number of Issue Shares at £1.00 per Sterling C Share (as the case may be) as may be purchased by the subscription amount specified in Box 1 on your Application Form (being a minimum of £1,000 or such lesser amount as the Company may, in its absolute discretion, determine to accept in respect of applications from (i) authorised persons and (ii) persons (including Directors) having a pre-existing connection with the Company) on the terms, and subject to the conditions, set out in this Prospectus, including these Terms and Conditions of Application and the Memorandum and Articles;
 - 2.1.2 agree that in respect of any Sterling C Shares for which you wish to subscribe under the Offer you will submit payment in Sterling;
 - 2.1.3 agree that, in consideration of the Company agreeing that it will not, prior to the date of Admission, offer for subscription any Issue Shares to any person other than by means of the procedures referred to in this Prospectus, your application may not be revoked and that this paragraph shall constitute a collateral contract between you and the Company which will become binding upon despatch by post to, or in the case of delivery by hand, on receipt by the Receiving Agent of, your Application Form;
 - 2.1.4 undertake to pay the amount for the number of Issue Shares specified in Box 1 on your Application Form in full on application and warrant that the remittance accompanying your Application Form will be honoured on first presentation and agree that if such remittance is not so honoured you will not be entitled to receive the share certificates for the Issue Shares applied for in certificated form or be entitled to commence dealing in the Issue Shares applied for in uncertificated form or to enjoy or receive any rights in respect of such Issue Shares unless and until you make payment in cleared funds for such Issue Shares and such payment is accepted by the Receiving Agent (which acceptance shall be in its absolute discretion and on the basis that you indemnify the Receiving Agent and the Company against all costs, damages, losses, expenses and liabilities arising out of, or in connection with, the failure of your remittance to be honoured on first presentation) and the Company may (without prejudice to any other rights it may have) void the agreement to allot the Issue Shares and may allot them to some other person, in which case you will not be entitled to any refund or payment in respect thereof (other than the refund by way of a cheque, in your favour, at your risk, for an amount equal to the proceeds of the remittance which accompanied your Application Form, without interest);
 - 2.1.5 agree that where on your Application Form a request is made for Issue Shares to be deposited into a CREST Account, the Company may in its absolute discretion amend the form so that such Issue Shares may be issued in certificated form registered in the name(s) of the holders specified in your Application Form (and recognise that the Receiving Agent will so amend the form if there is any delay in satisfying the identity of the applicant or the owner of the CREST Account or in receiving your remittance in cleared funds);
 - 2.1.6 agree, in respect of applications for Issue Shares in certificated form (or where the Company exercises its discretion pursuant to paragraph 2.1.4 to issue Issue Shares in certificated form), that any share certificate to which you or, in the case of joint applicants, any of the persons specified by you in your Application Form may become entitled or pursuant to paragraph 2.1.4 above (and any monies returnable to you) may be retained by the Receiving Agent:
 - (i) pending clearance of your remittance;

- (ii) pending investigation of any suspected breach of the warranties contained in paragraph 6 below or any other suspected breach of these Terms and Conditions of Application;
- (iii) pending any verification of identity which is, or which the Receiving Agent considers may be, required for the purpose of The Criminal Justice (Proceeds of Crime) (Bailiwick of Guernsey) Law, 1999 (as amended), and the regulations made thereunder, and the GFSC's Handbook for Financial Services Businesses on Countering Financial Crime and Terrorist Financing (as amended, supplemented and/or replaced from time to time) (the "**Guernsey AML Requirements**"); or
- (iv) and any interest accruing on such retained monies shall accrue to and for the benefit of the Company;

2.1.7 agree, on the request of the Receiving Agent, to disclose promptly in writing to them such information as the Receiving Agent may request in connection with your application and authorise the Receiving Agent to disclose any information relating to your application which they may consider appropriate;

2.1.8 agree that, if evidence of identity satisfactory to the Receiving Agent is not provided to the Receiving Agent within a reasonable time (in the opinion of the Company) following a request therefor, the Company or the Receiving Agent may terminate the agreement with you to allot Issue Shares and, in such case, the Issue Shares which would otherwise have been allotted to you may be reallocated or sold to some other party and the lesser of your application monies or such proceeds of sale (as the case may be, with the proceeds of any gain derived from a sale accruing to the Company) will be returned by cheque made out to the first named applicant on which the payment accompanying the application was first drawn without interest and at your risk;

2.1.9 agree that you are not applying on behalf of a person engaged in money laundering, drug trafficking or terrorism;

2.1.10 undertake to ensure that, in the case of an Application Form signed by someone else on your behalf, the original of the relevant power of attorney (or a complete copy certified by a solicitor or notary) is enclosed with your Application Form together with full identity documents for the person so signing;

2.1.11 undertake to pay interest at the rate described in paragraph 3.3 below if the remittance accompanying your Application Form is not honoured on first presentation;

2.1.12 authorise the Receiving Agent to procure that there be sent to you definitive certificates in respect of the number of Issue Shares for which your application is accepted or if you have completed section 8 on your Application Form, but subject to paragraph 2.1.4 above, to deliver the number of Issue Shares for which your application is accepted into CREST, and/or to return any monies returnable by cheque in your favour without interest and at your risk;

2.1.13 confirm that you have read and complied with paragraph 8 of this Part XI of the Prospectus;

2.1.14 agree that all subscription cheques and payments will be processed through a bank account (the "**Acceptance Account**") in the name of "Capita Registrars Limited re NB Global Floating Rate Income Fund Limited" opened with the Receiving Agent;

2.1.15 agree that your Application Form is addressed to the Company and the Receiving Agent;

2.1.16 agree that, if a fractional entitlement to an Issue Share arises on your application, the number of Issue Shares issued to you will be rounded down to the nearest whole number and any fractions shall be retained by the Company for its benefit; and

2.2 Any application may be rejected in whole or in part at the sole discretion of the Company.

3. Acceptance of your Offer

3.1 The Receiving Agent may, on behalf of the Company, accept your offer to subscribe (if your application is received, valid (or treated as valid), processed and not rejected) by notifying acceptance to you.

- 3.2 The basis of allocation will be determined by the Joint Bookrunners in consultation with the Company. The right is reserved notwithstanding the basis as so determined to reject in whole or in part and/or scale back any application. The right is reserved to treat as valid any application not complying fully with these Terms and Conditions of Application or not in all respects completed or delivered in accordance with the instructions accompanying the Application Form. In particular, but without limitation, the Company may accept an application made otherwise than by completion of an Application Form where you have agreed with the Company in some other manner to apply in accordance with these Terms and Conditions of Application. The Company and Receiving Agent reserves the right (but shall not be obliged) to accept Application Forms and accompanying remittances which are received otherwise than in accordance with these Terms and Conditions of Application.
- 3.3 The Receiving Agent will present all cheques and banker's drafts for payment on receipt and will retain documents of title and surplus monies pending clearance of successful applicants' payment. The Receiving Agent may, as agent of and, under instructions from, the Company, require you to pay interest or its other resulting costs (or both) if the payment accompanying your application is not honoured on first presentation. If you are required to pay interest you will be obliged to pay the amount determined by the Receiving Agent and the Company, to be the interest on the amount of the payment from the date on which all payments in cleared funds are due to be received until the date of receipt of cleared funds. The rate of interest will be the then published bank base rate of a clearing bank selected by the Receiving Agent and the Company plus 2 per cent. per annum. The right is also reserved to reject in whole or in part, or to scale down or limit, any application.
- 3.4 The Company reserves the right in its absolute discretion (but shall not be obliged) to accept applications for less than the Minimum Subscription.
