Investment Strategy, Objectives and Restrictions

Investment Objective

The Company's investment objective is to provide its shareholders with consistent levels of monthly income, while maintaining or increasing the Net Asset Value per Share over time.

Investment Policy

To pursue its investment objective, the Company will invest in credit assets with the following target portfolio allocations: (i) 50-70% in traditional credit, meaning high yield bonds, floating rate loans and investment grade corporate bonds; and (ii) 30-50% in alternative credit, meaning "special situations" (consisting generally of tradeable but less liquid debt securities, such as stressed credit and CLO debt tranches), mezzanine debt, "club" loan transactions (being syndicated lending opportunities presented through the Company's or Investment Manager's relationship with loan arrangers and/or borrowers) and private corporate loans issued directly to borrowers. Investments in alternative credit will not represent more than 50% of Net Asset Value at the time of investment.

The Company's investments will be issued in U.S. Dollars, Sterling and Euros by corporations, partnerships and other business issuers based primarily in North America, the UK and Europe. At the time of investment these loans, bonds and other debt instruments will often be non-investment grade.

The Company expects that it will typically hold the majority of its assets directly, however where the Investment Manager considers it appropriate the Company may obtain investment exposure to loans, bonds and other debt instruments through investments in other collective investment vehicles. The Company will not invest more than 15 per cent. of its total assets in other listed closed-ended investment funds at any time.

Diversification

The Investment Manager seeks to manage risk through in-depth credit research utilising proprietary analytical processes, diversifying across industries, companies and investment size and adjusting sector weightings based on economic and market analysis.

The Company's portfolio of investments is intended to focus on those industries regarded as defensive. Defensive industries are those the Investment Manager believes are less affected by changes in economic conditions and likely to demonstrate the strongest capital preservation. Typically, no industry will represent more than 15 per cent. of Net Asset Value at the time of investment.

At the time of investment, no more than 5 per cent. of Net Asset Value shall be concentrated in a single issuer.

For information on the Company's principal risks and risk management, investors are directed to the disclosures contained at pages 20 to 23 of the Annual Report which is available for inspection on the Company's website at www.nbgmif.com.

Historical Performance

The historical performance of the Company can be found within the Company's Factsheets and previous annual reports, which are published on its website: www.nbgmif.com.

Investors should note that past performance of the Company is not necessarily indicative of future performance. Capital may be at risk as the value of investments may go down as well as up and is not guaranteed, therefore investors may not get back the amount originally invested. There can be no guarantee that the investment objective of the Company will be achieved or provide the returns sought by the Company or its investors.

Leverage

The Company may use derivatives for hedging as well as for efficient portfolio management, including managing currency risks between cash flows from its investments and Sterling being the currency of the Shares. The Company is expected to be managed primarily on an ungeared basis, however the Company may, from time to time, be geared tactically through the use of borrowings for investment and short-term liquidity purposes. The Directors will restrict borrowing to an amount not exceeding 20 per cent. of Net Asset Value at the time of drawdown. Derivatives including currency swaps, futures, options and forwards may be used for hedging purposes when available.

The Company does not currently have any credit facilities in place.

Modification of Investment Strategy

In accordance with the Listing Rules of the UKLA, any material change to the Company's published investment policy will require the prior approval of both the FCA and the shareholders of the Company. In considering what is a material change the Company will have regard to the cumulative effect of all the changes since the Company's shareholders last had the opportunity to vote on the investment policy.

Summary description of the AIF's Valuation Procedure

The Company carries investments on its Consolidated Statement of Assets and Liabilities at fair value in accordance with US GAAP, with changes in fair value recognised within the Consolidated Statement of Operations in each reporting period. Quoted investments are valued according to their bid price as at the close of the relevant reporting date. Investments in private securities are priced at the bid price using a pricing service for private loans. Asset backed securities are valued according to their bid price. If a price cannot be ascertained from the above sources, the Company will seek bid prices from third party broker/dealer quotes for the investments. The AIFM believes that bid pricing is the best estimate of fair value and is in line with the valuation policy adopted by the Company.

In cases where no third party price is available, or where the AIFM determines that the provided price is not an accurate representation of the fair value of the investment, the AIFM determines the valuation based on the AIFM's fair valuation policy. The overall criterion for fair value is a price at which the securities involved would change hands in a transaction between a willing buyer and a willing seller, neither being under compulsion to buy or sell and both having the same knowledge of the relevant facts.

Consistent with the above criterion, the following criteria are considered when applicable:

- Valuation of other securities by the same issuer for which market quotations are available;
- Reasons for absence of market quotations;
- The credit quality of the issuer and the related economics;
- Recent sales prices and/or bid and ask quotations for the security;
- Value of similar securities of issuers in the same or similar industries for which market quotations are available;
- Economic outlook of the industry;
- Issuer's position in the industry;
- The financial information of the issuer; and
- The nature and duration of any restriction on disposition of the security.

Derivative instruments will be valued at fair value based on observable market inputs wherever possible.

Fair Treatment of Investors

The Directors of the Company have certain statutory duties with which they must comply. These include a duty upon each Director to act in the way he considers, in good faith, would be most likely to promote the success of the Company for the benefit of its members as a whole.

As its Ordinary Shares are admitted to the Official List and to trading on the Main Market of the London

Stock Exchange, the Company is required to comply with, inter alia, the relevant provisions of the Listing Rules, the Prospectus Regulation Rules, the Disclosure Guidance and Transparency Rules, Regulation (EU) No. 596/2014 on market abuse and the City Code on Takeovers, all of which, amongst other things, contribute to ensuring the fair treatment of investors. No investor in the Company has the right to obtain preferential treatment in relation to their investment in the Company and the Company does not give preferential treatment to any investors.
